The SPRING BOOK 1920

73/7 0

Randall McLoughlin

WE HAVE BEEN ASKED
a great many times the
meaning of "INVICTA," and we
believe that here is an appropriate
place to explain it to those who
are interested.

INVICTA MEANS INVINCIBLE, in
plain American UNBEATABLE.
This is what we aim to make
everything that bears the name
INVICTA.

"Make new friends
and keep the old."

THE SPRING BOOK

IN preparing the Spring Book we have in mind an effort to accomplish on paper what we cannot in every case do in the flesh. That is to, as far as is humanly possible, bring our personality to our friends and make them feel that, although in many cases we cannot meet them and talk with them, we are real, living persons, interested in their needs, anxious and ready to serve them to the limit of our ability.

Last season we felt that we should apologize for the incompleteness of our Spring issue of the Farm and Garden Book for the reason that there were many items that we would have liked to have included in that issue, but could not do so. In the first place, our facilities for handling a large line of supplies were entirely too limited, and our resources were more so.

This season we make no apologies. We have taken time by the forelock and have left nothing undone to bring together the very best that is to be found in our line, for we contend that the great public wants the best that there is to be had, and working on this thesis we have gone the limit.

Added to this, we have erected and equipped a splendid manufacturing building at Westlake Avenue and Harrison Street that places us at the head of the line in this particular. We have also expanded our down-town store at Madison Street and Western Avenue, now occupying the whole double corner.

These expansions have been made possible by your hearty support, which we have endeavored to merit, and which we intend to retain by keeping your confidence.

We invite you to glance particularly over the specials in our seed list, for we believe that it is the first time that such a varied and excellent collection of garden seeds have been brought together in the Northwest. All experienced gardeners know the excellence of Kelway's Seeds, for they stand in a class by themselves. Kelways produce no cheap seeds.

We also call your attention to our complete line of Poultry Foods and Supplies. We are now making all of our Poultry Foods and many of our Remedies. To this we have added Spratt's complete line of Poultry, Dog, Pheasant and Cage Bird Remedies, which is standard, and too well known to need description.

It is our intention to give satisfaction in every way. If you are pleased with our treatment we would like to know it. If you are not satisfied with our service we especially wish to know it to enable us to correct the fault. In all cases our policy will always be

YOUR MONEY'S WORTH OR YOUR MONEY BACK.

MAIL ORDERS

Suggestions That Will Assist Us in Filling Orders Satisfactorily

ORDER EARLY. Avoid disappointment to yourself, and assist us greatly, by ordering as early in spring as is possible. During the spring rush there is bound to be some confusion and delay; also, the particular varieties which you wish may be sold out.

USE OUR ORDER SHEETS. Please use the order sheets which are enclosed with this catalog. Otherwise the orders must be rewritten by us, causing delay and chance for error. Additional sheets will be mailed on request.

WRITE NAME, ADDRESS AND SHIPPING INSTRUCTIONS IN PROPER SPACES VERY DISTINCTLY. This information is often lacking or illegible, and we are unable to fill the orders until complaint is received.

CORRESPONDENCE. If it is necessary to write a letter with the order, please write it on separate paper. Nothing but the order and shipping instructions should be written on the order sheet.

REMITTANCE. Remittance should be made by Post Office Money Order, Express Money Order, Bank Draft, or Registered Letter. Postage Stamps are convenient for small amounts, but we cannot be responsible for stamps or coin lost in the mails.

TERMS. Unless you are favorably rated in Dun's or Bradstreet's, or have previously arranged with our treasurer for an account, our terms are strictly cash with order in all cases. Please do not ask us to ship goods C. O. D. It is a very unsatisfactory method for all concerned, and causes much unnecessary labor and expense.

PRICES. Our prices are as low as is consistent with the quality of goods furnished, and there are no discounts or premiums of any kind. Prices of some of the goods shown in this catalog are subject to market changes, and such changes will be shown in price lists which we will publish from time to time and will mail on request.

QUANTITY PRICES. Market gardeners and others requiring seeds in very large quantities will please write for special quantity prices, stating varieties and quantities wanted.

DELIVERY. Prices do not include postage or freight charges except when so stated. We make no charge for packing or for delivery to post office or freight houses.

SEATTLE DELIVERIES. To all accessible points within the limits of the city of Seattle we deliver at the very reasonable rate of 20c per 100 lbs., provided that delivery may be made on certain days allotted to various sections of the city.

COMPLAINTS. It is our policy to adjust errors promptly and liberally. If you have any reasonable complaint we are anxious to know about it. Most dissatisfaction is on account of misunderstanding.

NON-WARRANTY. Most failures are due to causes beyond our control, rendering it impossible for us to guarantee success, and although we are careful to supply only such goods as will, under proper conditions, produce satisfactory results, we give no warranty as to description, quality or productiveness of any seeds, plants or bulbs sent out, and will not be in any way responsible for the crop, and every order for articles named in this catalog will be executed on these conditions only.

VEGETABLE SEEDS

Seeds That May Be Depended Upon

THERE IS A DIFFERENCE. In nothing does breeding and ancestry count more than in seeds. We are catering to the class of people who are particular what they buy, and want the best there is to be had. Our specialties are mostly of the famous Kelway Seeds, imported by us direct from England. Most gardeners know of Kelways, the leading and most reliable seed growers of England. The fact that they have grown the seed is sufficient proof of its excellence.

The seeds of such vegetables as are improved by being acclimated in the Northwest are either grown by us or procured from responsible growers. We have been very careful to procure only such seed as we can highly recommend. We are now building the foundation of a business, our reputation and future welfare are at stake and we cannot afford to handle anything but the best.

ASPARAGUS

Cultural directions. Sow the seed very early in spring, an inch apart in drills two to three feet apart, covering with about one inch of soil. Thin to about three inches apart. Cultivate thoroughly during the summer. The following spring, transplant to the permanent bed. The soil should be very rich. Set the plants one foot apart in the bottom of trenches four feet apart, spreading the roots over little mounds of earth. Cover about three inches over the top of crowns, and gradually fill the trenches as the plants grow. They will not be ready to cut until about the fourth year. One to two years may be saved by purchasing the plants, listed elsewhere in this catalog.

Conover's Colossal

An excellent variety; light green in color; a quick grower; firm, large, and of good flavor. This is the famous "Bouldin Island" asparagus, noted for its canning qualities.Packet, 10c; Oz., 20c; postpaid

Palmetto

Very early and prolific, producing an abundance of very large, deep green shoots of the best qualityPkt., 10c; Oz., 20c; postpaid

Conover's Colossal Asparagus

ARTICHOKE

Cultural directions. The Artichoke plant resembles a giant thistle, and the edible portion is the immature flower bud. It is a perennial, and will last for several years. Buds are not produced until the second year.

The seed should be sown in a hotbed, and the plants transplanted to the garden after all danger of frost is past. The soil should be very rich and well drained. Rows should be four feet apart and the plants two feet apart in rows.

Large French Green Globe

The most popular variety. Buds are large, globular, deep green. Globe Artichokes are not in any way similar to Jerusalem Artichokes, the edible portion of which is the tubersPacket, 10c, postpaid

Jerusalem Artichokes are listed elsewhere in this catalog.

MAG-O-TITE is a sure cure for Root Maggots. You can now grow Radishes, Turnips, Cabbages and Onions.

BEANS

DWARF, WAX OR YELLOW PODDED VARIETIES

Cultural directions. A good sandy loam soil is best for beans. Do not plant until all danger of frost and chilly weather is past. Drop the seed about two inches apart in drills two feet apart, and cover with two inches of earth. One pound is sufficient for one hundred feet of drill.

DAVIS WHITE KIDNEY WAX BEAN

The finest yellow podded bush bean. It is very early, the plant is hardy and produces an abundant crop of long, straight, waxy white pods, six to seven inches in length, very attractive and of splendid quality. The dried beans are pure white, and are excellent for baking.....Packet, 10c; Lb., 35c; postage additional

Golden Wax Bean

An old standard variety, and one of the earliest and best. The pods are of medium length, slightly curved, broad, flat, and golden yellow color.....Pkt., 10c; Lb., 35c

Wardwell's Kidney Wax Bean

A very popular wax bean, bearing long, waxy yellow flat pods; stringless and brittle. A little later than Golden Wax.....Pkt., 10c; Lb., 35c; postage additional

Pencil Pod Black Wax

A very handsome black wax yellow podded sort. Medium early, fairly hardy and productive. The pods are long, straight, round, fleshy, tender, stringless, and are produced through a long season.....Pkt., 10c; Lb., 35c

DWARF, GREEN PODDED VARIETIES

Davis White Kidney Bean

Cultural directions. Same as for the Yellow Podded Varieties.

BURPEE'S STRINGLESS GREEN POD BEAN

Extra early and absolutely stringless. Two weeks earlier than other green pod varieties. The pods are long, thick, meaty, and of fine quality.....Pkt., 10c; Lb., 35c

Early Long Yellow Six Weeks

A very early green podded bean of good quality; a favorite for market.....Pkt., 10c; Lb., 35c

Black Valentine

A very hardy and productive green podded bean, popular with market gardeners. The vines are strong and vigorous, and may be depended upon to produce a good crop.....Pkt., 10c; Lb., 35c

Canadian Wonder

The largest and most prolific of the green podded sorts. Entirely stringless, early, and a great favorite. Bears for a long season.....Pkt., 10c; Lb., 35c

Dwarf Horticultural

One of the best dwarf sorts for green shell beans for home and market, and may be used early as a green podded snap bean. Seed is large, oval, plump, buff splashed with red. Pkt., 10c; Lb., 35c

Refugee, or 1000 to 1

A standard and very productive variety, highly esteemed for late planting for snaps and for shipping, canning and picking. Plants very large and hardy.....Pkt., 10c; Lb., 35c

Early Refugee

Very similar to Late Refugee, but much earlier.....Pkt., 10c; Lb., 35c

Red Valentine

A superior variety for snaps. Very dependable, even under adverse conditions.....

Pkt., 10c; Lb., 35c

POLE BEANS

Cultural directions. Six to ten seeds should be planted two inches deep around the base of poles set firmly in the ground three to four feet apart. Thin to three or four plants to the hill after danger of insects is past

KENTUCKY WONDER, OR OLD HOMESTEAD

The finest and most popular of the pole beans. It is early and very prolific, with long attractive green pods of the most excellent quality. The vines are vigorous, climbing well, very productive, and bear pods in large clusters.....Pkt., 10c; Lb., 35c

Golden Pod Kentucky Wax

Very similar to the green podded Kentucky Wonder, but the pods are a little broader and are of a golden yellow color. Very fleshy, stringless and of excellent quality.....Pkt., 10c; Lb., 35c

Asparagus, or Yard Long Bean

Some prefer this to Kentucky Wonder. It is a prolific producer. The pods are long, slender, crisp, tender and have a wonderful flavor.....Pkt., 10c; Lb., 35c

Lazy Wife

Very extensively grown, and one of the best of the later green podded pole beans. Pods are six inches long, broad, thick, fleshy and stringless. The dry beans are white.....Pkt., 10c; Lb., 35c

London Horticultural, or Speckled Cranberry

One of the best of the Horticultural varieties as a late green shell bean. Many prefer this to the limas. The beans are large, ovate, flesh colored splashed with red.....Pkt., 10c; Lb., 35c

White Creaseback

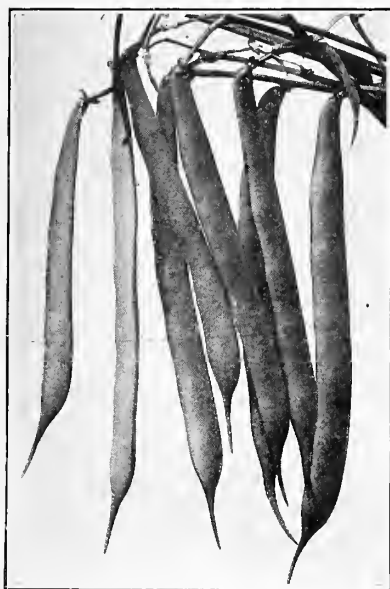

Valuable for its extreme earliness. Vines are of medium size, vigorous and wonderfully productive. Pods five inches long, light green, and of good quality.....Pkt., 10c; Lb., 35c

Scarlet Runner

Very ornamental, bearing a profusion of bright scarlet flowers. The pods, when young, are of fine quality and are in great demand, especially with the English people.....Pkt., 10c; Lb., 35c

White Dutch Runner

Similar to Scarlet Runner, except that the flowers are white.....Pkt., 10c; Lb., 35c

Stringless Green Pod

LIMA BEANS

Cultural directions. Pole Lima and Dwarf Lima Beans are planted and cultivated the same as other Pole and Dwarf Beans, except that they are more tender and must not be planted until later, and must be favored in every way possible, especially the Pole Limas. The Dwarfs are more suitable for the Northwest.

BURPEE'S DWARF LIMA

The earliest and best of the Dwarf Lima Beans, and the most suitable of the Limas for this locality.....Pkt., 15c; Lb., 40c

King of the Garden Lima

A standard and favorite Pole Lima Bean, bearing large pods filled with very large beans, but all conditions must be favorable for success in this locality.....Pkt., 15c; Lb., 40c

Oregon Pole Lima

Best of the Pole Lima Beans for the country west of the Cascade MountainsPkt., 15c; Lb., 40c

BEETS

Cultural directions. For early beets sow the seed very early in spring, and for succession, main crop, and winter beets at intervals until June. Sow the seed two inches apart in drills twelve to eighteen inches apart, covering about one inch deep. The seed will germinate more quickly if soaked in water before planting.

KELWAY'S CRIMSON GLOBE BEET

This is unquestionably the finest early beet, and those who have grown it will have no other. It is of medium size, about three inches in diameter, very nearly globular, with a smooth, even surface. The flesh is deep crimson ringed and zoned in varying shades.

Our seed is imported direct from Kelway & Sons, Loganport, England.

Pkt., 15c; Oz., 25c; Lb., \$2.00; postpaid.

CROSBY'S EGYPTIAN

A great improvement over the old Egyptian Beet, larger and of better quality. Extra early, flattened, very smooth. An excellent variety.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Early Blood Turnip Beet

Roots dark red and nearly round, slightly flattened. Flesh deep red zoned with lighter shade: sweet, crisp and tender. An excellent sort for summer and fall usePkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Early Eclipse

One of the earliest. It does not grow to large size, but is desirable for its earliness and sweet, tender qualityPkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Extra Early Egyptian

Considered the best forcing variety. Tops are small. Roots very dark red, small, flattened on bottom. Tender and sweet.Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

FIELD BEANS

Cultural directions. Culture is the same as for other Dwarf Beans, except that for field culture the rows should be far enough apart to allow for cultivation with a horse. Sixty pounds of seed to the acre.

LADY WASHINGTON

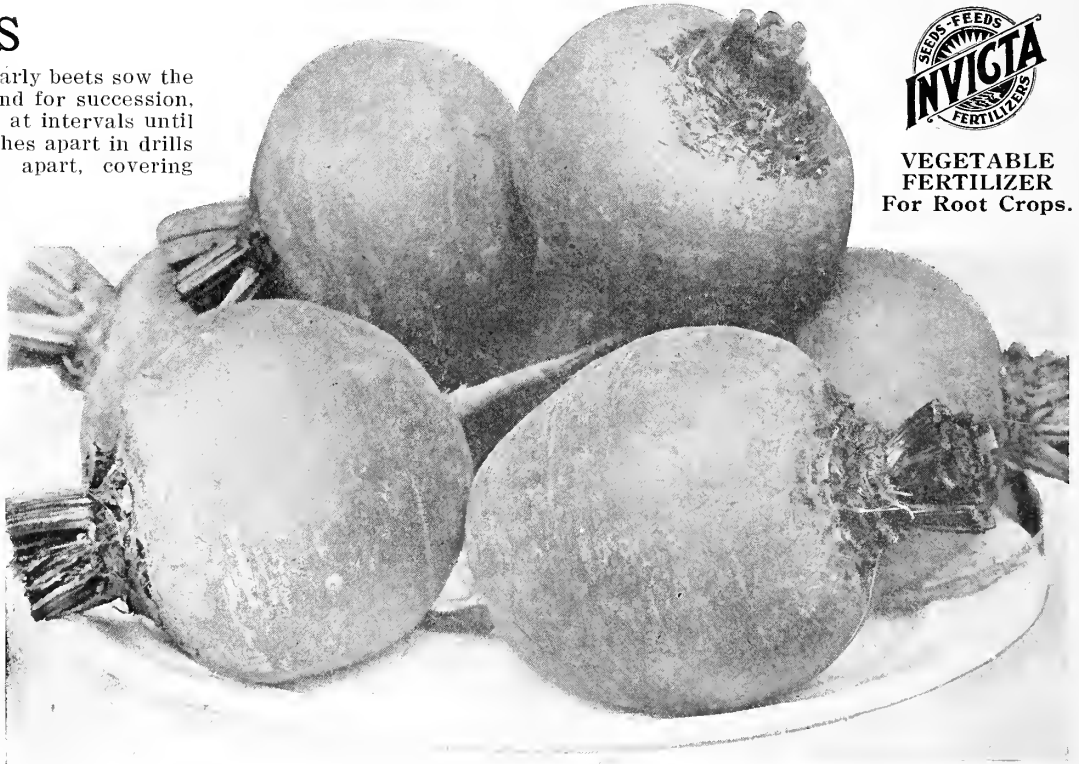

Similar to the Small White Navy Bean, but larger, earlier, and more productive. The bush is about fourteen inches high, yields immense crops, and matures in SeptemberPacket, 10c; Pound, 25c; Postage additional

Small White Navy Bean

The well known white bean so extensively grown commerciallyPacket, 10c; Pound, 25c; Postage additional

Broad Windsor Bean

A broad, flat bean; similar to the Lima in shape, but the color is brown. They are considered a great delicacy in England, and are boiled when young and tender.....Pkt., 10c; Lb., 25c

Kelway's Crimson Globe Beet

**VEGETABLE
FERTILIZER
For Root Crops.**

Detroit Dark Red

A choice variety of early Turnip Beet. Somewhat globe shape; skin blood red; flesh rich red zoned with darker shade. Sweet, and excellent for canning.....Pkt., 10c; Oz., 20c; Lb., \$1.50

HALF LONG BLOOD BEET

The best variety for winter and spring use and to slice for pickles. It is half long and the flesh is very rich red, sweet and tenderPkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Long Smooth Blood Red Beet

A standard late variety, keeping well through the winter. Flesh dark red, tender and sweet. Excellent for pickles.Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Swiss Chard, or Sea Kale Beet, the finest of all vegetables for greens, is listed on page 18. Don't fail to order this seed.

Mangels, or Stock Beets, will be found in the Farm Seeds section. They are valuable Poultry and Stock Food. We have some of Kelway's specials.

BROCCOLI

Cultural directions. Broccoli resembles Cauliflower, but it is later, being marketed in winter and early spring, is hardier, not so large, and is somewhat coarser. It is deliciously sweet and tender, and our climate is especially adapted to its growth. Culture is the same as for Cauliflower.

KELWAY'S SNOWDRIFT

A new and exceedingly fine variety. The heads are large and white, and the quality is unexcelled. Perfectly hardy, and will thrive in our climate. Our seed was grown by Kelways.....Packet, 15c; Ounce, \$1.50, postpaid

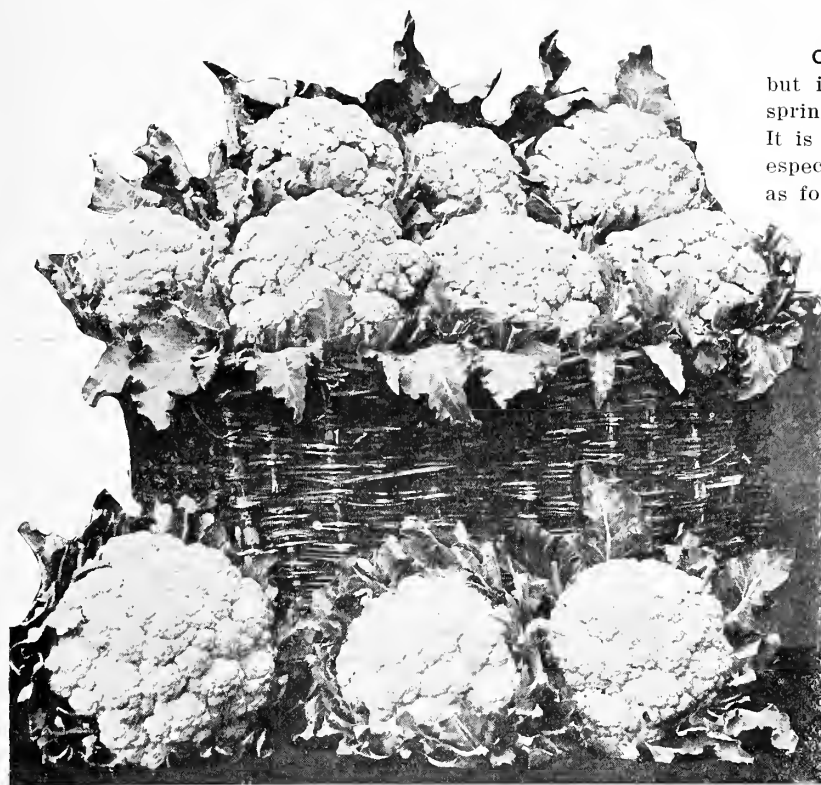

Snowwhite

A valuable commercial variety, firm and of good shapePkt., 10c; Oz., 75c, postpaid

St. Valentine

An excellent variety. Heads large and solid. Ready in February. Remains in prime condition for a long time....Pkt., 10c; Oz., \$1.25, postpaid

MAG-O-TITE is a guaranteed remedy for Root Maggots. It is easy to apply, and the results are positive. Try it. If you are not satisfied we will refund your money.

Kelway's Snowdrift Broccoli

BRUSSELS SPROUTS

Cultural directions. Belongs to the Cabbage and Cauliflower family, and the culture is similar. The edible portion is the small heads, less than two inches in diameter, which form on the stalk at each leaf joint. They are very hardy, and in this climate may be left in the garden all winter, the sprouts being removed as wanted for use. The side leaves should be broken off in the fall to give the sprouts room to grow.

KELWAY'S PROLIFIC EXHIBITION

A very superior variety which can always be relied upon. Very fine, even shaped sprouts of good size and flavor. Not a coarse sprout, and not too small. Very prolific. Our seed is imported direct from Kelways.....Packet, 15c; Ounce, 75c; postpaid

Odessa Market

An improved Danish variety. An abundant producer. Nice shape. Stands any kind of weather, and is an excellent variety in every respect..Packet, 10c; Ounce, 35c; postpaid

CHINESE CABBAGE

Celery Cabbage. Pe-Tsai

Introduced by the Pacific Coast Chinese. It is excellent either for salad or cooking, and is becoming quite popular. The heads blanch readily, and the leaves are so tender as to make it a very fine salad. Thrives in any good garden soil. It is not hardy against frost, but will keep well if stored in a cool cellar..Pkt., 10c; Oz., 50c, postpaid

CHEVRIL

Cultural directions. Sow seed early in spring in seed bed. It germinates very slowly and it is sometimes four or five weeks before the plants appear. When the plants are large enough, transplant about one foot apart.

Curled Chervil

Very finely curled, resembling Parsley. The young leaves are used in soups and for flavoring and garnishing meats and vegetables.....Pkt., 10c; Oz., 25c; postpaid

CHICORY

Cultural directions. Sow the seed early in spring in light garden soil in drill two feet apart. When the plants are large enough, thin to six inches apart.

Large Rooted, or Coffee

The roots are used as a substitute or adulterant for coffee when dried and ground, and the leaves, blanched, are used as a saladPkt., 10c; Oz., 40c; postpaid

CHIVES

The plant resembles a tuft of grass, but the leaves have a mild onion flavor and are used in salads and for flavoring soups.....Pkt., 10c, postpaid

COLLARDS

A loose leaved cabbage or kale-like plant grown mostly in the south and used for greensPacket, 10c; Oz., 20c; postpaid

Kelways Prolific Exhibition

**FERTILIZERS
PRODUCE
RESULTS**

CABBAGE

Cultural directions. Seed of the early varieties should either be sown in hotbeds in February or in cold frames in September and the plants wintered over. Transplant about eighteen inches apart in rows two to three feet apart very early in spring, setting the plants down to the first leaf. Seed for second early and late should be sown in seed bed from early spring to June. Plants for late cabbage may be transplanted as late as July or the first of August.

KELWAY'S STANLEY

This is one of Kelway's specials, which means that it is really worth while. It is by far the earliest cabbage grown, and in quality it is best of all the early varieties. It is of medium size, very firm at the heart; with very few outer leaves, and these free from coarseness. It is dark green in color with small white veins. Our seed is imported direct from Kelways.....

.....Pkt., 15c; Oz., \$1.00; postpaid

KELWAY'S PERFECT MODEL

A highly recommended, pointed, medium sized, early variety, uniform in shape and of splendid quality. Excellent for market, maturing all at one time. The seed which we offer was grown by Kelways.....Pkt., 15c; Oz., \$1.00; postpaid

COPENHAGEN MARKET

Kelway's strain of this splendid variety. It is the earliest large, round headed cabbage, very large, very early, and very solid. The plants are short stemmed, compact, with few outer leaves, and are vigorous. Excellent for either home or market. Kelway's seedPkt., 15c; Oz., \$1.00; postpaid

Copenhagen Market

Early Jersey Wakefield

This has long been the standard early cabbage grown by all market gardeners. One of the very earliest, and a sure header. The heads are of medium size, uniformly pointed, very solid, and of excellent quality.....

.....Pkt., 10c; Oz., 75c; ¼-Lb., \$2.00; postpaid

Early Winnigstadt

Not quite so early as Early Jersey Wakefield, but similar in shape and size. An excellent early variety.....

.....Pkt., 10c; Oz., 50c; ¼-Lb., \$1.50; postpaid

Early Dwarf Flat Dutch

A good second early variety. Short stemmed, upright, compact, with few outer leaves. Heads rather large, nearly round, flattened. Firm and very solid. Good for home or marketPkt., 10c; Oz., 50c; ¼-Lb., \$1.50; postpaid

Succession

A sure heading intermediate or second early variety. Short stemmed. Heads large, deep, very firm and of excellent quality.....Pkt., 10c; Oz., 50c; ¼-Lb., \$1.75; postpaid

Kelway's Perfect Model

DANISH BALLHEAD

Another justly popular variety, the seed of which we imported from Kelways. It is a late variety, and the hardiest of all cabbages, the best for shipping, and in great demand by commercial growers. The stems are long, the heads compact, crisp, and of fine quality.....

.....Packet, 15c; Oz., 85c; ¼-Lb., \$2.50; postpaid

LATE FLAT DUTCH

Another of Kelway's strains, the best of this fine old variety. The plants are short stemmed with spreading outer leaves. The heads are very large, flat, solid, and of fine quality. Late, and a good keeper and shipper. Kelway's seed.....

.....Pkt., 10c; Oz., 60c; ¼-Lb., \$2.00; postpaid

Large Late Drumhead

A popular late cabbage for commercial growing and shipping. Heads large and solid; flattened.....

.....Pkt., 10c; Oz., 50c; ¼-Lb., \$1.50; postpaid

Surehead

A reliable late cabbage. Heads are large, flattened, very solid, and of good quality.....

.....Pkt., 10c; Oz., 50c; ¼-Lb., \$1.75; postpaid

Little Wonder

A very early variety, conical in form; hardy, solid and of good quality and flavor.....Pkt., 15c; Oz., 75c; ¼-Lb., \$2.50

Glory of Enkhuizen

A second early variety, very sure heading and of excellent quality. The heads are very nearly round, very solid, and of good sizePkt., 10c; Oz., 75c; ¼-Lb., \$2.25; postpaid

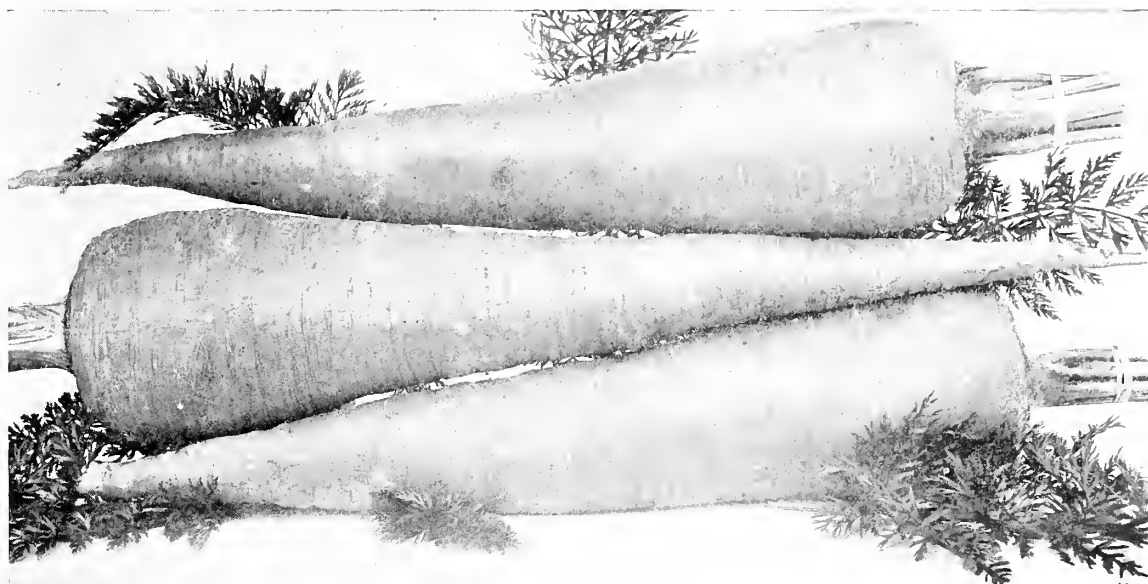

Red Rock

The largest and surest heading red cabbage. Late, large, round, very solid, and of very attractive deep red color.....

.....Pkt., 10c; Oz., 50c; ¼-Lb., \$1.75; postpaid

American Drumhead Savoy

Best of the main crop or late Savoy cabbages. The plants are vigorous, with rather short stem, and are very sure heading. The leaves are fleshy and are densely and uniformly crumpled. The heads are large, nearly round, fairly solid, sweet and tenderPkt., 10c; Oz., 50c; ¼-Lb., \$1.75; postpaid

Kelway's Early Market

CARROTS

Cultural direction. Like other root crops, carrots do best in a rich sandy loam, well tilled. For early crop the seed should be sown very early in spring; for later crops it may be sown any time before the middle of June. Sow in rows about sixteen inches apart and thin the plants to three inches apart. The seed is slow to germinate.

KELWAY'S EARLY MARKET

A new variety for this country, and we believe that it will become as popular as it is in England. It is one of Kelway's specials, which is sufficient guarantee of its worth. It is an early variety, quick growing, and a heavy producer of sound roots of the finest quality. Half-long in shape, and heavy shouldered. Our seed was imported direct from Kelways.....

.....Packet, 15c; Ounce, 35c; Lb., \$2.50; postpaid

Chantenay

An excellent medium early half long variety; one of the best in quality, and very productive. The roots are about six inches long, stump rooted, slightly tapered, smooth, crisp and tender. Bright orange in color

.....Pkt., 10c; Oz., 20c; Lb., \$1.25; postpaid

Improved Long Orange

A long intermediate or late variety, often twelve inches in length and three inches in diameter at the crown, tapering to a point. Excellent for table use when young; very productive, and in demand for a stock carrot

.....Pkt., 10c; Oz., 15c; Lb., \$1.00; postpaid

Early Scarlet Horn, or Short Horn

A very early variety used for forcing or early outdoor culture. The roots are reddish orange, and when forced quickly in very rich soil are very nearly round, but longer when grown outdoors. Used before fully grown, while young and tender

.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Mastodon Stock Carrot

An excellent stock carrot, popular on account of its immense size, productiveness, and being short and easy to harvest. White; not suitable for table use.....

.....Pkt., 10c; Oz., 15c; Lb., \$1.00; postpaid

Danvers Half Long

The most popular and generally known variety for both home and market. It is also a favorite for stock feeding, for although it does not yield so heavily as the larger varieties, it is richer and of much better quality. Stump rooted, six to eight inches long, deep orange in color, tender, and of good quality

.....Pkt., 10c; Oz., 20c; Lb., \$1.25; postpaid

Oxheart, or Guerande

A very thick, blunt carrot growing five to six inches long; a heavy yielder and used for both table and stock. The flesh is bright orange, fine grained and sweet.....

.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Large White Belgian

A splendid stock carrot; white, very large and productive. Grows mostly above ground

.....Pkt., 10c; Oz., 15c; Lb., \$1.00; postpaid

Yellow Giant Stock Carrot

A new Australian variety, wonderfully productive and easy of culture. Does best on heavy soils. The shoulders stand well out of the ground, making them easy to harvest. Bright yellow in color, and in great favor with butter makers.

.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Seattle, Washington, August 15, 1919.

Randall-McLoughlin Company,
Seattle.
Gentlemen:

In reply to your inquiry as to the efficiency of "Magotite" for combatting cabbage maggot, I should like to say that my present report must be considered as a tentative one, since the season is not yet fully over and my observation has that the maggot fly has not been so prevalent this season as is usually the case.

Making these reservations, however, in the interests of accuracy of statement, I feel free to state that I have had very much better results from the use of this preparation as an aid in growing maggot-infested crops than I have had with any one material or device which I have used, with the exception of a completely screened seed bed.

The first "Magotite" which I secured from you in the early part of May was used, at once, on a small planting of Wakefield cabbages which were very badly infested with maggots and eggs. No attempt was made to remove either the larva or eggs and the "Magotite" was merely applied close to the roots after the earth had been drawn away. Only one plant out of the lot succumbed to the pest and it was practically dead at the time of application. Most of the crop has already been harvested as excellent cabbage and the rest is hardening up at this time.

In addition to this initial test I have successfully raised two lots of onions, three lots of radishes, two crops of turnips and have growing, at the present time, cabbage, kale, broccoli, cauliflower and Brussels sprouts. Some

of these crops I have not been able to grow successfully for years on account of the destruction wrought by the pest in question. I feel, therefore, confident that you have hit upon a really good protective application and, at the same time, a real remedy when the insect is present. This after a number of trials in which the maggots have been allowed to infest the crop before application and a number of other trials in which "Magotite" was kept on continuously from the sowing of the seed.

As you are aware, I have taken considerable pains in trying out "Magotite" as I have with a number of other materials which have been suggested. I have done this because this one pest is, by all odds, the worst which the Western Washington gardener has to contend with. It has been, in fact, so serious that for several years I have not recommended the growing of certain infested crops to the amateur gardener, at all. I have, however, become so confident of the success of your remedy that I have recommended it to all of my personal friends who are gardeners and I now take pleasure in permitting you to use my name in connection with the testing out of your product.

It is, of course, too early to say whether another season results would be so satisfactory, but there is every reason to believe that at least great relief can be had by the use of the so-called "Magotite" which you have placed upon the market.

Should your remedy continue to be as beneficial as it appears now to be, you will, in my estimation, have achieved a permanent niche in the history of the development of horticulture in Western Washington and other sections of the country which have been laboring under the handicap of the cabbage maggot pest.

Yours very sincerely,

RONALD E. CHAPMAN,

Director of Agriculture and Gardening.

CAULIFLOWER

Cultural directions. The culture is practically the same as for cabbage, but they are a little more difficult to grow. When the heads begin to form they may be blanched by tying the leaves over them. They should be used while young and the curd is compact and firm.

KELWAY'S QUICKSILVER

This is by far the earliest Cauliflower grown. It is one of Kelway's specials and is something new in this country. The heads are of medium size, compact, pure white, and are of the finest quality. Our seed is imported direct from EnglandPacket, 35c; Ounce, \$5.50; postpaid

VEITCH'S AUTUMN GIANT

Our seed of this splendid variety was grown by Kelways, and is of the finest strain. It is a late sort with a long stem and an abundance of dark green leaves. The heads are very large, white, firm and compact, and remain a long time fit for use.....Packet, 15c; Ounce, \$2.50; postpaid

Early Snowball

A fine grade of this standard early variety. Medium size, firm, round headsPacket, 10c; Ounce, \$3.50; postpaid

Danish Snowball

A Holland grown strain of Snowball Cauliflower; early; dwarf. The heads are compact, white, and of fine qualityPacket, 10c; Ounce, \$3.50; postpaid

Late Algiers

American grown seed of this standard late variety. Very large heads of good quality.....Pkt., 10c; Oz., \$2.00; postpaid

Kelway's Quicksilver Cauliflower

Danish Giant, or Dry Weather

A medium early variety especially adapted for growing in dry localities. A sure header, white, solid and of good quality. Our seed is imported from HollandPkt., 25c; Oz., \$3.50; postpaid

CELERY

Cultural directions. Sow the seed in seed bed early in spring. Keep clear of weeds, and clip the tops once or twice to produce stocky plants. When ready to transplant, in June or July, set the plants six inches apart in rows three feet apart. In six or seven weeks they may be blanched by banking dirt against them, or by placing boards on edge on both sides of the rows.

KELWAY'S GOLDEN SELF BLANCHING

Kelway's strain of this most popular early variety, grown by all market gardeners and for home use. The plants are of medium size, compact and stocky, with yellowish green foliage; crisp, tender, and free from stringiness.....Packet, 15c; Ounce, 50c; postpaid

KELWAY'S WHITE PLUME

A very early variety. As the plants mature the inner stems and leaves turn white and require to be blanched but a short time before they are ready for use. It is very attractive, and is in great demand by market gardeners. Our seed is of Kelway's strain and is imported direct from England.....Pkt., 15c; Oz., 50c; postpaid

Giant Pascal

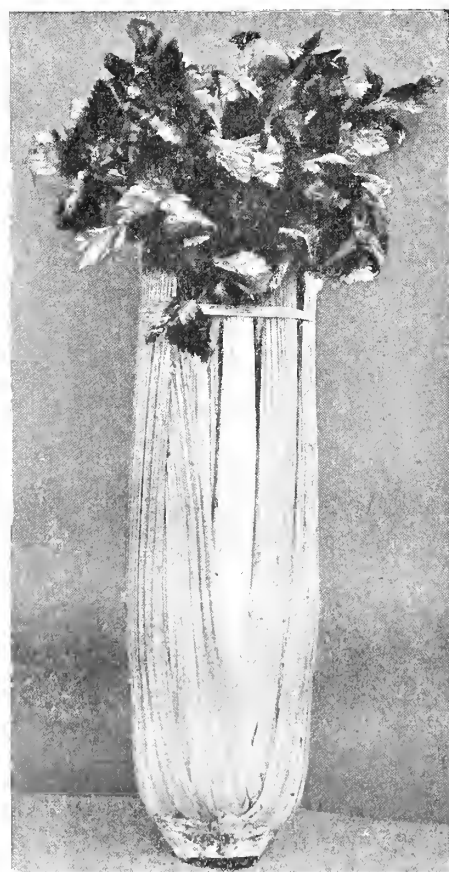

A very large, green leaved, late variety, popular for late fall and winter use. It blanches to a beautiful light yellow, and is solid, crisp and of good flavor.....Packet, 10c; Ounce, 35c; postpaid

CELERICAC

A turnip rooted kind of celery, the roots of which are the edible portion. They keep well for winter use, and are used in soups and stews. They are also cooked and sliced as a saladPacket, 10c; Ounce, 25c; postpaid

CORN SALAD

A small, quick growing salad plant for late fall, winter and spring use. The leaves are used as a substitute for lettuce and spinach.....Pkt., 10c; Oz., \$2.50; postpaid

Kelway's Golden Self-Blanching Celery

SWEET CORN

Cultural directions. Our cool climate is not very favorable for growing corn, and to be successful it must be given every advantage possible. The soil should be light, warm and rich, preferably sloping to the south. Corn is very sensitive to frost, and it should not be planted until danger of frost is past. Do not plant too close; the hills should not be less than one foot apart in rows three and one-half feet apart. Nitrate of Soda, or other nitrogenous fertilizer applied early in the season will give the plants a good start.

GOLDEN BANTAM

Golden Bantam is one of the newer varieties, and has become the most popular sweet corn grown. There is no other variety to compare with it in sweetness or flavor. It is early; the stalks are sturdy, and grow four to five feet high. The ears are eight rowed, six to seven inches long, and the kernels are large, exceptionally rich and sweet, and of a beautiful golden color.

Our seed is much superior to any that has been procurable in this market heretofore. It is pedigreed, having been grown by a specialist who has improved it by selecting for many years. Only the best ears are saved for seed, and they are grown from pedigreed stock
.....Packet, 10c; Pound, 40c; postage additional

Burpee's Early Howling-Mob

A splendid new early variety, not quite so early as Early Cory but the ears are much larger and the grains much whiter and sweeter. The ears measure seven to nine inches in length, with twelve to fourteen rows of good sized pearly white grains
.....Packet, 10c; Pound, 40c; postage additional

Peep o' Day

The earliest variety grown. The ears grow about five inches long; the kernels are large, white and tender
.....Pkt., 10c; Lb., 30c

Early White Cory

A very early variety, each stalk usually bearing two ears six to seven inches long, with sweet, tender and delicious milky white kernels. Plants dwarf
.....Pkt., 10c; Lb., 35c

Mammoth White Cory

An excellent early variety, a little later than Early White Cory, but the ears are larger
.....Pkt., 10c; Lb., 35c

Country Gentleman

The finest of the later varieties. It does well in this country when conditions are favorable. The ears are seven to nine inches long, the cobs very small and are densely covered with irregular rows of very long, slender white grains, unsurpassed in quality
.....Pkt., 10c; Lb., 35c

Early Minnesota

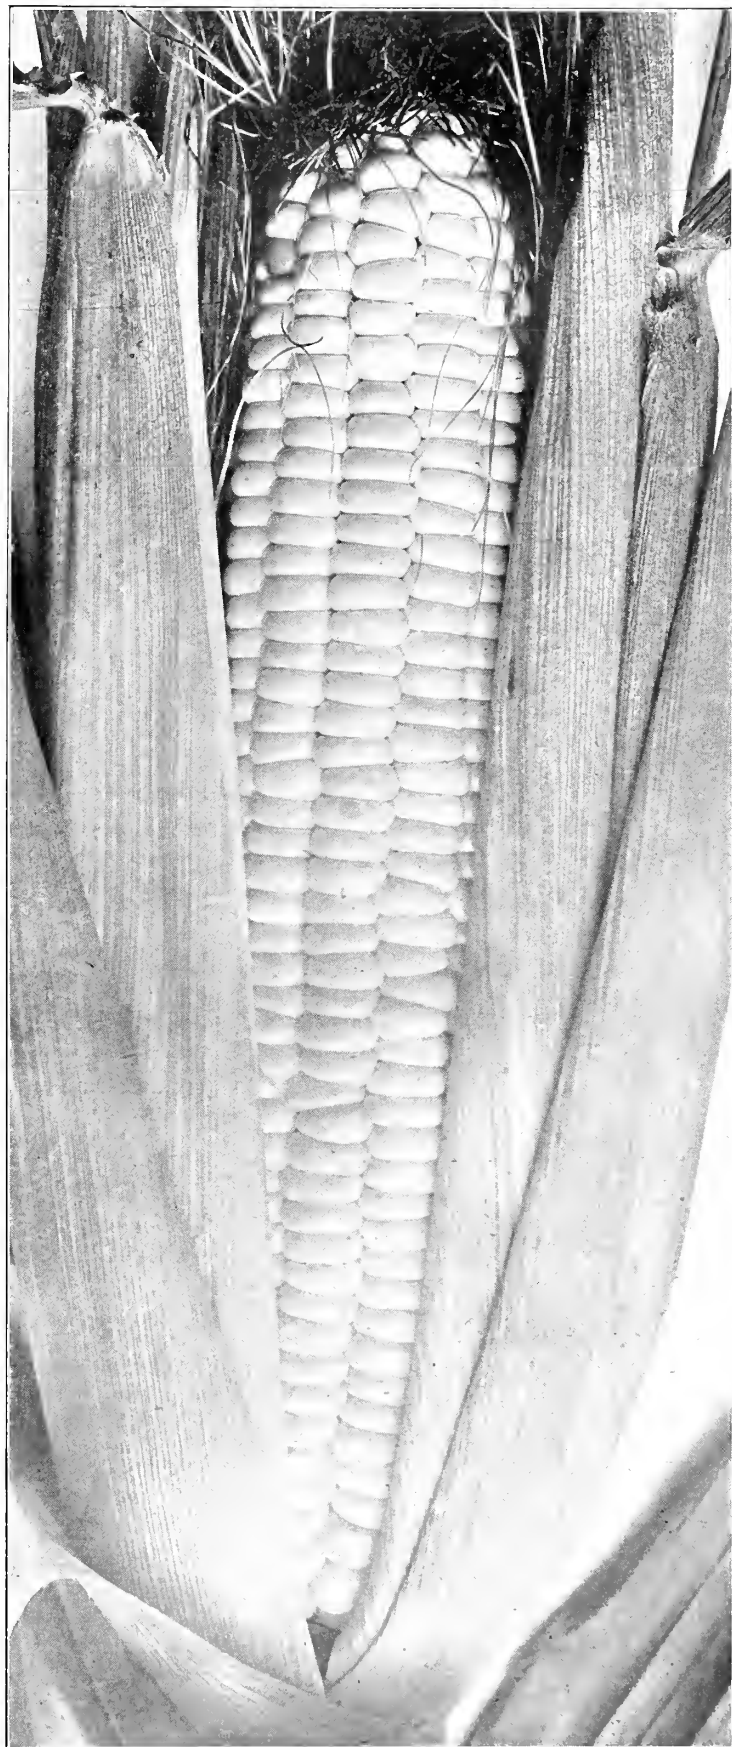

An old standard second early sweet corn of good size and excellent quality
.....Pkt., 10c; Lb., 35c

Stowell's Evergreen

A standard late variety of fine quality, very tender and sugary, and remaining a long time in edible condition. Ears seven to eight inches long, fourteen to twenty rowed, with very white grain
.....Pkt., 10c; Lb., 30c

Black Mexican

Although the ripe grain is bluish black, the corn when young cooks remarkably white, and is very tender and sweet. It is second early or late variety. The stalks grow tall. The ears are about eight inches long, and usually eight rowed
.....Pkt., 10c; Lb., 25c

Golden Bantam

Field Corn is listed on page 42.

CUCUMBERS

Cultural directions. Cucumbers require a warm, rich, sandy loam soil. For early cucumbers the plants may be started in boxes or pots in a hothed or in the house. They should not be set outdoors until there is a prospect of settled warm weather. Hills, about four feet apart each way, by mixing a generous amount of well rotted stable manure or commercial fertilizer with the soil. Plant eight to a dozen seeds, or the plants, in each hill. After all danger of insects is past thin the plants to three or four of the strongest in each hill. The fruit should be gathered when large enough, whether required for use or not.

DAVIS PERFECT

A very early, handsome and well shaped cucumber, bringing fancy prices in the market, and often mistaken for hot-house grown. The long, even fruits are of fine form, with an intensely dark, rich green skin. It has very few seeds, and the solid white flesh is of the finest quality.....
.....Packet, 10c; Ounce, 20c; postpaid

Long Green

Vines vigorous and productive. The fruits are very long, often twelve to fifteen inches when mature, slender and of beautiful dark green color. Excellent for both slicing and picklesPacket, 10c; Ounce, 20c; postpaid

White Spine

One of the best for table use. The vines are vigorous, fruiting early and abundantly. The fruits are dark green, about seven inches long when mature, and the flesh is crisp, tender and of excellent quality.....Pkt., 10c; Oz., 20c; postpaid

Early Frame, or Short Green

An early, medium sized, bright green variety, popular for both pickles and slicing.....Pkt., 10c; Oz., 20c; postpaid

CRESS

Curled, or Pepper Grass

Finely cut and ornamental crisp, pungent leaves, used as a condiment and for garnishing.....
.....Pkt., 10c; Oz., 20c; postpaid

Water Cress

Must be grown along moist banks or in tubs in water covered soil. Highly esteemed for salads and garnishing.....
.....Pkt., 10c; Oz., 75c; postpaid

HERB SEEDS

No garden is complete without at least a part of the following herbs for flavoring, garnishing, etc.:

Anise	Lavender
Balm	Marjoram,
Basil	Sweet
Caraway	Peppermint
Catnip	Sage
Coriander	Summer Sav-
Dill	ory
Horehound	Thyme

Each, Pkt., 10c, postpaid

EGG PLANT

Egg Plant requires about the same culture as Tomatoes. They are becoming more popular each year in this section, and should be more extensively grown.

New York Improved

Large; purple; one of the finest varieties. Does well in this localityPkt., 10c

KOHL RABI

Excellent for soups, also as a boiling vegetable. The culture is the same as for cabbage.

Early White Vienna

The most popular sort. Very early; medium size; nearly whitePkt., 10c; Oz., 30c

Early Purple Vienna

A little larger than the white; tinged with purple....
.....Pkt., 10c; Oz., 30c

Boston Pickling

A very productive variety extensively grown for pickles. The fruits are of medium, bright green, smooth and symmetricalPacket, 10c; Ounce, 20c; postpaid

Cool and Crisp

An early and prolific strain of the White Spine class. It is long, tapering at each end, and the color is dark green. Fine for slicingPacket, 10c; Ounce, 20c; postpaid

Lemon Cucumber

The vines produce prolifically dainty little cucumbers resembling lemons in both form and color and having a delicious and distinctive flavorPacket, 10c; Ounce, 20c; postpaid

Japanese Climbing Cucumbers

Fruit very long and slender; the skin smooth and dark green; flesh pure white, crisp and of mild flavor. The vines should be trained over a trellis.....Pkt., 10c; Oz., 20c; postpaid

Gherkin

A very small, oval, prickly fruited sort quite distinct from all others, and grown exclusively for pickles.....
.....Pkt., 10c; Oz., 20c; postpaid

ENDIVE

A fine salad for winter use, generally sown late in fall, in drills eighteen inches apart, and thinned to one foot apart.

Broad Leaved Batavian (Escarolle)

Has broad, twisted leaves. The inner leaves form a head which blanches beautifully and is crisp and tender.....
.....Pkt., 10c; Oz., 20c

White Curled

Very light yellowish green leaves; crisp and tender....
.....Pkt., 10c; Oz., 20c

Green Curled

The hardiest variety. Blanches creamy white. Long standing
Pkt., 10c; Oz., 20c; postpaid

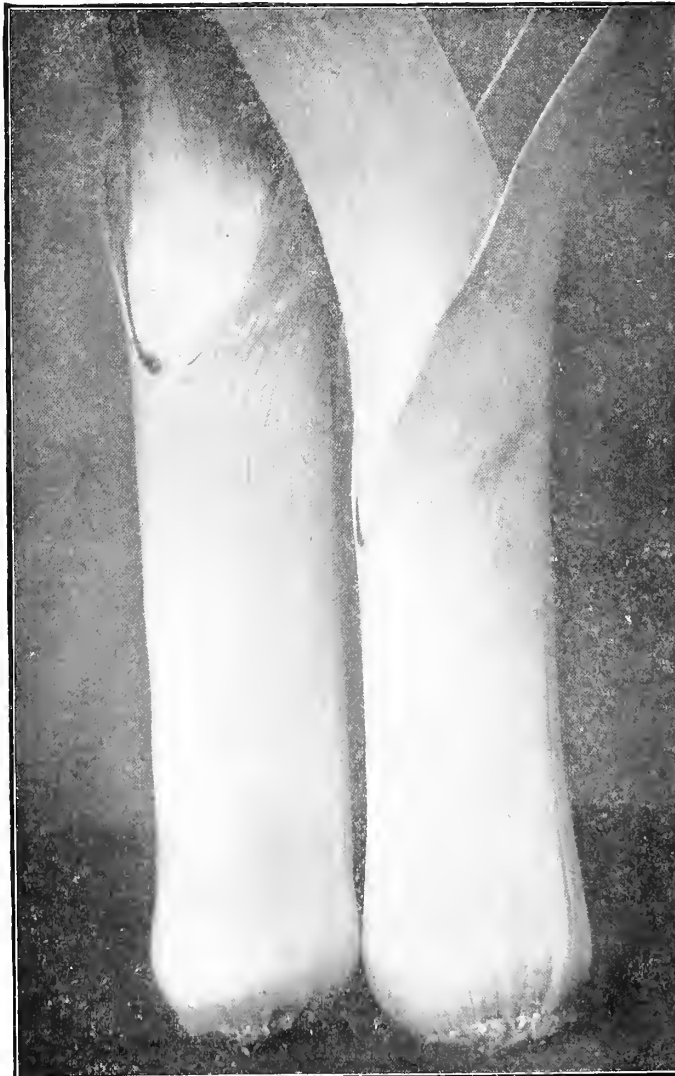

LEEK

Belongs to the Onion family and is a good fall and winter substitute for green onions. The leaves are flat and the stem very large. They do not produce bulbs like onions. The stems are blanched in fall by banking earth up against them.

Sow the seed in spring in drills twelve to fifteen inches apart. Thin to six inches apart in rows.

Large American Flag

The most popular variety; strong growing, broad leaved, hardy and productive. The stems are very large, thick, and of sweet flavor when properly blanched. A favorite with market gardeners, and extensively grown for home use
Pkt., 10c; Oz., 30c; postpaid

Large American Flag Leek

KALE

Cultural directions. For late fall or early winter use, sow the seed in seed bed early in June and transplant like cabbage in July. If for spring use sow seed of the hardy varieties in August and transplant a month later.

KELWAY'S SPONGE

A distinct and very superior variety of kale; dwarf, low-growing, very compact, with a head somewhat resembling a cabbage. The flavor is excellent, and it is a splendid winter vegetable for greens. Our seed is imported direct from Kelways.....Packet, 15c; Ounce, 50c; postpaid

EMERALD ISLE

The handsomest and one of the best strains of green curled kale. Of medium height, beautifully fringed and curled, and of a rich green color. Sufficiently hardy to withstand any weather on the Pacific Coast.....

.....Packet, 10c; Oz., 30c; Lb., \$2.00; postpaid

Dwarf Moss Curled

Of medium height with beautiful green leaves so closely curled as to resemble parsleyPkt., 10c; Oz., 30c; Lb., \$2.00; postpaid

Dwarf Green Curled

Bright green leaves, finely curled; dwarf and very hardy.....Pkt., 10c; Oz., 30c; Lb., \$2.00; postpaid

Tall Green Curled Scotch

Grows about three feet high with long plume-like light green leaves deeply cut and finely curled at the edges. Very hardy.....

.....Pkt., 10c; Oz., 30c; Lb., \$2.00; postpaid

Thousand Headed Kale is listed in Farm Seeds Section.

LETTUCE

Cultural directions. Thrives in ordinary rich garden soil. Sow the seed very early in spring in rows twelve to sixteen inches apart. Thin the plants to four inches apart, and as they begin to crowd each other further thin by using alternate plants. Seed may be sown in fall and the plants wintered over in cold frames. To be crisp and tender it should be grown quickly.

Kelway's Silver Cos Lettuce

KELWAY'S SILVER COS LETTUCE

The Cos or Romaine lettuce deserves to be more generally grown for home use, for it is unequalled in crispness, tenderness, and has a flavor distinct from any other. The long, narrow, spoon-shaped leaves are folded into loose, sugar-loaf shaped heads, which are blanched by tying the outer leaves about themPacket, 15c; Ounce, 40c; postpaid

NEW YORK, OR WONDERFUL

This has recently become the most popular head lettuce, and deservedly so. It is extremely large, and is a sure header under all ordinary conditions. It thrives in all climates and seasons and is unequalled for growing during the summer months. The heads are fairly solid, blanch creamy white, and are crisp, tender and delicious.....Packet, 10c; Oz., 30c; postpaid

May King

An extremely early variety forming solid little heads, the inner leaves of which blanch rich golden yellow; very tender and butteryPkt., 10c; Oz., 15c; postpaid

Big Boston

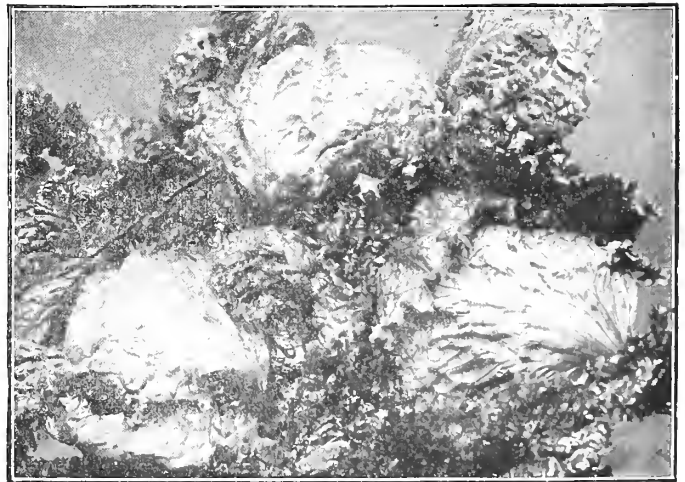

Very popular with market gardeners, both for forcing and outdoor culture. Heads very large.....Pkt., 10c; Oz., 20c; postpaid

Black Seeded Simpson, or Tennisball

Extremely early, small, solid heads, popular for forcing and early planting outdoors; inner leaves creamy white, crisp, tender and butteryPkt., 10c; Oz., 15c; postpaid

Deacon, or San Francisco Market

An excellent summer variety. Heads of large size, very firm, and remains in condition for use a long time. Inner leaves are rich yellow and crisp.....Pkt., 10c; Oz., 20c; postpaid

New York, or Wonderful Lettuce

Prizehead

An old favorite non-heading variety. The leaves are bright green tinged with red at the edges; curled, crisp, tender and sweet. Not a good shipper, but fine for the home gardenPkt., 10c; Oz., 15c; postpaid

Crisp as Ice

A very large, crisp, non-heading lettuce, tender and of fine flavor. The leaves are light green slightly tinged with brown. Stands hot weather remarkably wellPkt., 10c; Oz., 20c; postpaid

Continued on next page.

(Lettuce continued.)

Improved Hanson Head

This has long been a favorite late summer head lettuce. The plant is compact and forms a large cabbage-like head which remains in condition longer than most heading sorts. The outer leaves are bright yellowish green, broad, crumpled and frilled. The head is tight, and the inner leaves are curled, white, crisp and sweet.....

Pkt., 10c; Oz., 20c; postpaid

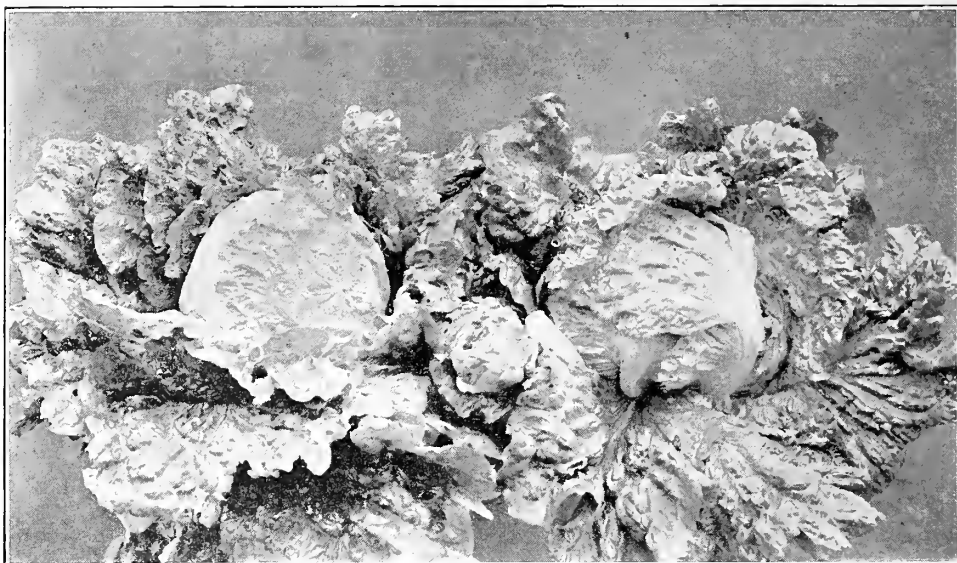

Grand Rapids

A favorite green-house forcing variety, quick growing, hardy and not liable to rot. The plant forms a loose cluster of large, thin, bright green leaves, savoyed and finely crimped at the edges. Very attractive.....

Pkt., 10c; Oz., 15c; postpaid

Iceberg

A light green, brown tinged, curled, non-heading lettuce; large, crisp, tender, and fine for home or marketPkt., 10c; Oz., 20c; postpaid

Improved Hanson Head Lettuce

MUSKMELON

Cultural directions. To grow Muskmelons successfully on the Pacific Coast all conditions must be as favorable as possible. The soil should be rich, light and warm, and a generous amount of well rotted stable manure or commercial fertilizer should be mixed with the soil in each hill. Plants may be started in boxes or pots in the house or hotbed, or seed may be planted the same as cucumbers when weather is settled and warm.

ROCKY FORD, OR NETTED GEM

This is by far the most popular cantaloupe grown, and is unequalled in quality and flavor. The fruit is of medium size oval, slightly ribbed and finely netted. The flesh is green, thick, very sweet, and of the finest flavor.....

Pkt., 10c; Oz., 15c; Lb., \$1.25; postpaid

Large Yellow Canteloupe

A large, early, and very productive yellow fleshed melon. The flesh is salmon-yellow, rich and sweet.....

Pkt., 10c; Oz., 15c; Lb., \$1.25; postpaid

Extra Early Hackensack

A popular large sized, green fleshed melon; nearly round, deeply ribbed, with very coarse netting over a green skin slightly tinged with yellow. The flesh is green, rather coarse, but juicy and sweet.....

Burrell's Gem

A fine orange-yellow fleshed muskmelon. Medium size, oval with prominent ribs and a tough, thin skin, making it a good shipper. The flesh is very thick, fine grained and of a pleasing spicy flavor.....

Pkt., 10c; Oz., 15c; Lb., \$1.25; postpaid

WATERMELON

Cultural directions. The Watermelon is another long season crop, and is not very successful west of the Cascade Mountains. The plants may be started in the house or hotbed, the same as Muskmelons, and the culture is the same except that they require more room. They are grown successfully east of the mountains.

TOM WATSON

A large, long melon, similar in shape, color and quality to Kleckley Sweets, but larger and with a tougher skin, making it a better shipper. The vines are vigorous and productive. The flesh is rich red, sweet and tender. The seeds are white marked with brown.....

Pkt., 10c; Oz., 15c; Lb., \$1.25; postpaid

Sweetheart

Fruit large, heavy, oval, mottled dark and light green; rind thin but firm; flesh bright red, solid, tender and sweet. A good shipper.....

Pkt., 10c; Oz., 20c; Lb., \$1.25; postpaid

Kleckley Sweets, or Monte Cristo

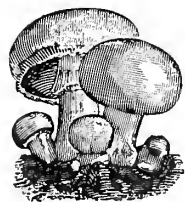

This splendid melon is unequalled for home use or near by markets, but the skin is so thin that it is not a good shipper. The fruits are of medium size, oblong, and dark green in color. The flesh is bright, rich red, exceedingly sweet, and so crisp and tender that it will not stand shipping. Seed white.....

Pkt., 10c; Oz., 15c; Lb., \$1.25; postpaid

Halbert Honey

Crisp, firm and heavy fleshed, well ripened to a very thin rind; very sweet.....

Pkt., 10c; Oz., 20c; Lb., \$1.25; postpaid

MUSHROOM SPAWN

Cultural directions. Mushrooms may be grown in a cellar, shed, or any place where a uniform temperature of fifty to seventy degrees can be maintained. Prepare a bed by mixing about three parts fresh horse manure with one part rich loam soil. Allow this to stand for a few days until it becomes heated, then fork it over and let it stand until it again becomes heated. Then make into a bed about four feet wide, any desired length, and twelve to eighteen inches deep, packed down firmly. In a few days the temperature will rise; do not spawn the bed until it has subsided to about ninety degrees. Cut a brick of spawn into about twelve pieces and insert the pieces in the bed about ten inches apart each way, one to two inches below the surface. Firm the bed down and cover with two inches of loam. Do not water the bed unless it becomes dry, then moisten with a fine spray. Mushrooms should be ready to use in six to eight weeks, and last about thirty days. After the first crop is removed, spread an inch of loam over the bed, and moisten with water.

American Pure Culture Mushroom Spawn

By a new process of selection and grafting, this spawn is scientifically propagated so that large, vigorous and finely flavored mushrooms are reproduced. The standard and best.....1 brick (about 1¼ lb.), 35c; 3 bricks, \$1.00; postage additional

MAG-O-TITE
IS A
GUARANTEED
REMEDY FOR
ROOT MAGGOT

ONION

Cultural directions. Onions require a very rich soil in a perfect state of cultivation. Sow the seed thinly, one-half inch deep, in rows eighteen inches apart. Thin the plants to two inches apart, and later thin to three to four inches. Cultivate frequently and thoroughly. Weeds in the rows must be removed by hand. One ounce of seed to one hundred feet of drill; three pounds per acre.

KELWAY'S VICTORIA CROSS

This is Kelway's new special, listed for the first time last season. It has never been grown in this country, and we believe that we are the first seedsmen to list this variety in this locality. We have only the growers' description, but Kelway recommended it to us as the best of his many fine varieties, and that is sufficient. It is described as "a new selection; the highest type of yellow onion; very large, and a long keeper".....
Pkt., 35c; Ounce, \$1.00; postpaid

AILSA CRAIG

An English introduction, one of the largest onions grown, often weighing two pounds. The skin is dark straw color; the flesh pure white, tender, and very mildPkt., 15c; Oz., 50c; lb., \$5.00; postpaid

Prizetaker

A popular variety; very large, globe shaped. It is a heavy yielder and good keeper, making it a good market variety. The skin is light yellow and the flesh white and mildPkt., 10c; Oz., 35c; Lb., \$3.25

Yellow Globe Danvers

The most generally grown main crop onion for both home and market. It is of medium size; the skin is yellow and the flesh is creamy white, mild and of excellent flavor. The bulbs are globe shaped, with small neck, and ripen evenly. It is a good keeper and excellent shipper.....
Pkt., 10c; Oz., 25c; Lb., \$2.75; postpaid

Oregon Yellow Danvers

Similar to Yellow Globe Danvers except that it is flattened. Very popular on the Pacific Coast on account of its size, hardness, productiveness and fine quality.....
Pkt., 10c; Oz., 35c; Lb., \$3.50; postpaid

Large Red Weathersfield

The most popular red onion. Very large, flattened, and of a purplish red color. The flesh is white and of good flavor; firm, and a good keeper and shipper.....
Pkt., 10c; Oz., 30c; Lb., \$3.00; postpaid

Southport White Globe

A very handsome, pure white, globular shaped onion of good size. The flesh is firm, fine grained and mild. It is much grown for green onions on account of the pure white color.....Pkt., 10c; Oz., 35c; Lb., \$3.50; postpaid

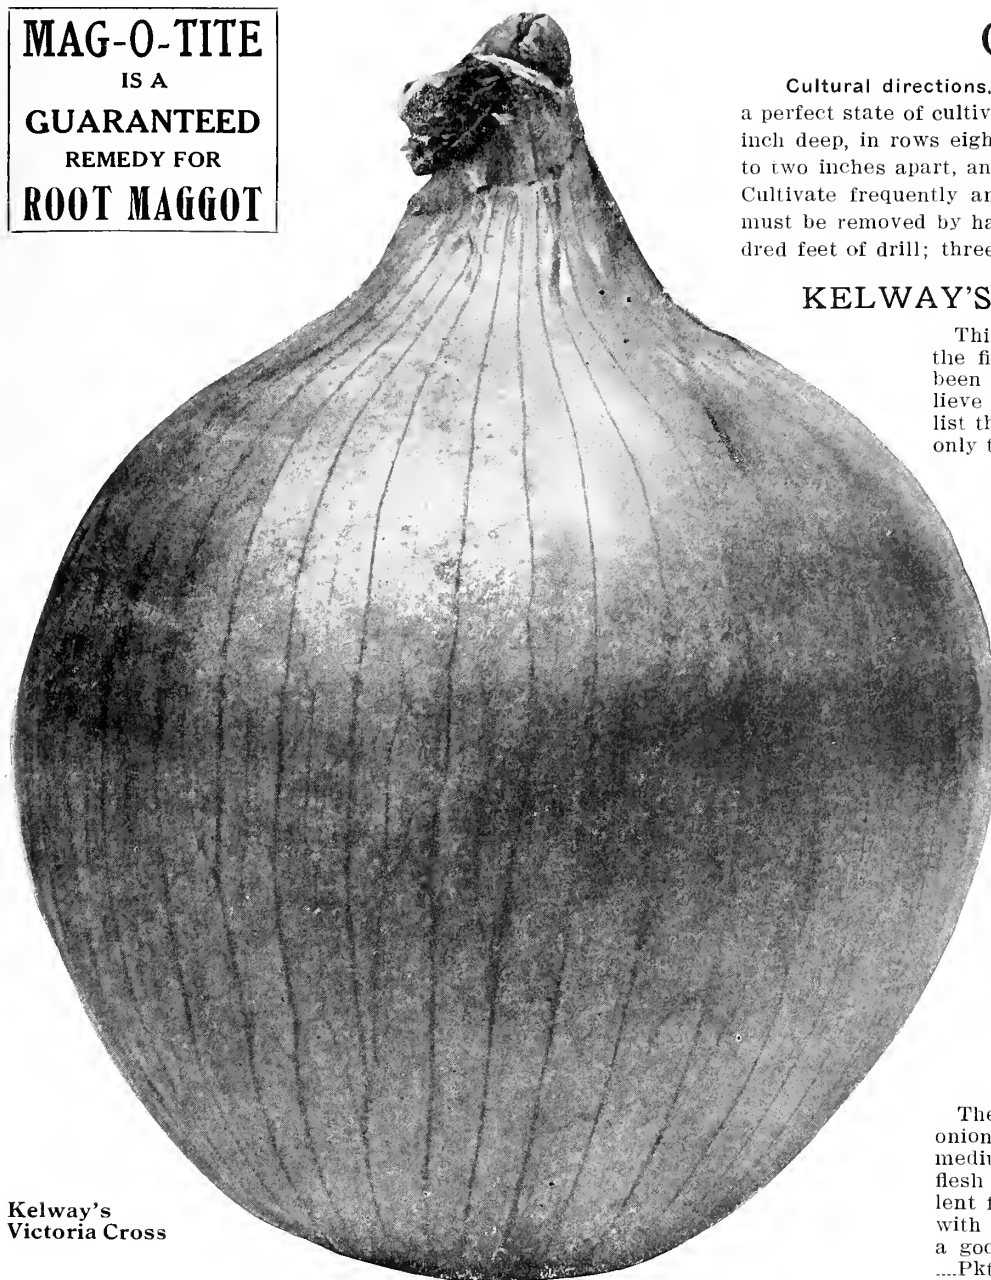

ONION SETS

Bottom Sets

Fine, small, uniform sets of Yellow Danvers and White Portugal varieties1 lb., 25c; 10 lbs., \$2.00; postage additional

Shallots

A variety of multiplier onion. Prolific yielder, and fine for pickling.....1 Lb., 35c; 10 Lbs., \$3.00; Postage additional

Kelway's
Victoria Cross

White Portugal

A standard medium early white onion. The bulb is flattened on the bottom; skin clear white; flesh firm and of mild flavor. It is a great favorite for both mature onions and green onions, also for white onion sets.....
Pkt., 10c; oz., 35c; lb., \$3.50; postpaid

Queen

The standard pickling onion. Very early, very small and pure white. The flesh is mild and of fine flavor. On account of being extremely early, it is also used for green onions.....
Pkt., 10c; oz., 50c; lb., \$5.00; postpaid

Australian Brown

An early and very hardy brown onion of medium size. Nearly round, with thick, rich brown skin, and a good keeper. Flesh white, crisp, solid, and of mild flavor.....
Pkt., 10c; oz., 30c; lb., \$2.50; postpaid

MUSTARD

The seed is used as a condiment and the green leaves are used as a salad or boiled for greens. Sow the seed early in spring, one-half inch deep, in drills eighteen inches apart. For succession sow at intervals of three or four weeks until fall.

Southern Giant Curled

Large, light green leaves, tinged with yellow, crimped and frilled at edges. Hardy and of good quality.....
.....Pkt., 10c; Oz., 15c; postpaid

White English

Comparatively small, dark green leaves, deeply cut. Mild and tender when young. Seed large and light yellow.....
.....Pkt., 10c; Oz., 15c; postpaid

PARSNIP

Cultural directions. Parsnips do well on any rich, deep, mellow garden soil. Fresh stable manure is apt to make the roots coarse and ill shaped. Sow the seed early in spring, one-half inch deep, in drills eighteen inches apart. Thin the plants to four to six inches apart. They are improved by frost, and in this locality are generally left in the ground until wanted for use. They are splendid stock food, and should be more generally used for that purpose. One ounce for two hundred feet of drill.

Hollow Crown

The most popular variety for both table and stock feeding. The roots are long, with smooth, white skin, uniform in shape, tender, and of the best quality.....
.....Pkt., 10c; Oz., 20c; Lb., \$1.25; postpaid

PEAS

Cultural directions. For early peas, sow very early in spring; they are sometimes sown in the fall. The seed should be sown one to two inches apart in rows two to three feet apart, and covered two to three inches deep, deeper when sown in fall. For succession, sow at intervals of about two weeks until the middle of June. The tall varieties must be supported by stakes, brush, or a trellis of some kind. One pound for fifty feet of drill.

KELWAY'S BEAUTY

Something new. One of Kelway's specials, and highly recommended to us by him. It is extremely early and very hardy, making it a good variety for fall planting. Grows about three feet high. Kelway describes it as follows:

"Of improved Gradus type, but much more prolific and so hardy that it can be sown much earlier and in more exposed localities than that variety. The dark green pods, borne in pairs, are larger, longer, and more even in size than Pilot, and contain fine deep green peas of excellent flavor. Distinct from either variety. It is undoubtedly the best early pea for market. Large, dimpled, round, marrowfat peas. Free from mildew."

Our seed is imported direct from Kelways.....
.....Packet, 35c; ½-Lb., 60c; Lb., \$1.00; postage additional

Alaska

A very early smooth, round, medium sized pea, maturing its crop all at one time, and for that reason a favorite with canners. Vines about two and one-half feet high.....
.....Pkt., 10c; ½-lb., 20c; Lb., 30c; postage additional

Blue Bantam

A new, early, dwarf pea bearing an abundance of long, deep green pods well filled with large, sweet, tender peas of good quality. Pkt., 10c; ½-Lb., 25c; Lb., 40c; postage additional

American Wonder

A very early, dwarf, wrinkled variety. The vines grow only about one foot high, and produce a good crop of well filled pods of medium size. The peas are large, sweet, tender and well flavored.....Pkt., 10c; ½-Lb., 25c; Lb., 40c; postage additional

OKRA, OR GUMBO

The young seed pods are used in soups, stews, catsups, etc. To grow it successfully in this locality, conditions must be of the best. After the ground is warm and in good condition, and danger of chilly weather is past, plant the seed one inch deep in rows thirty inches apart. When about three inches high, thin the plants to twelve inches apart in the rows.

White Velvet

The plants grow about three feet high, are early maturing, and very productive. The pods are white, long, smooth, and are tender until nearly full grown.....Pkt., 10c; oz., 15c; postpaid

Kelway's Beauty Pea

Dwarf Telephone

A popular late, dwarf pea, growing about two feet high, producing a good crop of good sized wrinkled peas of good quality.....Pkt., 10c; ½ lb., 20c; lb., 35c; postage additional

Little Gem

An old favorite dwarf wrinkled variety. Vines grow about eighteen inches high and are very productive. Peas medium size and of good quality. Medium early.
Price.....Pkt., 10c; ½ lb., 25c; lb., 40c; postage additional

Premium Gem

An improvement over Little Gem, earlier and larger. Bears a long time and stays tender longer than most peas.
Price.....Pkt., 10c; ½ lb., 25c; lb., 40c; postage additional

**KELWAY'S
LANGPORT PEA**

Improved Stratagem

One of the best of the large podded semi-dwarf main crop varieties. The vines are about two and one-half feet high. The pods are large and are uniformly filled with very large dark green peas of the finest quality.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c; postage additional

Nott's Excelsior

A very prolific early pea. Vines grow about fourteen inches high; pods about three inches long, well filled with medium size peas, green, wrinkled, sweet, and of excellent flavor.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c; postage additional

Cultural direction. West of the Cascade Mountains it is difficult to grow Peppers successfully, and they must be favored in every way possible. The culture is the same as for Tomatoes, except that they are more tender, require a longer season, and more hot weather.

Ruby King

Very large and attractive. The plants are about thirty inches high, vigorous, compact and productive. Fruits very large, deep green when young, bright red when ripe. Flesh thick and mild.....

Pkt., 10c; Oz., 75c; postpaid

KELWAY'S LANGPORT

This is another of Kelway's new specials, and Kelway's recommend is sufficient for all who know of that great seed house. They describe it as follows:

"This is a genuine novelty, the result of a successful pedigree cross between well known varieties, and gives us a wrinkled marrowfat superior to, and longer in the pod than the splendid pea Alderman, whilst it is about one foot to one and one-half foot dwarfer than that variety, and in season at the end of the second earlies. It is first rate in robustness, habit and colour, and a superb cropper. A stout grower, with a deep green pod four and one-half inches long, like a longer Alderman, some inclined to be curved, with nine to eleven large, sweet peas per pod. Pods are produced in pairs. Splendid for exhibition, a good cropper, four and one-half feet high. Guaranteed perfectly distinct, and very highly recommended for garden, market, or exhibition."

Our seed was grown by Kelways and imported by us direct.....Packet, 35c; ½-Lb., 60c; Lb., \$1.00; postage additional.

Alderman

A splendid early main crop pea of the Telephone type. The vines are tall growing, five to six feet, vigorous and very productive. The pods are of large size and well filled. The peas are very large and unsurpassed in quality.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c

Gradus

One of the very best early, wrinkled peas. The vines grow about three feet high, are hardy, vigorous and very productive. The peas are large, very sweet, and of the finest flavor. Stays tender a long time. The most generally grown of the early peas, and quite equal to Telephone in quality.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c

Thomas Laxton

Very much like Gradus in every way except the shape of the pod. One of the best early peas.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c

Tall Telephone

The standard late variety with market gardeners. The vines grow five to six feet high, and produce immense crops of very large pods filled with large, sweet, tender peas of fine quality.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c

Lincoln

An excellent dwarf main crop variety growing about two feet high. The pods are of medium size, and are filled with good sized wrinkled peas, very sweet and of good quality.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c; postage additional

Yorkshire Hero

Second early. Two and one-half feet high. Pods three inches long. Peas of good quality.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c

Dwarf Sugar, Edible Pod

Dwarf plant. Edible pods.....

Pkt., 10c; ½-Lb., 25c; Lb., 40c

PEPPER

Large Bell, or Bull Nose

Plants vigorous, about two feet high, compact and productive. Fruits large, with thick, mild flesh of excellent quality. Deep green when young, bright crimson when ripe.....

Pkt., 10c; Oz., 75c; postpaid

Long Red Cayenne

Medium early, with a slender, twisted, pointed pod about four inches long, deep green when young, bright red when ripe.....

Pkt., 10c; Oz., 75c; postpaid

PARSLEY

Cultural directions. Sow the seed early in spring, not more than one-half inch deep, in rows twelve to sixteen inches apart. The seed germinates very slowly, often requiring three to four weeks. It is well to sow radish seed with the parsley to mark the rows for the purpose of cultivation.

KELWAY'S CRESTED GEM

Kelway describes this variety as follows:

"One of our most popular specialties. It is the most lovely plant for garnishing that it is possible to conceive. The dwarf, compact habit of the plant and the fineness of the closely cut foliage are unsurpassable; it should be grown for table decoration. A kind that has been fixed by annual selection at Langport for two generations."

Our seed is imported direct from Kelways.....

.....Packet, 25c; Ounce, 50c; postpaid

Champion Moss Curled

A very attractive and popular variety. The plant is vigorous, compact, handsome, and excellent for garnishing and flavoring. The leaves are very finely cut and so closely curled as to resemble bunches of moss.....Pkt., 10c; Oz., 20c; postpaid

Turnip Rooted

The roots, resembling small parsnips, are the edible portion of this variety, and are esteemed for flavoring soups, stews, etc.Pkt., 10c; Oz., 20c; postpaid

Plain Parsley

The leaves are flat, deeply cut, but not curled. It is used for flavoring soups, stews, and for drying, and is a favorite on account of its dark green color.....Pkt., 10c; Oz., 15c

PUMPKIN

Cultural directions. The seed should not be sown until the ground is thoroughly warm and weather is settled late in spring. For garden culture, the small varieties may be planted in hills six to eight feet apart each way. The large varieties require more room. One ounce for twenty-five hills; three pounds per acre.

Sugar, or Sweet Pie

The pumpkins are small, but very sweet, fine grained and of the best quality. Unequalled for making pies.....

.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Connecticut Field

The popular large, yellow variety. Very vigorous and productive.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Mammoth Tours

A very large French variety, often weighing more than a hundred pounds.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

Cushaw

A favorite variety for pies. The flesh is very fine grained and sweet.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

RADISH

Cultural Directions. Radishes thrive best on a rich, light soil, and should be grown quickly to make them crisp and tender. Sow the seed very early in spring in drills twelve to sixteen inches apart, and thin the plants to about two inches apart. For succession, sow at intervals of two or three weeks. Seed for winter radishes should be sown in August or the first of September. Many have quit growing radishes on account of the ravages of root maggots. This pest can be eliminated by the use of Mag-o-tite.

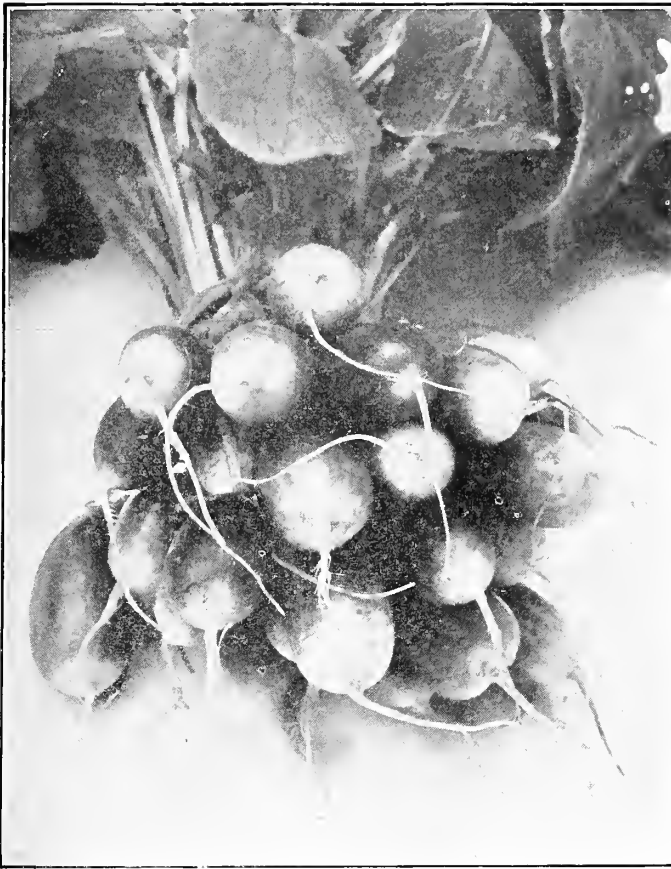

ICICLE

The finest long white radish. Medium early; of a beautiful transparent white color; very crisp and brittle, and remains tender for a long time.....Pkt., 10c; oz., 20c; postpaid

CRIMSON GIANT

A splendid early round, red radish, very early and growing twice the size of other early varieties without becoming pithy or tough. Equally good for forcing or early or main crop outdoors.....Pkt., 10c; oz., 20c; postpaid

If you have quit growing radishes on account of the root maggots, try again this year, using Mag-o-tite. It is guaranteed.

Kelway's Red Cap Radish

Long Scarlet Short Top

A standard variety for both home and market. The tops are small. The roots are smooth, slender, grow about one-third out of the ground, and continue crisp and tender until matured.....Pkt., 10c; Oz., 20c; postpaid

Sakurajima

The mammoth radish of Japan, the largest in cultivation, often weighing twenty to thirty pounds. The flesh is very solid, firm and brittle. Can be eaten raw or cooked as a vegetable. Can be transplanted or left where the seed is sown. If sown in the fall it will reach maturity the following summer; if sown in spring it will mature for winter use.....Pkt., 15c; Oz., 25c; postpaid

China Rose Winter Radish

A winter radish growing four to five inches long, one and one-half inches in diameter, and largest at the bottom. The skin is bright rose color. The flesh is white, firm, crisp and tender.....Pkt., 10c; Oz., 20c; postpaid

Round Black Spanish

The roots are round or top shaped, three or four inches in diameter. The skin is black. The flesh is white, very solid, decidedly pungent, but well flavored. It keeps well through the winter.....Pkt., 10c; Oz., 20c; postpaid

Long Black Spanish

One of the latest and hardiest of winter radishes. The roots grow seven to nine inches long and two to three inches in diameter, and are almost black. The flesh is white, firm, pungent and of good flavor.....Pkt., 10c; Oz., 20c; postpaid

**KELWAY'S
RED CAP RADISH**

One of Kelways new specials, and for that reason we do not hesitate to recommend it. It is a very early radish, of the turnip-shaped type, bright red with an attractive white tip. It is equally good for forcing or early outdoor culture. Very tender and crisp and of fine flavor. Our seed was grown by Kelways.....Packet, 20c; Ounce, 35c; postpaid

Early Scarlet Turnip Radish

A small, early, red, round radish, popular with market gardeners for early planting outdoors.....Pkt., 10c; Oz., 20c; postpaid

Early Scarlet Turnip White Tipped

Very early, and a great favorite for forcing and early outdoor culture. The color is a beautiful bright scarlet with the lower quarter white. Very attractive and of good quality.....Pkt., 10c; Oz., 20c; postpaid

Early White Turnip Radish

An early, white, turnip-shaped radish, similar to Early Scarlet Turnip except in color.....Pkt., 10c; Oz., 20c; postpaid

French Breakfast

A quick growing, small, olive-shaped radish. The color is red with a white tip. A favorite for the home garden, also for forcing under glass.....Pkt., 10c; Oz., 20c; postpaid

Triumph

A small, round radish, unique and attractive in color, bright red with distinct white stripes.....Pkt., 10c; Oz., 25c; postpaid

Early Long Scarlet, White Tip

An excellent early, long radish, bright scarlet with a white tip, very attractive; smooth, crisp, and of good quality. Small top. Good for forcing or outdoor culture.....Pkt., 10c; Oz., 20c; postpaid

Long Brightest Scarlet, White Tip

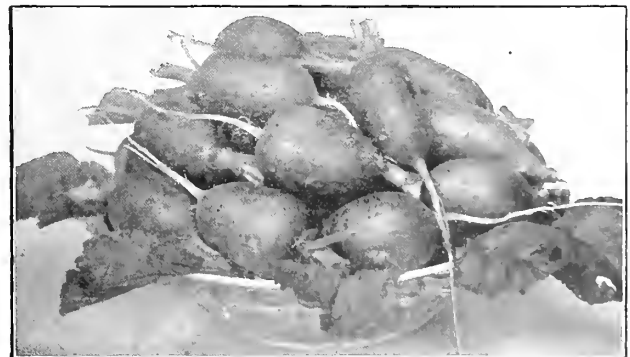

The brightest and handsomest of scarlet radishes. It is very early, and is used for either garden culture or forcing. Has a pure white tip. Remains in good condition until fully grown.....Pkt., 10c; Oz., 20c; postpaid

Improved Chartier

A splendid radish for either home or market for summer use. The roots are long and tapering, averaging, when mature, seven or eight inches in length and one and one-quarter inch in diameter. The color is bright scarlet-rose showing to white at the tip.....Pkt., 10c; Oz., 20c; postpaid

California Mammoth White China

A very large winter radish, sometimes growing to eighteen inches long. Pure white; very solid, crisp and tender. Keeps well through the winter.....Pkt., 10c; oz., 20c; postpaid

FRED HALL POULTRY FARM
R. F. D. 8, Box 290, Seattle, Wash.

Randall-McLoughlin,
Seattle.

Dear Sirs:

I want to tell you of the results that I have had with the use of your Magotite. There is no doubt that it is a sure remedy for the root maggot. I planted kale, radishes and cabbages year after year, but the root maggots used to get them. This season, after using the Magotite, I have raised three acres of the finest poultry kale that I have ever seen, and the radishes are looking fine. I am more than pleased with Magotite, and shall be a booster for this excellent remedy whenever I get an opportunity.

Yours very truly,

FRED C. HALL

July 16, 1919

RHUBARB

Cultural directions. Rhubarb does best in a heavy, very rich, deep soil. Sow seed an inch deep in drills. Thin the plants to six inches apart. In the fall transplant four to six feet apart each way in highly manured, deeply stirred soil. The stalks should not be plucked until the second year.

Mammoth Victoria

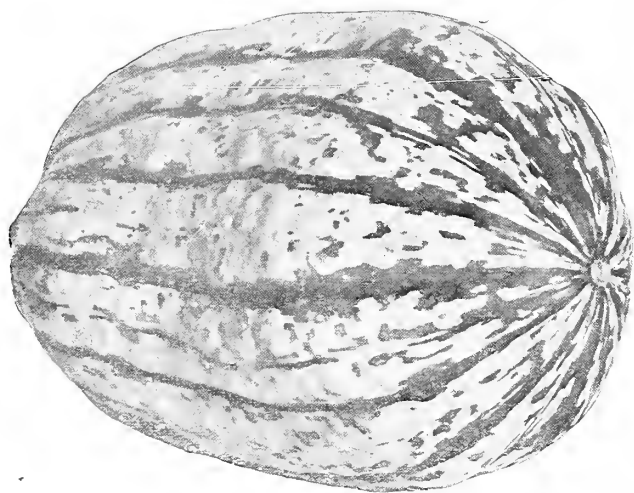

A favorite standard variety, very large, thick, red stalks of the finest quality.....Pkt., 10c; Oz., 15c; postpaid

SALSIFY, OR, OYSTER PLANT

Cultural directions. Culture is the same as for parsnips. It is very hardy, and may be left in the ground all winter, but should be dug early in spring.

Mammoth Sandwich Island

A very desirable winter vegetable, and should be more generally grown. The roots when cooked are very palatable and nutritious, and have a flavor similar to oysters. This is the most popular variety. The roots are long, smooth and white.....Pkt., 10c; Oz., 30c; postpaid

Delicata

A medium sized fall and winter vine variety. It is a hybrid, and the color and shape varies somewhat, but it is uniformly of fine quality, and is a great favorite for the home garden.....Pkt., 10c; Oz., 20; Lb., \$1.75; postpaid

HUBBARD

The old favorite, and considered the finest of all winter squashes. Vines vigorous and productive. The fruits are large, with very hard, warted, dark green shell. The flesh is orange-yellow, fine grained, thick, dry and of very rich flavor. Can be kept in good condition until spring.....Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

Golden Hubbard

Similar to Hubbard in shape, but earlier, not so large, and the color is rich orange-red. The flesh is deep orange and of good quality.....Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

Long White Vegetable Marrow

The Marrow Squashes are largely grown in England, and should be more generally used in this country. They are at their best when about half grown. They may be cooked like other squash, or may be fried, in which manner they are superior to Egg Plant.....Pkt., 10c; Oz., 15c; Lb., \$1.50; postpaid

SWISS CHARD, SPINACH BEET, OR SEA KALE BEET

Cultural directions. Swiss Chard is a variety of beet, the edible portion of which is the leaves, which are served like spinach or the midribs are prepared like asparagus. The seed is sown early in spring the same as beets. The tops are cut off a little above the surface of the ground, and will sprout up again.

Mammoth Victoria Rhubarb

SQUASH

Cultural directions. Do not sow until the weather is settled and warm. Prepare the hills by mixing with the soil a generous amount of well rotted stable manure or commercial fertilizer. For the bush varieties make hills three to four feet apart each way; for the vine varieties, eight to ten feet apart. Eight or ten seeds should be sown in each hill, thinning the plants to two or three of the strongest. One ounce of seed for fifty hills; four pounds per acre.

Yellow Summer Crookneck

The well known standard, early, vine variety, producing bright yellow, densely warted squashes about one foot long with a crooked neck.....Pkt., 10c; Oz., 15c; Lb., \$1.35; postpaid

Mammoth White Bush Scallop

An early bush variety of large size, flattened, with edges scalloped. The color is creamy white. Vines vigorous and productive.....Pkt., 10c; Oz., 15c; Lb., \$1.35; postpaid

Boston Marrow

A very productive fall and winter variety of medium to large size. The fruits are oval in shape, bright orange color. The flesh is salmon-yellow, fine grained and of excellent flavor.....Pkt., 10c; Oz., 15c; Lb., \$1.35; postpaid

Sibley, or Pike's Peak

A very large winter squash. Thin skinned, very solid, and a good shipper, skin pale green, flesh deep orange; fine grained and of good flavor.....Pkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

KELWAY'S LONG GREEN VEGETABLE MARROW

A splendid bush variety of English Vegetable Marrow, highly recommended by Kelways, from whom we procured our seed. The fruits are long and slim with green striped skin, and the flesh is of the finest quality. This delicious vegetable was almost unknown in this country until recently, but is rapidly becoming popular.....Pkt., 15c; Oz., 35c; Lb., \$2.00; postpaid

Giant Lucullus

The largest and best variety of Swiss Chard. The leaves are large, broad, undulated, and of an attractive yellowish green color, with large, white midribsPkt., 10c; Oz., 20c; Lb., \$1.50; postpaid

TOMATO

Cultural directions. Plants should be started in a hotbed or in boxes or pots in the house in February or early March, and should not be set outdoors until the weather is settled and warm. If they are to be pruned, they may be set two feet apart in rows three to four feet apart, otherwise they should be set about four feet apart each way. All conditions must be of the very best to grow tomatoes successfully west of the Cascade Mountains.

SPARK'S EARLIANA

Extremely early, and the standard tomato in the Northwest. The vines are small but vigorous and productive. The fruits are of good size, nearly round, and smoother than other early varieties. They are borne in clusters near the base of the plant. Pkt., 10c; Oz., 40c; postpaid

John Baer

A new variety, largest of the extra early sorts. The fruits are nearly round, smooth, firm, and of fine quality. The vines are very hardy and exceptionally productive. Pkt., 10c; Oz., 50c

Golden Queen

The fruits are golden yellow color, large smooth, and of very fine flavor. Pkt., 10c; Oz., 50c

Dwarf Champion

The vines grow only about two feet high, are vigorous, upright and compact. It is a second early or main crop variety. The fruits are purplish pink, of medium size, smooth and of good quality. Pkt., 10c; Oz., 40c

Early Michigan

A second early, bright red tomato of fine quality. Vines vigorous and productive. Fruits are of medium size, smooth, and very attractive. Pkt., 10c; Oz., 40c

Acme

Vines large, hardy and productive, ripening first fruits early and continuing for a long time. A good variety for the home garden. Fruits purplish pink, round, smooth and of medium size. Pkt., 10c; Oz., 40c

Atlantic Prize

One of the old well known varieties. Early, of good size, smooth, bright red, and of good quality. Pkt., 10c; Oz., 40c

Tomato Plants are listed on page 21.

Chalk's Early Jewel

One of the best early tomatoes. The vines are vigorous and very productive. The fruits are large, nearly round, somewhat flattened, bright scarlet, and of fine quality. They ripen early and continue through a long season. A favorite for the home garden. Pkt., 10c; Oz., 45c; postpaid

New Stone

A fine, large, main crop or late tomato. Vines large, vigorous and very productive. The fruits are deep scarlet, oval, exceptionally smooth and uniform in size. Very solid and firm, a good shipper and a favorite with canners. Pkt., 10c; Oz., 40c

Ponderosa

A very large late tomato of fine quality. The color is purplish pink. The fruits are very solid, smooth, and have exceptionally few seeds. The vines are vigorous and very productive. Pkt., 10c; Oz., 45c

Yellow Pear

Used for preserves and to make tomato figs. The fruits are very small, distinctly pear shaped, and the color is rich yellow. Pkt., 10c; Oz., 55c

Yellow Cherry

The fruits are less than three-quarters of an inch in diameter, perfectly round and smooth, and of a bright yellow color. Fine for preserves and pickles. Pkt., 10c; Oz., 55c

Ground Cherry, or Husk Tomato

The vines are low and spreading; the fruits only about one-half inch in diameter and enclosed in a loose husk. Very sweet, of mild flavor, and used for preserving. Pkt., 10c; Oz., 40c

Use

Spark's Earliana

INVICTA FERTILIZER

SPINACH

Cultural directions. Sow the seed early in fall or very early in spring in drills sixteen to twenty inches apart, and thin the plants to about six inches apart. The soil should be very rich. Plants should be ready for eating in about eight weeks.

VICTORIA

The most popular variety, forming very large, thick, dark green leaves, slightly crumpled in the center. Becomes fit for use early and remains in that condition longer than most sorts. Oz., 10c; Lb., \$1.00; postpaid

Savoy Leaved Bloomsdale

An early, hardy variety, with large, crumpled, dark green leaves. A standard market spinach. Oz., 10c; Lb., \$1.00; postpaid

Longstanding

A late spinach, remaining a long time in condition for use. The plant is very large, with large, smooth, dark green leaves. Oz., 10c; Lb., 85c; postpaid

New Zealand

Quite different from other varieties, it thrives during hot weather in summer. The plant is large; the leaves small, broad and pointed. Pkt., 15c; Oz., 25c; Lb., \$1.50; postpaid

Thick Leaved Improved

A rapid growing variety, forming large, thick, slightly crumpled, deep green leaves of good quality. Oz., 10c; Lb., \$1.00; postpaid

Prickley Winter

A late variety, usually sown in fall for winter use. Very hardy and long standing. Leaves of medium size, thick, and dark green. Oz., 10c; Lb., \$1.00; postpaid

TURNIP

Cultural directions. For summer use, sow the seed early in spring in rows eighteen to twenty-four inches apart. For winter use it may be sown as late as the first of September. During recent years the root maggot has raised such havoc that many have stopped growing turnips and rutabagas, but now these may be easily overcome by using Mag-o-tite.

KELWAY'S QUICKSILVER

A new variety, not grown in this country before. It is Kelway's special, and for that reason we take it for granted that it must be good. Kelway describes it as follows:

"The quickest growing round white turnip, fine for exhibition; stands winter well when sown late; round, white skinned, with solid white flesh; perfect shape."

Pkt., 20c; Oz., 40c; Lb., \$3.00; postpaid

Early Snowball

A very early, pure white turnip of fine appearance. The bulbs are small, nearly round, very tender and sweet.

Pkt., 10c; Oz., 25c; Lb., \$2.00; postpaid

Early White Milan

Remarkably early, clear white, smooth, and the flesh is white, mild, sweet and tender.

Pkt., 10c; Oz., 25c; Lb., \$2.00; postpaid

Early Purple Top Milan

Very similar to Early White Milan, except that the roots are a little flatter and the upper portion is an attractive purple red.

Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

Orange Jelly, or Golden Ball

Small, round, smooth, with deep yellow skin. The flesh is firm, crisp, and the finest flavored of the yellow fleshed turnips.

Pkt., 10c; Oz., 15c; Lb., \$1.50; postpaid

Petrowski

A new yellow turnip of medium to large size, with distinctive short spreading top. Medium early; nearly round. The flesh is yellow, tender, and of good flavor.

Pkt., 10c; Oz., 25c; Lb., \$2.00; postpaid

Early White Flat Dutch

Very early, of medium size, flat. The flesh is very white, fine grained and sweet.

Pkt., 10c; Oz., 15c; Lb., \$1.50; postpaid

RUTA BAGA, OR SWEDISH TURNIP

American Purple Top Improved

Excellent for both table use and stock feeding. It grows very large, uniform in shape, and is a splendid keeper. The flesh is a beautiful yellow color, fine grained, sweet and tender.

Pkt., 10c; Oz., 15c; Lb., \$1.50; postpaid

Skirving's Purple Top Ruta Baga

Very similar to American Purple Top; large; round or top-shaped, and of the finest quality.

Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

TOBACCO

Cultural directions. The plants should be started in a hotbed or in pots or boxes in the house and transplanted outdoors, four feet apart each way, when danger of frost is past.

Connecticut Seed Leaf

A hardy variety adapted to this locality. Leaves are of good width and length, and are used for cigar wrappers.

Pkt., 10c; postpaid

Havana

A choice variety; leaf very thin and of fine texture.

Pkt., 10c; postpaid

Kelway's Quicksilver Turnip

White Egg

An early, white, egg-shaped turnip. The flesh is white, firm, fine grained and sweet.

Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

Purple Top White Globe

An excellent table turnip of good size, appearance, and quality.

Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

Purple Top Strap Leaf

A very early, flat turnip of medium size. Flesh white, fine grained and tender.

Pkt., 10c; Oz., 15c; Lb., \$1.50; postpaid

Yellow Aberdeen

A large yellow turnip; globe shaped; of good quality and a good keeper. Hardy, productive and an excellent variety for feeding stock.

Pkt., 10c; Oz., 15c; Lb., \$1.50; postpaid

Cow Horn, or Long White

This variety often grows a foot long and two and one-half inches in diameter. Splendid for stock, and excellent for table use when young.

Pkt., 10c; Oz., 15c; Lb., \$1.50; postpaid

Yellow Swede Ruta Baga

Very hardy and a good keeper. The roots are large, oblong, dull reddish color above ground and yellow underneath.

Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

White or Sweet Russian

A very desirable table or stock variety. The roots are very large, nearly globe shaped, and the color is white with a shade of green at the top. The flesh is white, very firm and sweet.

Pkt., 10c; Oz., 20c; Lb., \$1.75; postpaid

R. F. D. No. 2, Kirkland, Wash.
May 24, 1919.

Randall-McLoughlin,
Seattle.

Gentlemen:—

I have found Mag-o-tite to be just what we wanted. It kills the flea beetles and root maggots, and I think that if sprinkled on cabbage, after they head, it will do away entirely with the cabbage worm. In fact it has put an end to every insect that infects our garden that I have tried it on, and that is a good many.

Yours truly,
MRS. CHAS. LUTHER.

SEED POTATOES

These potatoes were grown for us especially for seed, from carefully selected stock, have been properly stored and cared for, and are much superior to those commonly furnished. Good seed potatoes are very scarce this season, and although we have a comparatively large stock, we anticipate a great demand and would advise ordering early.

BANNER. A valuable new variety of splendid oval or elongated shape, similar to Irish Beauty. Medium early main crop, a remarkably heavy yielder and a good keeper. The flesh is white and of finest quality.

PRIDE OF MULTNOMAH. One of the newer varieties that has become very popular. The tubers are of the ideal elongated type, uniform in size and shape, smooth, with thin, white skin and white flesh of fine quality. Immensely productive.

IRISH BEAUTY. A splendid medium early main crop potato, extremely productive and of fine quality. Of uniform shape and size, elongated. The skin is white, eyes few and shallow.

Early Rose. The old standard extra early variety, still good if good seed can be procured.

Irish Cobbler. One of the best early potatoes. Tubers large, almost round, and handsome. The skin is creamy white, sometimes netted. The flesh is white and of fine quality.

London Beauty. A new main crop potato, shaped like Burbank but smoother, of medium large size, uniform and of fine appearance. Cooks dry and fine. Does best on loam soil.

Million Dollar. A very large main crop potato, very productive. Oblong, deep eyes.

Netted Gem. A splendid main crop late potato that gives best results in the irrigated districts. The tubers are of fine shape, elongated, of medium size, with russet netted skin, and eyes flush with the surface. Flesh white and of the finest quality.

American Wonder. One of the best main crop varieties. A strong grower and very productive. Tubers, white, large and of uniform size; elongated. Eyes few and nearly flush with the surface.

Gold Coin. A main crop variety of hardy, vigorous growth and great productiveness. Of smooth, regular form, slightly oblong, broad and thick. Skin thin and of light golden color, more or less netted. Eyes small and shallow. Flesh pure white and fine grained.

Uncle Sam. Tubers oval with russet white skin and shallow eyes. Mature late.

Burbank. Has long been a standard commercial variety. Late and very productive.

Unable to quote prices at time of going to press. Write for prices.

ARTICHOKES

These tubers are grown the same as potatoes, are remarkably productive, and are of great value for feeding stock, especially hogs. By some they are considered a great delicacy for the table.

Can furnish the tubers from March to May. Price, less than sack lots, 5c per lb. 100 lbs., \$4.50.

VEGETABLE PLANTS

CABBAGE PLANTS. Fine, healthy, sturdy plants of Early Jersey Wakefield, Copenhagen Market, Late Flat Dutch, Early Flat Dutch and Danish Ballhead. From March 1st to July 1st.

Price.....1 doz., 20c; 100, \$1.35

Write for prices on large quantities.

TOMATO PLANTS. Fine Earliana, Dwarf Champion and John Baer Tomato Plants, both pot-grown and grown in flats. April 1st to July 1st.

Pot-grown Plants1 doz., 50c; 100, \$3.00

Grown in Flats1 doz., 25c; 100, \$1.50

CAULIFLOWER PLANTS. Early Snowball, Veitch's Autumn Giant, and Danish Dry Weather. April 1st to July 1st.....1 doz., 25c; 100, \$1.75

CELERY PLANTS. Golden Self Blanching and White Plume Celery Plants of best quality. April 1st to July 1st.....1 doz., 25c; 100, \$1.50

BRUSSELS SPROUTS. Do not fail to grow some of these. A delicious vegetable, deserving of more consideration in this locality.....Doz., 25c; 100, \$1.50

LETTUCE PLANTS. Fine plants of the best head varieties. These are pot grown, and will produce splendid heads in a very short time.

Price.....Doz., 15c; 100, \$1.25

PARSLEY PLANTS. Pot grown plants of the fine curled varieties. March 1st to August 1st.....Each, 5c; doz., 50c

CHIVES. Large clumps that may be divided. Should have a place in every garden. March 1st to August 1st.

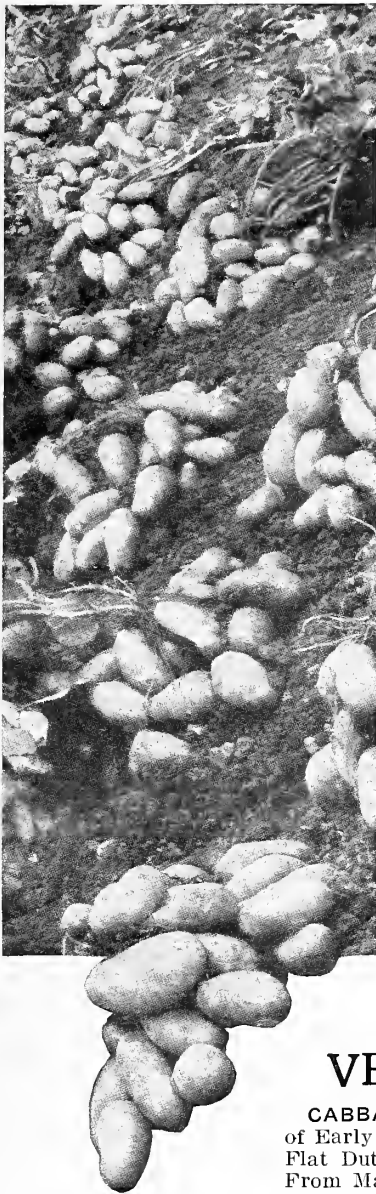

Price.....Per clump, 15c

LEEK PLANTS. April 1st to June 1st.

Price.....Doz., 20c; 100, \$1.25

We can furnish any of the above plants in almost unlimited quantities. Market gardeners and others requiring large quantities will please write for special prices.

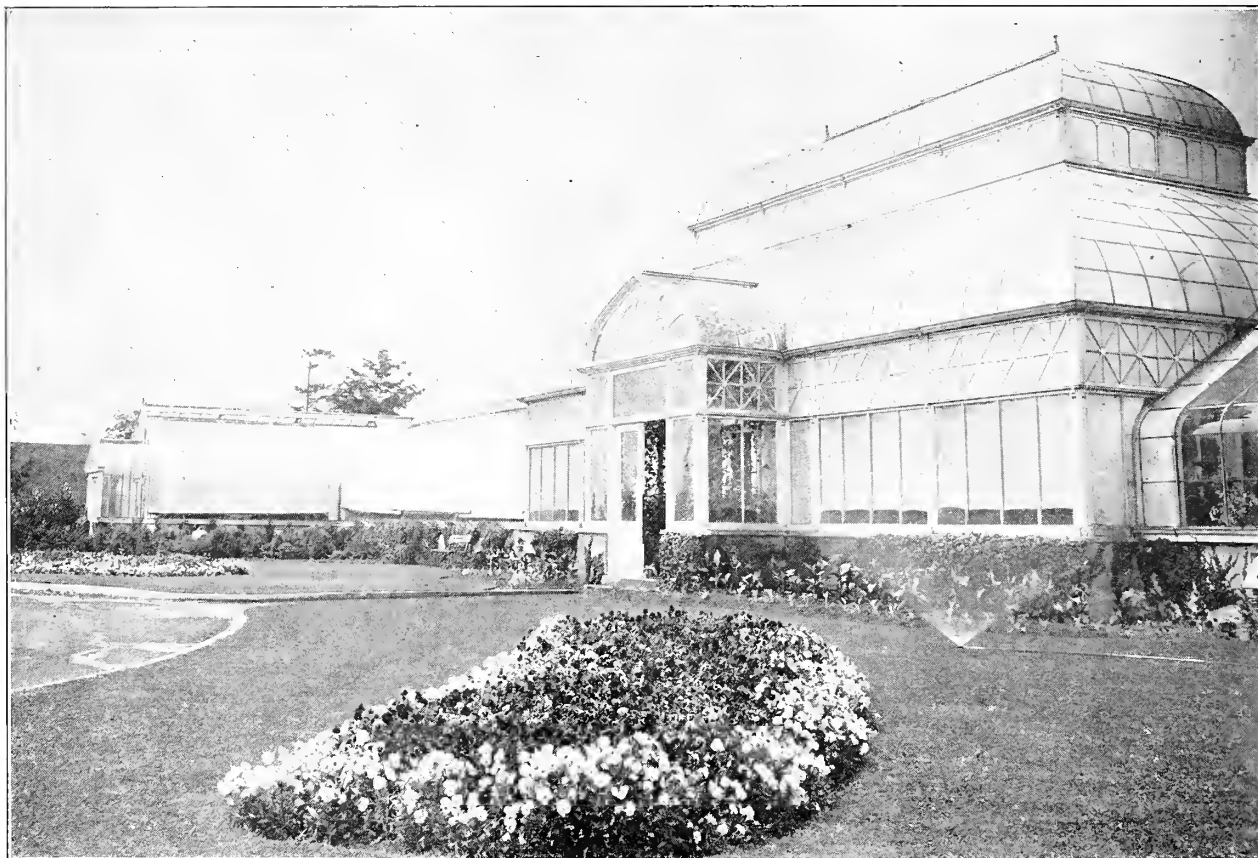

No prices shown in this catalog include postage, freight or express charges unless so specified.

HORSERADISH ROOTS. Plant a few in a corner of your garden and you will have a permanent supply with little further care. Can supply them from March 1st to August 1st. Price.....Doz., 30c; 100, \$1.50

THOUSAND HEADED KALE PLANTS. To supply green food for poultry and cows. March 15th to September 15th. Price.....Doz., 15c; 100, \$1.00

Plants should be shipped by express when possible. It is impossible to pack them so that they will reach destination in good condition when shipped by parcel post.

Conservatory at Volunteer Park, Seattle.

FLOWER SEEDS

Carefully Selected Varieties

THE following list has been selected by practical florists, and great care has been taken to choose only the choicest varieties and those that are suitable for our climatic conditions. The seeds have been procured from the most reliable growers in this and foreign countries and nothing is listed that we cannot conscientiously recommend. We wish to call our customers' attention to the fact that although some flowers are as easily grown from seeds as garden vegetables, many of them are quite difficult to get started, and amateurs should follow cultural directions closely. Most failures are on account of planting the seed too deeply, too early, or in improperly prepared soil. Many of the most pleasing and satisfactory flowers are very easy to grow, and those who have not had experience will do well to confine themselves to those varieties.

ACHILLEA (Milfoil, or Yarrow)

Achillea Ptarmica, "The Pearl". Hardy perennial, two feet high. Covered with heads of pure white flowers from spring until frost. Easily grown from seed.....Pkt., 10c, postpaid

ACROLINIUM (Everlasting)

Half hardy annuals, fifteen inches high, bearing daisy-like flowers. The "Immortelles" so desirable for winter bouquets. Double, Mixed colors.....Pkt., 10c

AGERATUM (Floss Flower)

A hardy annual of bushy habit, fine for beds and borders. Attractive feathery flowers borne in dense clusters.
Mexicanum Album, White.....Pkt., 10c
Blue Perfection, Dark blue.....Pkt., 10c

AGROSTEMMA (Rose of Heaven, Mullein Pink)

Coronaria. A free flowering hardy perennial of easy culture, producing the first season crimson flowers like a single Pink. Foliage silvery white. Two feet high.....Pkt., 10c

ALYSSUM (Mad Wort)

Little Gem, or *Carpet of Snow*. A pretty little hardy annual, four inches high, covered with a mass of white bloom from spring to late in fall. Fine for edging.....Pkt., 10c

AMARANTHUS (Love Lies Bleeding)

Caudatus. An annual, thriving in a hot, sunny location, five feet high and bearing brilliant blood-red foliage.....Pkt., 10c

AMPELOPSIS (Boston Ivy)

Ampelopsis Veitchi. A hardy perennial climber with olive-green leaves which turn scarlet in autumn.....Pkt., 10c, postpaid

ANEMONE (Wind Flower)

Coronaria. Poppy Anemone. Hardy perennial, among the earliest of spring flowers. Flowers, in various colors, are about two inches across, and resemble poppies.....Pkt., 10c

Arctotis Grandis. Large, showy flowers, white on the upper surface and lilac-blue on the reverse side of petals, borne on bushes two to three feet high. Annual.....Pkt., 10c, postpaid

ASTERS

Every garden should contain Asters, for they are among the most important and satisfactory of our annual flowering plants, and are in bloom late in summer and fall when there is a dearth of flowers. The modern Aster is a great improvement over the old sorts, and some of them are nearly equal to *Chrysanthemums* in size and form. For early flowers, seed should be sown under glass in April, and the plants set outdoors when weather is warm. Seed may be sown in seed bed in May and the plants transplanted to the permanent bed when two or three inches high. They should be set nine to twelve inches apart in soil that has been made very rich with bone meal or other commercial fertilizer.

CREGO'S GIANT ASTERS

The finest and largest of the Comet Asters, bearing immense fluffy flowers as fine as *Chrysanthemums*. They keep in good condition longer than others when cut.

A favorite old-fashioned perennial bearing a profusion of dainty blossoms in spring and fall.

Alpestris, Blue. Rich indigo-blue flowersPkt., 10c
Alpestris, Mixed. All colorsPkt., 10c

NASTURTIUMS

Nasturtiums are the most pleasing and satisfactory annuals, for no other will produce such a profusion and diversity of blooms and colors for such a long period with so little care.

They may be grown almost any place, under almost any conditions, and have a place in any sort of garden from a large estate or park to a window box or pot in an apartment. They are not particular as to soil or location, but do best in ordinary garden soil, exposed to the sun, and not too moist.

Nothing can excel a bed or border of the dwarf varieties, or a trellis, fence, stump or rockery covered with the tall varieties. The seed is simply sown in spring, after danger of freezing weather is past, in the permanent location, and covered about one inch deep. After that they require no attention except to pick the flowers, and the more there are picked the more there will be.

DWARF, OR BEDDING NASTURTIUMS

Vesuvius. Dark foliage; salmon-rose flowers.....Pkt., 10c; oz., 30c
Pearl. Creamy white flowersPkt., 10c; oz., 30c

Carnation Flowered. Double, fringed. Mixed colors.....Pkt., 10c
Ranunculus Flowered. Double flowers; mixed colors.....Pkt., 10c

**PANSIES**

The cool, moist climate of the Pacific Northwest is ideal for producing the most perfect pansies, and in no other locality do they attain such immense size or perfection of form and color, or bloom so continuously. Seed may be sown in seed bed when weather is settled in spring, and the plants transplanted when an inch high, or the seed may be sown in fall and the plants wintered over in a cold frame for early blooms the next spring. Pansies require a cool, partially shaded position, a rich loam soil, thorough cultivation and plenty of moisture. Blooms should be kept picked, for they stop blooming as soon as seed pods are allowed to form.

STEELE'S MASTODON PANSIES. This type is noted for its immense size, magnificent form and splendid colors. They are unsurpassed in any way. Our seed is procured from the originators, Steele's Pansy Gardens, in Oregon. This is a choice mixture of the best colors.....Pkt., 25c

SPECIAL COLLECTION SPENCER SWEET PEAS

12 Choicest Colors \$1.00

POSTPAID

We have selected one each of the twelve most desirable colors in the magnificent Spencer Sweet Peas, and have packed a great number of these collections ready for shipment. By doing this before the busy season in spring we are able to offer them at a greatly reduced price.

These seeds come from the same splendid stocks listed on the following pages, and this is a better assortment than most persons not familiar with the varieties would be able to select.

Each color is packed and labeled separately, and each is a variety of the Giant Orchid-Flowered Spencer type, with long stems, each bearing three or four splendid flowers.

This package contains one packet of each of the following colors: Pink, White, Salmon, Scarlet, Lavender, Purple, Blue, Pink and White, Striped, Cream, Yellow, and Maroon.

Price, \$1.00, postpaid.

This will be an excellent assortment to enter in the Sweet Pea Show which will be held in our store rooms about the middle of July. We intend that it shall be even better than the show which we had last summer. Don't fail to have an entry.

THE BEST SEEDS IN THE WORLD cannot produce good crops on barren soil. Use Invicta Fertilizers with Invicta Seeds.

GIANT SPENCER

ORCHID FLOWERED

SWEET PEAS

The Finest Varieties of This
Magnificent Type.

Of course, everyone will grow Sweet Peas, especially here on the Pacific Coast where we can grow them so much larger, wavier, brighter, and for such a long period as to make all the world envious.

The new Spencer type is so much superior that it has practically superseded the old Grandiflora type. The stems are a foot or more in length, each bearing three to five magnificent flowers, often two and one-half inches across, daintily waved and fluted, and of the most delicate colors and fragrance.

We have taken great care in selecting our list of Sweet Peas, and have chosen only the choicest varieties of the most desirable colors and tints.

New Extra Early Varieties

BURPEE'S EARLY BLUE JACKET

This novelty will certainly become popular with all Sweet Pea lovers who prefer the dark shades. It is a rich, dark navy-blue self; extremely free-flowering and usually produced in fours.....Pkt., 25c

BURPEE'S EARLY CANARY BIRD

A splendid, rich, deep cream or primrose-colored self. The flowers are of great size, beautifully waved, and usually borne three or four on a stem.....Pkt., 25c

BURPEE'S EARLY CHERRY RIPE

A particularly bright and taking color, and quite new. It is described as a glowing cherry or salmon-cerise self.....Pkt., 25c

BURPEE'S EARLY DAINTINESS

This has always been a favorite since first exhibited in 1915. It is a strong grower, with flowers of largest size and usually produced in fours. Pure white edged with rose, similar to summer-flowering Dainty.....Pkt., 25c

BURPEE'S EARLY GIPSEY MAID

Color light, bright, rose-pink, suffused salmon. The deep lemon keel tends to soften and lighten up the flower. Of great size, usually borne in fours.....Pkt., 25c

BURPEE'S EARLY GLORIOUS

This magnificent novelty may be briefly described as being an early-flowering Royal Purple, the color being identical to the popular summer flowering variety of that name. The color is a charming shade of warm, rosy-purple, and the flowers are of great size and produced in threes and fours on a very long stem.....Pkt., 25c

BURPEE'S EARLY LUSTER

A most distinct and pleasing shade of deep rose-pink with a lustrous, coppery sheen overlaying or suffusing the standard. Flowers are of great size and are produced in fours. A magnificent variety for bunching.....Pkt., 25c

BURPEE'S EARLY ORANGE BEAUTY

Similar in color to Helen Lewis, a glowing orange-scarlet with softer colored wings. Extremely free and early blooming. Valuable alike for culture under glass or in the open, as it withstands the sun and weather well.....Pkt., 25c

BURPEE'S EARLY SPLENDOR

A magnificent new deep rose self. The rich rose-crimson color is accentuated by the distinct white blotch at the base of standard and wings. The flowers are of great size, usually borne in fours on very strong stems.....Pkt., 25c

OUR ANNUAL SWEET PEA AND ROSE SHOW

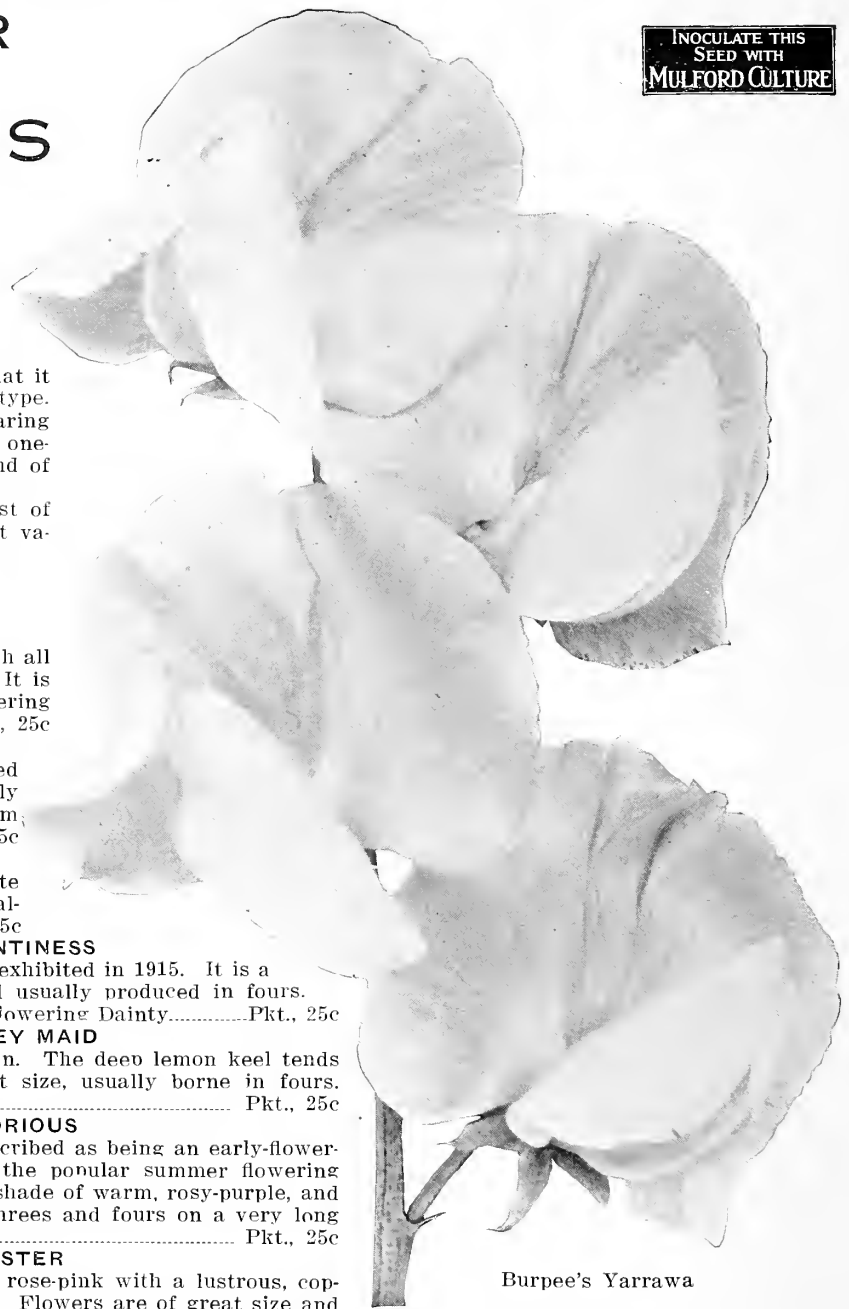

A Treat in Store for Lovers of Flowers

ONE OF THE GREATEST PLEASURES that came to us during the past year was the hearty response to the Sweet Pea Show held at our Madison Street establishment in July last. We had anticipated that there would be a lively interest in an exhibition of choice Sweet Peas, but little dreamed that there would be so many exhibits, or from such a wide area. Sweet Pea enthusiasts claim that it surpassed anything seen in this part of the country since the A. Y. P. Exposition.

Encouraged by last year's success, we are making arrangements for a much larger affair for this season. We will hold a Sweet Pea and Rose Show, combined, at our spacious new premises at Westlake Avenue and Harrison Street in July, the exact date to be determined by the season. The show will be open to all comers, without charge for either entry or admission. The seed may be procured from any place that you choose. A generous list of trophies that will be worth trying for will be donated by ourselves and other enthusiasts.

All who are interested in this exhibit should get in communication with us in sufficient time so that we may furnish full particulars. It will be our aim to make it very simple and easy to enter,

MULFORD CULTURE

Burpee's Yarrowa

BURPEE'S YARROWA

Extra early. The flowers average two and one-half inches in diameter, and many are duplex or double. The color is a bright rose-pink with a clear, creamy base.....Pkt., 25c

BURPEE'S IMPROVED EARLY SNOWSTORM

The result of a cross between King White and Yarrowa, it embodies the best qualities of these two varieties and easily eclipses all early-flowering white sweet peas. The flowers are charmingly waved. It is a vigorous grower, and the flowers are borne in fours on very long stems.....Pkt., 25c

CHOICE SPENCER SWEET PEAS OF RECENT INTRODUCTION

Burpee's Early Snowstorm

ANNIE BOWNASS

Flowers of largest size. Color rich, bright pink, heavily suffused with salmon, and amber on white.....Pkt., 15c; oz., \$1.00

BERYL

A lovely shade of pink, heavily suffused with salmon. Briefly described as a bright salmon-pink self.....Pkt., 15c; oz., \$1.00

CHARM

The flowers are a glistening, pure snow-white, suffused with delicate flesh or blush-pink.....Pkt., 15c; oz., \$1.00

CHERUB

A deep rich cream charmingly edged with bright rose. Gigantic flowers borne in fours.....Pkt., 20c; oz., \$1.00

CIS WRIGHT

Color blush white. As the flower opens it is heavily suffused with amber and pale pink.....Pkt., 15c; oz., \$1.00

DON ALVAR

The flowers are of largest size. The color is a delightful soft silvery-blue or lavender.....Pkt., 15c; oz., \$1.00

EDWARD COWDY

This is a truly magnificent variety. The color is a bright fiery orange-scarlet self. The flowers are of large size, beautifully placed and freely produced in fours on stout stems.....Pkt., 15c; oz., \$1.00

FIERY CROSS

The standard is a scorching fire-red or rich orange-scarlet, which scintillates and glitters in the bright sunlight with a glowing, fire-like sheen that radiates over the entire flower.....Pkt., 15c; oz., 50c

HERCULES

A magnificent soft rose-pink self. The standard often two and one-half inches.....Pkt., 15c; oz., \$1.00

IRISH BELLE, OR DREAM

A lovely rich lilac, flushed with pink. Large and of fine form.....Pkt., 15c; oz., \$1.00

JOHN PORTER

A lovely shade of soft orange-pink. The flowers are of great size, usually in fours.....Pkt., 15c; oz., \$1.00

MRS. A. G. GENTLE

A beautiful variety of much merit. The ground color is white, the standard heavily edged with bright scarlet-pink.....Pkt., 15c; oz., \$1.00

ORCHID

The flowers suggest the rich tone found only in the Cattleya orchids. They are of extra large size, rich purple, suffused pink.....Pkt., 15c; oz., \$1.00

ROYAL PURPLE

The color is a rich, warm, rosy purple, the younger flowers having a slightly softer color tone.....Pkt., 15c; oz., 50c

STERLING STENT

The color is a rich, glowing, deep salmon self, suffused with orange. Very fine.....Pkt., 15c; oz., \$1.00

THE PRESIDENT

The flowers are of largest size, carried on strong, stiff stems, usually in fours. The color is a brilliant orange-scarlet.....Pkt., 15c; oz., \$1.00

Burpee's Special Mixture

SPENCER SWEET PEAS

This is a choice mixture of all of the good varieties of Spencer Sweet Peas, chosen for those who wish a great variety of colors, tints and shades, but do not care to purchase and plant all of the varieties separately.....Pkt., 10c; oz., 35c; postpaid

SWEET ROCKET (Hesperis)

An old-fashioned garden plant growing two to three feet high and bearing spikes of white, lilac and purple, fragrant flowers. Perennial.....Pkt., 10c

SWEET WILLIAM (Dianthus Barbatus)

A well known attractive, free-flowering hardy perennial; their rich and varied flowers producing a splendid effect in beds and borders.

Single Varieties and Colors, Mixed.....Pkt., 10c

Double Varieties and Colors, Mixed.....Pkt., 10c

SUNFLOWER (Helianthus)

The improved ornamental sunflowers are splendid for backgrounds and screens, and wonderful effects may be produced with them. Hardy annuals, easy to grow.

Double Hybrids.....Pkt., 10c

Double Chrysanthemum Flowered.....Pkt., 10c

THUNBERGIA (Black-eyed Susan)

Beautiful, rapid growing, annual climbers, used for hanging baskets and for covering fences, etc. Pretty flowers in buff, white, orange, etc., with dark eyes.....Pkt., 10c

TRITOMA (Red-hot Poker, Flame Flower, or Torch Lily)

Large spikes of orange-red flowers, very effective. A perennial, hardy on the Pacific Coast.....Pkt., 10c

VALERIANA (Garden Heliotrope)

Rubra, Mixed. Showy, hardy border plants, producing large corymbs of red or white flowers. Two feet high.....Pkt., 10c

VERBENA

Verbenas are half hardy perennial trailers, one foot high, flowering the first year, and usually treated as annuals. Plants may be started indoors early in spring, or the seed may be sown outdoors in May and the plants will bloom in August.

Mammoth, White. The largest trusses of finest formed clear white flowers.....Pkt., 10c

Mammoth, Pink Shades. Immense flowers in various shades of pink.....Pkt., 10c

Mammoth, Scarlet. Bright scarlet flowers in trusses of largest size.....Pkt., 10c

Mammoth, Blue Shades. All desirable shades of blue.....Pkt., 10c

Mammoth, Extra Choice Mixed. All colors of the Mammoth type.....Pkt., 10c

VINCA (Periwinkle)

Attractive, bushy plants with glossy green foliage, producing an abundance of handsome single flowers. One of the best bedding plants; also used as a pot plant in winter. Tender perennial, blooming the first year.....Pkt., 10c

VIOLA

Viola Carnuta, Tufted Pansies. Not so large as Pansies, but they flower the whole season, and their bright colors make them favorites for bedding.....Pkt., 10c

Viola Odorata, Sweet Violets. Large, blue, very fragrant flowers.....Pkt., 10c

WALLFLOWER (Cheiranthus Cheiri)

Excellent perennial and annual plants, growing eighteen inches high, bearing in spring long spikes of pleasing flowers in red, brown, orange, yellow, etc.

Blood Red, Early-flowering, annual, single. Blood-red.....Pkt., 10c

Parisian Forcing. Blooms first year. Single. Mixed.....Pkt., 10c

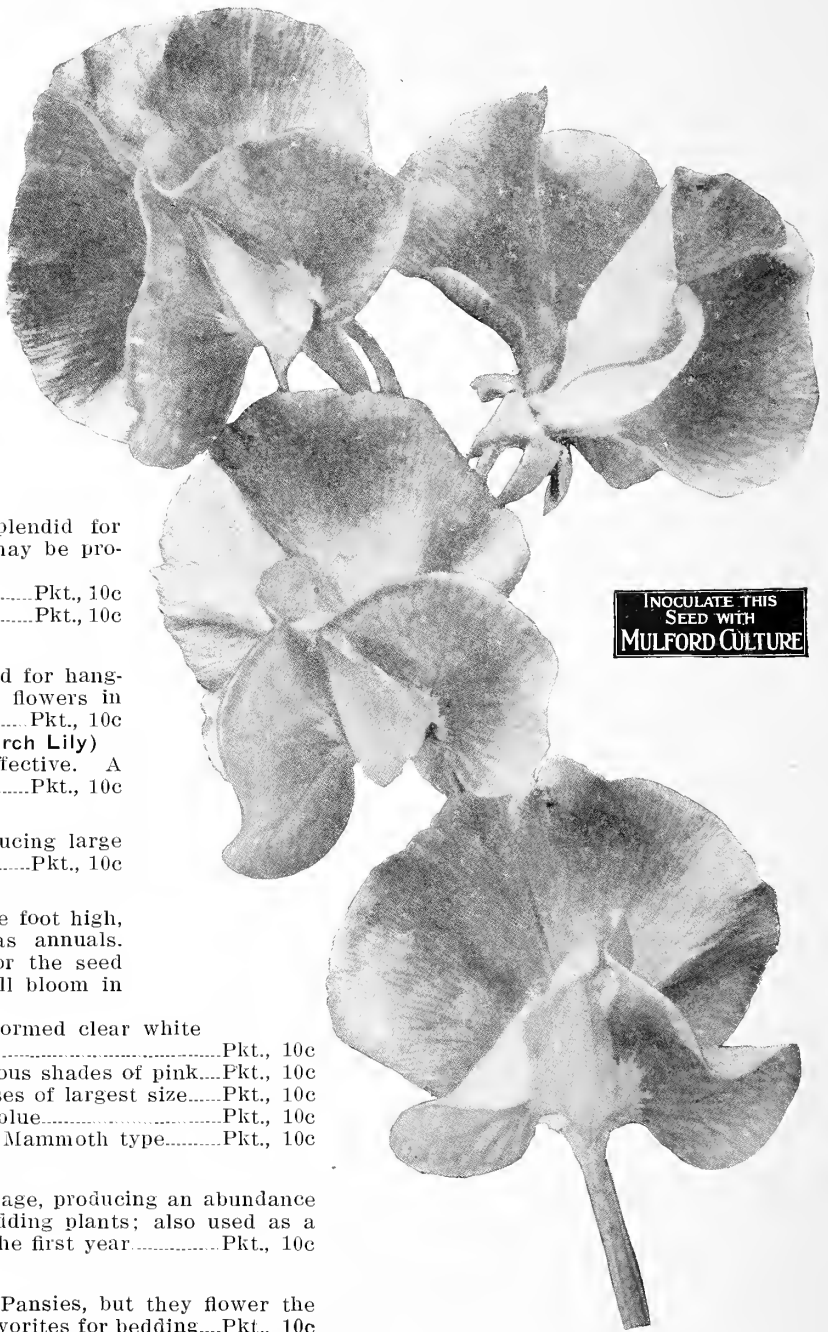

Choice Double Varieties, Mixed. Perennial. Mixed.....Pkt., 10c

WILD GARDEN FLOWER MIXTURE

A mixture of hardy flower seeds that may be sown broadcast in corners or waste places, and with little care will produce a wonderful variety of flowers, and some pleasant surprises.....Pkt., 10c

WISTARIA

Sinensis. A splendid hardy annual climber with abundant

MULFORD CULTURE

A Typical Spencer Sweet Pea

foliage and thickly covered with sprays of small, white, fragrant flowers. Seed may be sown outdoors in fall or early spring.....Pkt., 10c

ZEA

Japonica Variegata, Rainbow Corn. Highly effective and very interesting as an ornamental foliage plant. It grows about five feet high, with wonderfully variegated leaves.....Pkt., 10c

ZINNIA

One of the most brilliant and showy annuals, and an old favorite. They begin blooming early in summer and continue until killed by frost.

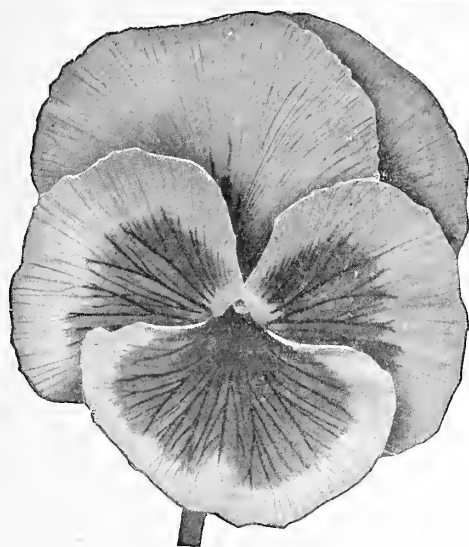

Dwarf, Double Varieties, Finest Mixed. All colors.....Pkt., 10c

Large Flowered, Double Varieties, Mixed Colors.....Pkt., 10c

Special Trial Ground Mixture. Choice varieties.....Pkt., 10c

IF YOU ARE NOT ENTIRELY SATISFIED with your crops; if you are not producing better flowers and vegetables than your neighbors, use Invicta Fertilizers. We especially recommend Sheep Guano. It is dried and pulverized, in convenient form to handle, is not offensive in any way, and is the best, cheapest, and most practical fertilizer to be had at this time. Use it on your flower garden, vegetable garden, and lawn. You will find it a good investment.

FLOWERING PLANTS

Mastodon Pansies

We can furnish the following plants during the periods named. Plants should be shipped by Express when possible, for it is difficult to pack them so that they will reach destination in good condition when shipped by Parcel Post. Prices do not include transportation charges.

GLADIOLUS

The Pacific Northwest produces the most splendid blooms of Gladiolus to be found anywhere, and they are becoming more popular each year. There are few things to equal the effects produced by these fine plants. They are in bloom during the whole season from July until late fall, and the colors are exquisite. They are very easy to grow. Our bulbs are of the finest quality procurable, and our list of varieties is of the choicest.

America. Very light pink, beautifully tinted with lavender. Flower spike of largest size.....Each, 10c; doz., 75c
Baron Hulot. Dark velvety purple. Free flowering, and the best of the color.....Each, 10c; doz., \$1.25
Brenchleyensis. The most effective for massing. Very rich, brilliant, dark scarlet.....Each, 10c; doz., 75c
Crackerjack. Dark, rich, velvety red; throat spotted yellow and maroon.....Each, 10c; doz., \$1.25
Chicago White. One of the smaller varieties. Pure white with a slight pencil mark of violet in the center of each lower petal.....Each, 10c; doz., \$1.00
Kunderdi Glory. (Ruffled.) A very striking variety with fluted or ruffled petals. Flowers very large, delicate cream pink with a crimson stripe on each lower petal.....Each, 10c; doz., \$1.25
Mrs. Francis King. A most effective variety for decorations. Spikes extra long; flowers brilliant pink blazed with vermilion.....Each, 10c; doz., 75c

Mrs. Frank Pendleton. Bright rose-pink, shading to a deeper pink at center of petals. Very large.....Each, 15c; doz., \$1.25
Niagara. Delicate creamy yellow shaded or splashed with rosy carmine in the throat.....Each, 15c; doz., \$1.25
Panama. A grand new seedling of America, which it resembles, but is a deeper pink. The flowers are very large and the spike is extra long.....Each, 15c; doz., \$1.25
Princepine. Bright red with pure white blotches on the lower petals.....Each, 10c; doz., \$1.00
Sulphur Queen. A long spike of clear sulphur-yellow flowers.....Each, 10c; doz., \$1.25
Willie Wigman. Large flowers; creamy white with red throat.....Each, 10c; doz., \$1.25
Mixed Gladiolus. A splendid mixture of many of the finest varieties.....Dozen, 50c; 100, \$3.50

PAEONIES

Paeonies are hardy and practically immune from pests and disease. Once planted they are established for all time, and require very little attention. A liberal dressing of fertilizer each fall, and a good spading of the soil, is all that is necessary. If planted in the fall, they will bloom the following June. Set the plants with the tops two or three inches below the surface of the soil, and pack earth tightly around the roots. The clumps should be set about three feet apart.

Festiva Maxima. Very popular, of rare beauty and size, and one of the earliest. Perfectly double, pure white flaked with a small crimson spot at the center.....Each, 75c

Couronne D'Or. A magnificent white Paeony, of large size, reflecting yellow; center petals bordered carmine. A late blooming flower of great beauty. Very fragrant.....Each, 75c

Fragrans. Deep rose. A late and prolific bloomer. Tall growing. Very fragrant.....Each, 75c

Louis Van Houtte. Semi-rose type. Late mid-season. Very fine, shapely bloom; medium size. Color bright violaceous red of dazzling effect.....Each, 75c
Officinalis Rubra. Flowers bright scarlet-crimson, double and globular. Very early.....Each, 75c
Officinalis Alba. Early, large and handsome. Opens light pink, fading to white as flowers mature.....Each, 75c
Officinalis Rosea. A gorgeous light pink. Blooms by Decoration Day in the Northwest. Very hardy.....Each, 75c

Lassie. Yellow base; rose tips and edges35
Little Beeswing. Golden yellow edged cherry red. Small	.35
Phoebe. Bright orange, tipped scarlet35

One Dozen of the above standard varieties, including some of the best, our selection, \$5.00, postpaid.

CALLA LILY

These very showy summer-flowering bulbs should be treated similar to Gladiolas. Bulbs should be taken up in fall and stored during the winter like potatoes.

Golden Yellow (*Richardia Elliottiana*). Flowers of a rich, velvety, golden yellow; foliage dark green with creamy white spots30c each; \$3.00 per doz.

We have ordered a splendid assortment of Holland Bulbs, direct from Holland, which should arrive about the middle of October. They will be listed in our fall catalog. If you do not receive a copy about October 1st, ask for it.

MONTBRETIA

The Montbretias are among the brightest of our summer-flowering bulbs, and should be planted extensively. A dozen bulbs set six inches apart, in a sunny position, will form a large clump, producing a great number of graceful spikes a foot long, each bearing twenty to thirty showy, star-shaped flowers about two inches across.

Crocsmiaeflora. Deep golden orange.....Doz., 30c; 100, \$3.00

CHOICE FIELD GROWN ROSES OF RECENT INTRODUCTION

Two Year Old, Budded Stock**AUGUSTUS HARTMANN**

Brilliant geranium-red flushed with orange. Flowers of large size and beautifully formed.....Each, \$1.00

AUTUMN TINTS

Coppery-red shaded with orange and salmon. Very attractive and productive. \$1.00

BRILLIANT

Flowers large, full, and produced through the season. Color the most intense scarlet\$1.25

CHEERFUL

Pure orange flame color, the flame effect overspreading the petals, giving a very pleasing combination. Flowers very large, full, and of fine form\$1.00

CLEVELAND

Vigorous and mildew proof. Flowers large and of exquisite form. Color deep coppery-yellow at base of petals, which are flushed reddish on old rose.....\$2.00

COLUMBIA

A true pink, deepening as the flower expands. Long, stiff stems, beautiful foliage, practically thornless\$2.00

CONSTANCE

Buds long and pointed, of a rich orange yellow color distinctly streaked and splashed with crimson near base of petals, passing to bright cadmium yellow. Large, full flowers\$2.00

CRIMSON EMBLEM

A superb new Irish rose of a rich and glorious crimson color heavily shaded maroon. Long stems and fine form.....\$1.25

FLORENCE FORRESTER

Clear snow white with a lemon tinge, becoming pure white as the flowers mature. The blooms are even larger than Paul Neyron. Its habit is perfect, and the freedom with which it flowers is marvelous. Very sweetly perfumed.....\$1.00

GOEFFREY HENSLOW

A delightful orange-crimson of great brilliancy. The blooms are freely produced and are large, full, and of perfect imbricated, globular form. Growth vigorous and erect—\$1.50

GORGEOUS

Flowers large, full, exquisitely formed, and produced in endless profusion. Deep orange yellow heavily veined with reddish copper. The most gorgeous coloring yet introduced\$1.50

GOLDEN EMBLEM

A wonderful coloring, yellow cadmium toning to sunflower-yellow. Surpasses Marechal Neil in shape and formation..\$2.50

HOOSIER BEAUTY

Dark crimson shaded with maroon and veined with black. Beautifully formed pointed buds and large double flowers. \$1.00

CLIMBING HOOSIER BEAUTY

A new climbing red rose, like Hoosier Beauty, the finest of all the late red roses. A very vigorous climber.....\$2.00

H. V. MACHIN

A dazzling rose of gigantic size. Its intensely black grained scarlet crimson blooms are unique\$1.00

KILLARNEY BRILLIANT

The best of the Killarney type. The color is a very brilliant pink, varying somewhat in shade according to the weather.....\$1.00

LILLIAN MOORE

Deep pure Indian yellow with a slightly deeper center. Long buds. Free blooming. Awarded \$1,000 trophy at the Panama-Pacific Exposition\$2.50

LOS ANGELES

The growth is very vigorous, and it produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at base of petals\$1.50

LUDWIG MOLLER

This is a wonderful yellow Druschki, having all the good qualities of Frau Karl Druschki. It is a vigorous grower, free bloomer, and has deep golden-yellow flowers\$1.00

MADAME COLETTE MARTINET

Vigorous growth; reddish green foliage; long, golden yellow bud; medium sized globular flower, not too full; color old gold shaded orange yellow. Does not fade\$2.00

MRS. AMBROSE RICARDO

Deep honey-yellow overlaid brighter yellow. Of great size and substance, largest of the yellow roses\$1.00

MRS. WEMYSS QUINN

Intense lemon-chrome flushed orange, becoming deep canary yellow when fully opened. Very free blooming and deliciously fragrant. A splendid rose\$1.00

NATIONAL EMBLEM

Dark crimson of perfect shape. As a bedding, massing and cutting rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty.....\$1.50

CLIMBING SUNBURST

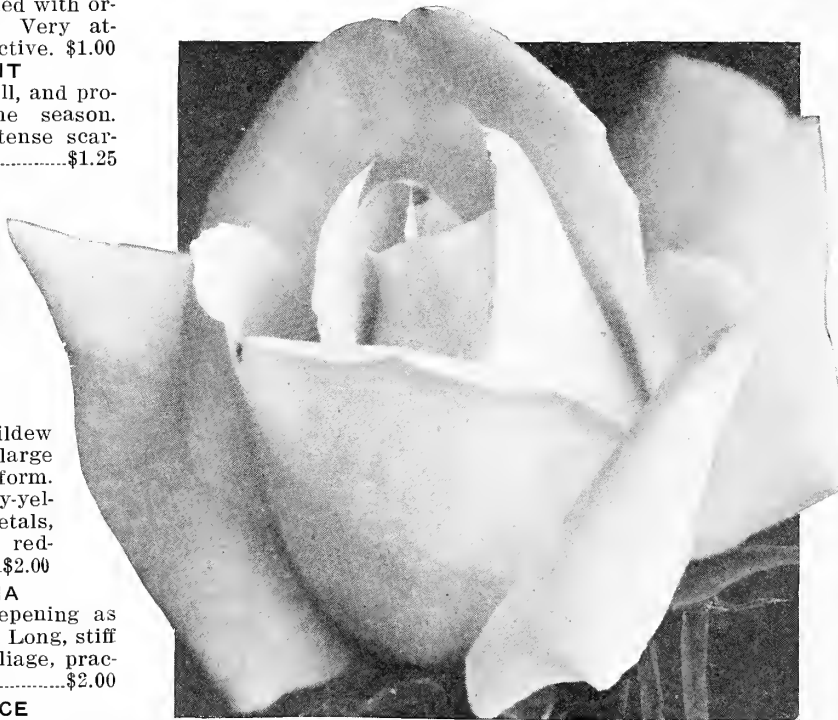

The grandest of all yellow climbing roses. A counterpart of Sunburst except that it is a vigorous climber.....\$1.00

TIPPERARY

Clear yellow of "Melody" tone. Pointed buds opening to a full rosette. Long, stiff stems. An Irish seedling of Mrs. Aaron Ward75c

TIP TOP, "BABY DOLL"

This delightful little "Sweetheart" rose is a wonder. The color is golden yellow tipped with clear, bright cerise. The foliage is long, sharply pointed and glossy green75c

Mrs. Wemyss Quinn

MRS. FRANKLIN DENNISON

Very large, full, well formed flowers. Color porcelain white, veined primrose yellow, deepening to ocre at the base of petals. Immense flowers produced in great profusion.....\$1.25

LOUISE CATHERINE BRESLAU

One of the finest Hybrid Tea roses. A vigorous grower, free blooming, and extra fine foliage. Flowers carried on stout stems. Color coral-red shaded chrome-yellow, opening to a well formed flower of shrimp-pink, shaded coppery orange \$1.00

Magoon. Large. Fine sub-acid flavor. Bears heavily throughout the season. A splendid and very popular variety.....	Doz., 30c; 100, \$1.50
Marshall. One of the best all-round berries. Very large, fine flavor. A good market and table berry.....	Doz., 30c; 100, \$1.50

EVERBEARING STRAWBERRIES

Progressive. A new variety of the Everbearing type. Rich red color; firm; and of delicious flavor.....	Doz., 50c; 100, \$3.00
Americus. A good, firm, sweet, Everbearing strawberry.....	Doz., 50c; 100, \$3.00
Superb. Everbearing. Sub-acid flavor. Good for canning.....	Doz., 50c; 100, \$3.00

Write for prices on Strawberry Plants in large quantities.

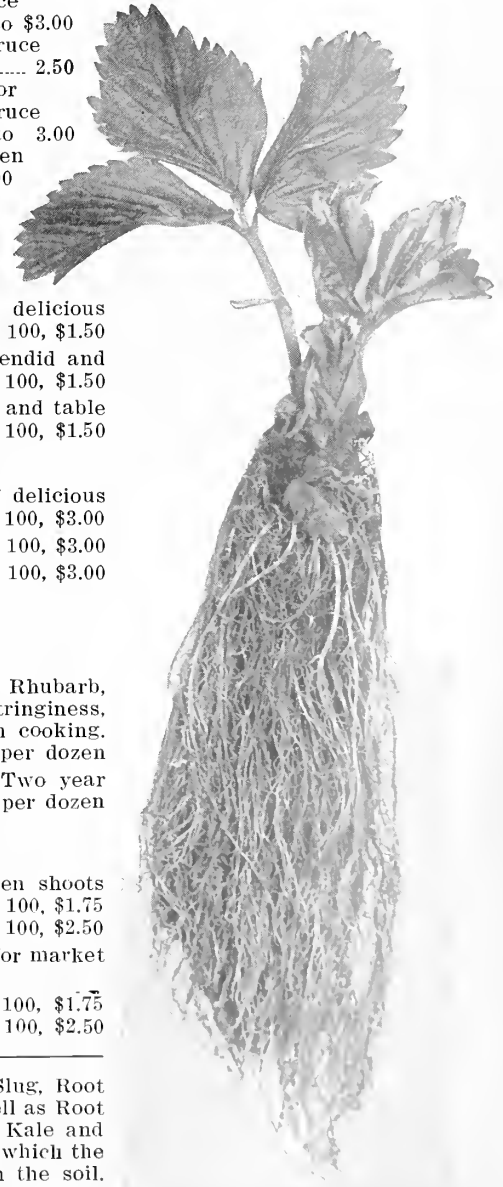

RHUBARB PLANTS

Riverside Giant. A cross between the California Wine Plant and Mammoth Victoria Rhubarb, and is unequalled for yield and quality. It is tender, crisp, and free from stringiness, with a good color and delicious flavor. The skin is so thin that it disappears in cooking. Vigorous and very productive. Two year old roots.....	25c each; \$1.75 per dozen
Mammoth Victoria. The best known standard variety. Large, tender, and early. Two year old roots.....	25c each; \$1.50 per dozen

ASPARAGUS PLANTS

Palmetto. Very early and prolific, producing an abundance of very large light green shoots of fine quality.....	Two year old roots, dozen, 35c; 100, \$1.75 Four year old roots, dozen, 50c; 100, \$2.50
Conover's Colossal. One of the largest and most generally grown varieties, popular for market and canning. The shoots are very large, thick, white, and of delicious flavor.	Two year old roots, dozen, 35c; 100, \$1.75 Four year old roots, dozen, 50c; 100, \$2.50

MAG-O-TITE will control Strawberry Crown Borer, Leaf Roller, Slug, Root Worm, Asparagus Beetle and Asparagus Miner, as well as Root Maggots on Radishes, Turnips, Cabbage, Cauliflower, Kale and Onions. It acts as a preventative by keeping away the flies which lay the eggs from which the larvae or maggots are hatched, and it also destroys the larvae which are already in the soil. It is guaranteed to do the work. It is a recent discovery, and is proving a boon to gardeners.

APPLE TREES

Robust, Healthy, Two Year Old Trees of Best Varieties
Prices, all varieties, \$1.00 each; Extra Choice Stock, \$1.50

SUMMER VARIETIES

Early Harvest. Medium size. Bright straw color. July.
Gravenstine. Large. Dashed red and orange. Aromatic.
Red Astrachan. Large. Deep crimson. Rich acid flavor.
Yellow Transparent. Medium size. Pale yellow. July.

AUTUMN VARIETIES

Bismarck. Large. Golden yellow. September.
Duchess of Oldenburg. Yellow, streaked red. July.
Fameuse. (Snow Apple) Greenish yellow with streaks of deep red on sunny side. Flesh remarkably white.
Maiden Blush. Medium size. Yellow with red on sunny side.
Waxen. Medium size. Pale yellow. Flesh crisp, sharp acid.

WINTER VARIETIES

Arkansas Black. Medium. Round. Dark maroon. Long keeper.
Baldwin. Large. Bright red. Crisp. Fine flavor. November
Bailey Sweet. Large. Greenish yellow with red stripes. Sweet.
Delicious. Splendid for Eastern Washington. Keeps well.
Grimes Golden. Rich golden yellow. Tender, juicy and rich.
Jonathan. Fruit oblong; red. Fine quality.
King. Large and handsome. Striped red and yellow.
Rambo. Medium size. Yellow streaked with red. Sub-acid.
Mammoth Black Twig. (Paragon). Large. Dark red.
Northern Spy. Large. Greenish yellow striped with red.
Rhode Island Greening. Large. Greenish yellow. Fine grained.
Rome Beauty. Large. Yellow shaded with bright red.
Spitzenburg. Large. Yellow striped with bright red.
Stayman Winesap. Yellow striped with red. Firm, crisp, juicy.
Tallman Sweet. A popular old sweet apple. Size medium.
Wagner. Medium. Yellow ground shaded and striped deep red.
Winesap. Medium. Yellow ground streaked with red.
Wealthy. Medium. Whitish yellow shaded with deep red.
Winter Banana. Large. Pale yellow. Fancy market fruit.
Yellow Belleflower. Large; oblong; yellow. Firm, crisp, juicy.

CRAB APPLES

Hyslop. Large. Deep crimson. Tree hardy. Nov. to Jan.
Red Siberian. Yellow with scarlet cheek. Bears young.
Transcendent. Very large. Yellow striped red. Pleasant flavor.
Whitney No. 20. Fruit large, smooth, glossy, striped carmine.
Yellow Siberian. Small. Golden yellow. Good. August.

CHERRIES

One year old, \$1.00; Two year old, \$1.25
Bing. Sweet. Fruit large, black, very fine. Late. July.

Black Tartarian. Sweet. Very large, purplish black, tender, juicy, delicious.

Early Richmond. Pie. Medium. Dark red; juicy, rich, acid. June.

English Morello. Pie. Fair size. Blackish red. Rich acid. Aug.
Lambert. Sweet. Large. Deep, rich red. Fine quality. Mid-July.

Late Duke. Large. Light red. Sub-acid. Late July.

PLUMS AND PRUNES

Prices: One year old, \$1.00; Two years old, \$1.25

Abundance. Large. Bright cherry red. Freestone. June.
Bradshaw. Reddish purple. Adheres partly to stone. July.
Columbia. Largest size, nearly globular. Freestone. August.
Damson. Small; oval. Bluish purple. Rather tart. August.
Green Gage. Small; round. Flesh pale green. Freestone. July.
Hungarian. Very large. Dark red. Juicy and sweet. August.
Italian. (Fellemborg). Large. Oval. Dark purple. Freestone. August.

PEARS

1 year old, \$1.00; 2 years, \$1.25; 3 years, \$1.50

SUMMER VARIETIES

Bartlett. Large, skin thin, highly flavored. Aug.-Sept.
Beurre D'Anjou. Large, handsome, fine flavor. September.
Clapp. Very large; yellow and dull red; rich. August.
Flemish Beauty. Large, juicy, rich; popular. Sept.-Oct.

WINTER VARIETIES

Crocker Bartlett. New, large, oblong, rich, golden. October.
Winter Bartlett. Large; resembling Bartlett. Late.
Winter Nellis. Medium, fine grained; rich, aromatic. Dec.

May Duke. Large. Rich, dark red. Sub-acid. One of the earliest.

Royal Ann. (Napoleon Bigarreau). Large. Yellow, spotted red. Very firm, juicy and sweet. Early.

Maynard. Large, round, firm. Dull red. Rich and sweet. July.
Petite. French. Medium size; egg shaped. Violet purple. August.

Silver. Very large. Superior for drying and canning. Sept.

Sugar. Very large. Dark purple. Rich in sugar. August.

Yellow Egg. Very large. Deep golden color. Rather acid. August.

PEACHES

Extra Choice Stock, \$1.00 each

Crosby. Rich orange with red blush. Freestone. Medium late.

Early Alexander. One of the largest and best extra earlies.

Early Crawford. Very large. Yellow with red cheek. August.

Late Crawford. Flesh deep yellow, juicy, rich. September.

Phillip's Cling. Large. Yellow. Flesh firm. Late August.

THE BEST SPRAYS AND FERTILIZERS ARE LISTED
ELSEWHERE IN THIS CATALOG.

APRICOTS

First Grade Stock, \$1.00 each.

Blenheim. Deep orange. Tender, rich and juicy. Last of June.**Moorepark.** Very large. Fine for canning. July to August.**Royal.** Large; sweet, rich, juicy. July.**GRAPES**

Two Year Old Plants, 50c each.

Concord. Large, black grape. Round, sweet and pleasant. August.**Moore's Diamond.** Greenish white, juicy; very little pulp.**Moore's Early.** Berry large, resembling Concord, but earlier.**Niagara.** Large, yellowish white, juicy, vinous and sprightly.**Worden.** A seedling of the Concord. Berry round and black.**PHENOMENAL BERRY**

Originated by Luther Burbank. A cross between the red raspberry and dewberry. Called an improved form of Logan berry; larger, more productive and sweeter, but soft and not so good for shipping. Stock very limited. Price, 25c each; \$2.50 dozen.

LOGANBERRY

A strong, trailing vine. Fruit large, with shape of the blackberry and color of the raspberry, and flavor a combination of both. Stock is limited. Price, 25c each; \$2.50 dozen.

NUT TREES

Butternut (White Walnut). A native of the Eastern States. It is a beautiful tree, and bears large nuts filled with rich, oily kernels.....Price, \$1.00 to \$1.25

Chestnut (American Sweet Chestnut). The nuts are superior to the European and Japanese, although not so large. A valuable shade tree.....3 to 4 ft., \$1.00; 4 to 6 ft., \$1.25

English Walnut. A large, ornamental tree, producing delicious thin-shelled nuts.....Price, \$1.00 to \$2.50

QUINCE

Price, \$1.00 each.

Champion. Very large and handsome. Cooks tender without hard spots. Flavor delicate. Color greenish yellow.**Orange.** Large. Fine golden yellow flesh of excellent flavor.**RASPBERRIES**

Strong plants, 15c each; \$1.50 per dozen.

Cumberland. Black, very large, firm. Best mid-season market.
Cuthbert. A remarkably strong, hardy, red variety. Large, rich.**Gregg.** Black; best late blackcap. Large and of fine flavor.**St. Regis.** Berries bright crimson, large, rich; good shipper.**BLACKBERRIES**

Price, 25c each; \$2.50 per dozen.

Evergreen. Berries large, black, sweet, rich and delicious.**Mammoth.** Enormously productive, very early and very large.**Himalaya Giant.** A strong, rampant, trailing plant; very productive and hardy. Fruit large, handsome and of fine quality.**GOOSEBERRIES**

Price, 25c each; \$2.50 per dozen.

Oregon Champion. Large, light green, round, fine flavored.**Josselyn.** Large, smooth, prolific, hardy, and of best quality.**CURRANTS**

Price, 25c each; \$2.50 per dozen.

Good two-year-old plants of the following varieties: Perfection, White Transparent, Black Naples and Fay's Prolific.

MULBERRY TREES

Russian. Valued as an ornamental shade tree, and the fruit is quite popular in some sections. Very rapid growing.

Price.....4 to 6 ft., \$1.75

**INVICTA LAWN GRASS MIXTURE**

This mixture has established a reputation for us in this line, and we are very particular that no seed shall enter into it that will blemish that reputation.

It is composed of the finest lawn grasses in correct proportions to produce a fine, velvety, tough turf that will be green all the year. To accomplish this we have chosen early, medium and late varieties, some deep rooted, some shallow, and some creeping rooted to bind the others together and form a dense, thick matted turf. There are no coarse or cheap grasses in this mixture. It contains a small amount of White Clover to make a quick showing and to protect the more delicate grasses until they are firmly established. The grasses will eventually crowd out the clover, leaving a fine grass lawn.

One pound of this seed is sufficient to sow about two hundred and fifty square feet of new lawn. Less seed is required to reseed an old lawn. Old lawns should be loosened up with a rake occasionally, and reseeded.

Price.....1 lb., 55c; 5 lbs. or more, 53c per lb.

Prices are F. O. B. Seattle, transportation

KENTUCKY BLUE GRASS

For lawns, some prefer straight Kentucky Blue Grass, and it certainly does produce a splendid lawn if one has the time and patience to devote to it. It takes a long time to become established, but when once established it is permanent. Our seed is extra fancy.

Price.....1 lb., 55c; 5 lbs. or more, 52½c per lb.

CREEPING BENT

A valuable grass for lawns, putting greens, etc., on account of its fine texture and creeping roots which form a tough, enduring turf. It is seldom used alone, but is included in the best lawn mixtures.

Price.....1 lb., 55c; 5 lbs. or more, 50c per lb.

WHITE DUTCH CLOVER

A dwarf, spreading plant with white blossoms, included in most lawn grass mixtures to make a quick showing and act as a nurse crop for the finer grasses; seldom used alone. Our seed is extra fancy; none better.

Price.....1 lb., 85c; 5 lbs. or more, 80c per lb.

charges additional, and are subject to change.

GRASS AND CLOVER SEEDS

We Handle Only the Very Best Seeds Obtainable. There Are None Better.

INVICTA PASTURE MIXTURE

A splendid mixture designed to furnish abundant pasture during practically the entire year. Only the most suitable varieties are used, and none but the finest seed. The best mixture possible for the purpose. Twenty-five pounds per acre. Price.....1 lb., 35c; 10 lbs., \$3.30; 100 lbs., \$30.00

INVICTA POULTRY PASTURE

A mixture suitable for sowing in poultry runs, furnishing a large amount of green food, so necessary to successful poultry culture, and greatly reducing food bills. This will form a tough sod, not easily destroyed; 30 lbs. per acre. Price.....1 lb., 35c; 10 lbs., \$3.30; 100 lbs., \$30.00

INVICTA HAY MIXTURE

This mixture is composed of tall growing grasses, maturing at the same time, furnishing an abundance of nutritious hay on ordinary meadow land. It is the best possible mixture for the purpose, and is composed of only the very best seed of the most suitable grasses. Twenty to thirty pounds per acre. Price.....1 lb., 35c; 10 lbs., \$3.30; 100 lbs., \$30.00

TIMOTHY (*Phleum pratense*)

The best known grass for hay, and the most profitable for market, as it brings highest prices. Does best on moist, loamy soil. Should be cut just when the blossoms fall. Twenty to twenty-five pounds per acre. Our seed is extra fancy, the best that can be procured. Price.....1 lb., 25c; 10 lbs., \$2.30; 100 lbs., \$20.00

ENGLISH OR PERENNIAL RYE GRASS (*Lolium perenne*)

A very valuable grass in this section for either hay or pasture. It thrives on almost any soil, and is high in food value. Thirty to forty pounds per acre. Price.....1 lb., 25c; 10 lbs., \$2.30; 100 lbs., \$20.00

ITALIAN RYE GRASS (*Lolium italicum*)

Produces green feed late in the season, and for that reason is valuable in pasture mixtures. Forty pounds per acre. Price.....1 lb., 25c; 10 lbs., \$2.30; 100 lbs., \$20.00

KENTUCKY BLUE GRASS (*Poa pratensis*)

One of the finest lawn grasses, and also valuable in pasture mixtures; very nutritious and permanent. For pasture, twenty-five pounds per acre if sown alone. Our seed is extra fancy. Price.....1 lb., 55c; 10 lbs., \$5.25; 100 lbs., \$50.00

ALFALFA (*Medicago sativa*)

Alfalfa is the most valuable hay and forage plant in all localities where it can be grown successfully. Our seed is tested, and is the very best that can be procured. Generally sown at the rate of fifteen to twenty pounds per acre. Price.....1 lb., 55c; 10 lbs., \$5.25; 100 lbs., \$50.00

TURKESTAN, OR DRY LAND ALFALFA (*Medicago Turkestanica*)

Very similar to *Medicago Sativa*, except that it is more hardy and may be grown more successfully on very dry soils. Price.....1 lb., 55c; 10 lbs., \$5.25; 100 lbs., \$50.00

RED CLOVER (*Trafolium pratense*)

The most valuable hay and forage crop that can be grown west of the Cascades, being to this section what Alfalfa is to the country east of the mountains. It is a legume, drawing nitrogen from the air, making it one of the greatest fertilizers known. Seed is sown at the rate of eight to twelve pounds per acre. Great care should be used in purchasing seed. Our seed is especially good. Price.....1 lb., 65c; 10 lbs., \$6.40; 100 lbs., \$63.00

MAMMOTH RED CLOVER (*Trafolium medium*)

Grows very rank and coarse, and is used mostly as a fertilizer, for plowing under. Eight to twelve pounds per acre. Price.....1 lb., 65c; 10 lbs., \$6.40; 100 lbs., \$63.00

WHITE DUTCH CLOVER (*Trifolium repens*)

A small, creeping, perennial variety, valuable for lawns and pasture. Our seed is the very best procurable. It is seldom used alone. For pasture, five or six pounds per acre is mixed with other seeds. Price.....1 lb., 85c; 10 lbs., \$8.00

WHITE SWEET CLOVER, OR BOKHARA (*Melilotus alba*)

A biennial, used to some extent for hay and pasture, but most valuable for bee pasture. Twenty to thirty pounds per acre. Price.....1 lb., 55c; 10 lbs., \$5.25; 100 lbs., \$50.00

ALSIKE CLOVER (*Trifolium hybridum*)

Especially useful on land that is too wet and cold for Red Clover. Makes very good hay. Eight pounds per acre. Price.....1 lb., 65c; 10 lbs., \$6.40; 100 lbs., \$63.00

CRIMSON CLOVER (*Trifolium incarnatum*)

An annual, useful principally as a cover crop or to plow under. Price.....1 lb., 50c; 10 lbs., \$4.75; 100 lbs., \$45.00

Prices are subject to change. Write for price list.

RED TOP (*Agrostis vulgaris*)

This is fancy, re-cleaned seed, free from chaff, and only one-half as much seed is required as of the seed in chaff, commonly sold. It is an excellent grass in pasture mixtures, and is especially valuable in wet places where other grasses will not grow. Ten pounds per acre.....
Price, 1 lb., 35c; 10 lbs., \$3.30; 100 lbs., \$30.00

CANADIAN BLUE GRASS (*Poa compressa*)

A hardy perennial with creeping root-stalks which form a strong turf. It is a splendid lawn and pasture grass, being harder than Kentucky Blue Grass. It differs from Kentucky in flattened, shorter stems and bluer color.....
Price, 1 lb., 25c; 10 lbs., \$2.00; 100 lbs., \$18.00

CREEPING BENT

Valuable for lawns on account of its fine texture and creeping root-stalks which form a tough turf that is not damaged by tramping.....Price, 1 lb., 55c; 10 lbs., \$5.25; 100 lbs., \$50.00

MEADOW FESCUE (*Festuca pratensis*)

Included in all the best pasture and hay mixtures. It is very hardy and comes early in spring and again in fall.....
Price, 1 lb., 55c; 10 lbs., \$5.25; 100 lbs., \$50.00

RED OR CREEPING FESCUE (*Festuca rubra*)

Has creeping roots which form a dense and lasting turf. Resists drought and thrives in poor gravelly or sandy soils where less hardy grasses will not grow.....
Price, 1 lb., 60c; 10 lbs., \$5.75; 100 lbs., \$55.00

ORCHARD GRASS (*Dactylis glomerata*)

Valuable in pasture mixtures on account of being about two weeks earlier than other grasses, and continues when other grasses are withered by dry weather. Thirty pounds per acre.....Price, 1 lb., 40c; 10 lbs., \$3.50; 100 lbs., \$33.00

BROME GRASS (*Bromus inermis*)

A perennial, resisting drought and cold and valuable for binding soil on embankments. Not recommended for hay or pasture where better grasses can be grown. Forty pounds per acre.....Price, 1 lb., 50c; 10 lbs., \$4.75; 100 lbs., \$45.00

CRESTED DOG'S TAIL (*Cynosurus cristatus*)

Used in mixtures for pastures, putting greens and lawns. It stands severe drought and hard usage. Twenty-five pounds per acre.....Price, 1 lb., 55c; 10 lbs., \$5.25; 100 lbs., \$50.00

TALL MEADOW OAT GRASS (*Avena elatior*)

A valuable grass in pasture mixtures on account of being very early; it also makes very good hay. It is hardy, deep rooting and stands considerable drought. Seldom used alone.....Price, 1 lb., 50c; 10 lbs., \$4.75; 100 lbs., \$45.00

SUDAN GRASS (*Andropogon sorghum*)

A valuable hay and forage crop of recent introduction, especially useful in hot, dry localities, but also grown successfully west of the Cascades. It is an annual, like Sorghum and Millet, and must be seeded each year. Two to four cuttings may be had during the season. If sown in rows and cultivated, two to six pounds of seed is sufficient for an acre; if broadcast fifteen pounds will be required. The seed should not be sown until all danger of frost is past.....
Price, 1 lb., 25c; 10 lbs., \$2.30; 100 lbs., \$21.00

FORAGE AND SILAGE CROPS**THOUSAND HEADED KALE**

One of the most valuable crops on the Pacific Coast, as it supplies green food for poultry, cows and hogs during the winter. In this locality it is left in the ground during the winter, cut, or the lower leaves pulled off as wanted for feeding, and is seldom damaged by freezing. The plants are generally started in seed bed and transplanted like cabbage, three feet apart in rows four feet apart. They may be planted after an early harvested crop is removed. One pound of seed will furnish sufficient plants for an acre.....
Oz., 10c; ¼ lb., 25c; 1 lb., 75

MILLET

Millet is used mostly as a catch crop to take the place of some crop that has failed or to sow after an early harvested crop has been removed. It may be sown in spring after danger of frost is past, or as late as the last of July, and makes a fair quality of hay.

Golden Millet. Especially valuable for use on poor soils. It is early maturing and grows about four feet high. The seed is yellow. Twenty-five pounds per acre.....
1 lb., 20c; 10 lbs. or more, 15c per lb.

Siberian Millet. An early, very hardy variety, best for hot, dry localities. Grows about four feet high and produces a great amount of excellent hay. Sow at the rate of about twenty-five pounds per acre.....
1 lb., 20c; 10 lbs. or more, 15c per lb.

Japanese Millet. Makes a rank growth, sometimes six feet high and produces a wonderful amount of hay, forage or silage.....
1 lb., 20c; 10 lbs. or more, 15c per lb.

JAPANESE BUCKWHEAT

The best and most productive variety. The plants are stronger growing and more spreading than the Silver Hull variety, and the grain ripens a little later.....
1 lb., 15c; 10 lbs. or more, 14c per lb.

DWARF ESSEX RAPE

Dwarf Essex Rape furnishes a great amount of forage and pasture during the dry season in summer when other green food is scarce, and is especially valuable for hogs and sheep. It is also a splendid cow food, but is liable to taint the milk. It may be sown any time during the spring and summer, and is useful as a catch crop to be sown after some early crop is harvested. When sown broadcast, about five pounds of seed is required for an acre.....
1 lb., 20c; 5 lbs. or more, 15c per lb.

MARROW CABBAGE

Similar to Thousand Headed Kale, both in growth and usefulness. It grows somewhat larger, but is less hardy and is more liable to freeze out during the winter.....
Oz., 15c; ¼ lb., 30c; 1 lb., \$1.00

KAFFIR CORN

Of little use west of the Cascade Mountains, but a valuable forage plant for the country east of the mountains. Grows four or five feet high, with numerous large leaves greatly relished by cattle and horses.....
1 lb., 10c; 10 lbs. or more, 9c per lb.

SUNFLOWER

A valuable poultry and hog food, when mixed with other grains. Fine leaves are relished by cattle. Very productive, easy to grow, and should be more generally grown in this section.....
1 lb., 15c; 10 lbs. or more, 15c per lb.

FLAX

Sow in spring, late enough to avoid frosts, but early enough to mature before fall. If grown for seed, thirty pounds of seed is sufficient for an acre, if for fiber a larger amount should be sown.....
1 lb., 15c; 10 lbs. or more, 14c per lb.

ROOT MAGGOTS ARE A CURSE, and many have given up trying to grow Thousand Headed Kale and Dwarf Essex Rape, as well as Cabbage, Radishes, Onions, etc., on account of them. They are now a thing of the past; a horrible nightmare as it were. They are simply, easily and cheaply eliminated, abolished and destroyed; and nobody will mourn their passing. There is no longer any excuse for them. **MAG-O-TITE DOES IT.**

For Aphis on Thousand Headed Kale, Dwarf Essex Rape, or any other plant, use Invicta Spray or Black Leaf 40.

SEED GRAINS

OATS

Swedish Select. The most popular variety in the Northwest. The head is large and spreading, and the grain large, plump and heavy. Unequalled in quality.....

.....6c per lb., 100 lbs., \$5.00

Abundance. A new Scotch oat, yielding heavy crops. Medium early; has a spreading head, and the grain is white, of medium size and weight.....

.....6c per lb.; 100 lbs., \$5.25

Victory. A heavy yielding head oat, resistant to lodging. The grain is white with a slight reddish shade.....

.....6c per lb.; 100 lbs., \$5.00

Banner. A very popular white, head oat. The grain is white and heavier than the average.....

.....6c per lb.; 100 lbs., \$4.50

Black Alaska. A black oat, used to sow with Vetch or Peas. Sometimes sown in fall, but not so hardy as Gray Winter Oats, and more liable to freeze out.....

.....6c per lb., 100 lbs., \$4.75

Gray Winter Oats. Especially valuable for fall sowing. The grain is dark gray, large, plump, and yields well. The best for sowing with Vetch or Peas.....

.....6c per lb.; 100 lbs., \$4.75

Hulless Oats. A new variety, growing like other oats, but the grain shells out like wheat when threshed, making them especially valuable for poultry food and other purposes.....

.....1 lb., 25c; 5 lbs. or more, 15c per lb.

FIELD PEAS

A valuable grain, hay, silage and soiling crop which although quite generally grown in Western Washington, is deserving of even more consideration. The plants make excellent hay and silage, the ground grain is splendid hog and poultry food, and the plant, being a legume, is one of the greatest fertilizers, whether harvested or turned under.

Yellow Canadian Field Peas. The most generally grown variety. The seeds are small, round, smooth, and light yellow.....

.....7c per lb.; 100 lbs., \$6.50

Blue Bell Field Peas. The seed is larger than the Yellow Canadian, and is of a bluish color; similar in other respects.....

.....8c per lb.; 100 lbs., \$7.50

VETCH

One of the most valuable crops grown in the Northwest for hay, silage, pasture, soiling and green manure. Being a legume, like Peas, Clover, and Alfalfa, it draws nitrogen from the air and distributes it in the soil, making it one of the best and most economical fertilizers.

Oregon Vetch. Sometimes called Spring vetch, which name is misleading, for it is the variety used exclusively west of the Cascades for either fall or spring sowing.....

.....15c per lb.; 100 lbs., \$12.50

Hairy or Winter Vetch. This variety is used east of the mountains for fall sowing.....

.....35c per lb.; 100 lbs., \$33.00

WHEAT

Marquis. A new, early, red, spring wheat. Does not shatter easily and stands up well. A short, plump, very hard kernel of good quality. Although a spring wheat, it may be sown in fall west of the Cascade Mountains.....

.....Write for prices.

Bluestem. An old standard white spring wheat, sown in fall west of the Cascades.....

.....Write for prices.

Red Russian. A red winter wheat grown extensively in Eastern Washington.....

.....Write for prices.

RYE

ROSEN RYE. A new variety, procured by us from Michigan. It was developed by the Michigan Agricultural College, where for three years it averaged 41.3 bushels per acre. The straw is vigorous and stools to a remarkable degree. The grain is large, plump, heavy, and of a beautiful color. We have only a limited stock.....

Petkuser Rye. A heavy yielding winter rye. The heads are long, four rowed, and the kernels large.....

.....6c per lb., 100 lbs., \$5.50

Seed Rye. The old standard variety.....

.....6c per lb.; 100 lbs., \$5.00

BARLEY

White Hulless. This barley threshes out like wheat, leaving the large, plump, white kernels free of hulls, making it a valuable stock and poultry food. It is sometimes sown in fall west of the Cascade Mountains, and may be sown as late as July.....

.....Write for prices.

Beardless Barley. Free from beards, making it much superior to the bearded varieties for hay.....

.....Write for prices.

Wisconsin Pedigree Barley. The best of the bearded varieties. The heads are exceedingly long and uniformly well filled.....

.....Write for prices.

Seed Barley. The standard variety most commonly grown until recently.....

.....Write for prices.

CORN

Improved King Philip. This is an improved strain of the old King Philip. It is a very early, red, flint variety, and is adapted to the Northwest.....

.....15c per lb.; 100 lbs., \$10.50

Pride of the North. A favorite variety for this locality. An early, yellow, dent corn.....

.....15c per lb.; 100 lbs., \$10.50

Minnesota No. 13. A new variety of yellow dent corn. Large and early.....

.....15c per lb.; 100 lbs., \$10.50

Iowa Gold Mine. A splendid, medium early, yellow, dent corn, adapted to this locality.....

.....15c per lb.; 100 lbs., \$10.50

Red Cob Ensilage Corn......

.....15c per lb.; 100 lbs., \$10.50

Early White Dent Fodder Corn......

.....15c per lb.; 100 lbs., \$10.50

Evergreen Sweet Fodder Corn......

.....15c per lb.; 100 lbs., \$13.50

ROOT CROPS

MANGELS, OR STOCK BEETS

Mangels are the most valuable crop that can be grown to supply succulent green feed for stock and poultry. The climate of the Pacific Northwest is especially adapted for their growth, and they produce immense crops.

KELWAY'S BEST OF ALL. This is Kelway's special, is very popular in England, and we have no doubt that it will prove very valuable in this country. It is described as very large, in shape between intermediate and tankard, with pale yellow skin, small top, and extremely productive.....

Pkt., 15c; ½ lb., 65c; 1 lb., \$1.25

KELWAY'S CRIMSON KING. Very large, well formed roots with small tops and deep red color. Our seed is imported direct from Kelways.....

Pkt., 15c; ½ lb., 65c; 1 lb., \$1.25

KELWAY'S MODEL GOLDEN TANKARD. Kelway's strain of the Golden Tankard type. The tops and neck are small; the roots large, with bottom larger than the top. The color is deep orange below ground and gray above. The best variety for shallow soil.....

Pkt., 15c; ½ lb., 65c; 1 lb., \$1.25

Danish Sludstrup. A new variety, originating in Denmark, and one of the best. It is a large, long, smooth mangel of uniform shape and reddish yellow color.....

Pkt., 10c; ½ lb., 50c; 1 lb., 90c

Giant Intermediate, or Gate Post. A large yellow skinned and white fleshed variety of large size and half-long shape.....

Pkt., 10c; ½ lb., 50c; 1 lb., 90c

Long Red Mangel. A large, long, light red variety, growing well out of the ground, and easily harvested.....

Pkt., 10c; ½ lb., 50c; 1 lb., 90c

Half Sugar Mangel. Rich in sugar, combining the food value of the sugar beet with the size of the mangel. It is bronze-green above ground and light gray below, ovoid in shape; growing well out of the ground, and easily harvested.....

Pkt., 10c; ½ lb., 50c; 1 lb., 90c

SUGAR BEET

Vilmorin's Improved Sugar Beet. One of the richest in sugar content, and very productive. The roots are of medium size, with white flesh.....

Pkt., 10c; ½ lb., 60c; 1 lb., \$1.00

RUTA BAGA, OR SWEDE TURNIPS

An excellent crop for stock feeding, treated the same as winter turnips except that they require a longer season for growth. They are larger and richer than turnips. The only objection to them has been their liability to root maggots, but now that Mag-o-tite is available that is no longer a serious matter.

American Purple Top Improved. Of very large size, nearly globular, immensely productive, and a good keeper. The flesh is yellow, firm, and rich.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.25

Skirving's Purple Top Ruta Baga. A round or oval variety of large size. The flesh is yellow and of excellent quality.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.25

Yellow Swede. The roots are oblong; dull reddish color above ground but yellow underneath. A splendid keeper.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.25

White or Sweet Russian. An excellent keeper and very desirable either for table or for stock. The roots are very large and nearly globular. The flesh is white, very firm and sweet.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.25

STOCK CARROTS

Carrots are very valuable as a crop for stock feeding, and should be more generally grown in this locality for that purpose.

Oxheart, or Guerande. This variety grows very large, and is probably the best for stock feeding. The roots are short, very thick, ending abruptly in a small tap root. The flesh is bright orange, fine grained and sweet.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.00

Mastodon Stock Carrot. A very productive, half-long, white carrot of large size.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.00

Yellow Giant Stock Carrot. A very large and productive yellow fleshed stock carrot. An excellent keeper.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.00

Large White Belgian. A very large, half-long, white carrot. Very productive and a good keeper.....

Pkt., 10c; ¼ lb., 40c; 1 lb., \$1.00

FERTILIZERS

LAWN, ROSE AND FRUIT FERTILIZER

To maintain a lawn that you may be proud of; the largest, brightest and best formed flowers; or the most perfect fruit in abundance, it is necessary to use a suitable fertilizer in liberal quantities. This fertilizer is prepared for the purpose of accomplishing those results.....

1 lb., 15c; 6 lbs., 40c; 13 lbs., 75c; 25 lbs., \$1.25; 100 lbs., \$4.25

BONE MEAL FERTILIZER

One of the most valuable fertilizers, and in some cases the most economical form of phosphoric acid and nitrogen. It is slow in action, the plant food is taken up only as fast as required by the plants, and for that reason is splendid for forming lawns, rose beds, etc. It forms an important part of the best mixed fertilizers.....

6 lbs., 40c; 13 lbs., 75c; 25 lbs., \$1.25; 100 lbs., \$4.25

SAKANA BRAND FISH FERTILIZER

A high grade fertilizer consisting of fish scrap dried and finely ground. Very high in nitrogen and phosphoric acid.....

100 lbs., \$4.25

TANKAGE

A slaughter-house by-product, dried and ground. A valuable quick acting fertilizer.....

100 lbs., \$4.00

SUPERPHOSPHATE

An economical form of phosphoric acid.....

Per sack, 125 lbs., \$1.75

GYPSUM, OR LAND PLASTER

Not really a fertilizer, as it contains no plant food, but by causing a chemical change in the soil is very beneficial to clover and other legumes.....

100 lbs., \$1.00

GROUND LIME ROCK

For sweetening sour soil.....

100 lbs., \$1.00

H. O. LIME

Hydrated lime for sweetening sour soil.....

50 lbs., 85c; 100 lbs., \$1.50

SWANSDOWN LIME

A very fine grade of hydrated lime for use on lawns.....

50 lbs., \$1.00; 100 lbs., \$1.75

VEGETABLE FERTILIZER

If you have not been entirely satisfied with your garden the past season, use this fertilizer and produce prize vegetables. No soil can produce crops year after year without being supplied with material to work with. This supplies the necessary material in the best form and proportions.....

6 lbs., 40c; 13 lbs., 75c; 25 lbs., \$1.25; 100 lbs., \$4.25

SHEEP GUANO

Steam dried and finely pulverized. Very high in fertilizing values; not offensive to handle. The best of the natural fertilizers for practically all purposes.....

25 lbs., \$1.00; 50 lbs., \$1.75; 100 lbs., \$3.00

BLOOD AND BONE

Dried and ground. A quick acting fertilizer valuable for top dressing when quick results are required.....

100 lbs., \$4.00

NITRATE OF SODA

A very valuable quick acting nitrogenous fertilizer which will produce wonderful results when correctly used. Orchardists and others requiring large quantities will please write for special quantity prices.....

Less than sack lots, 8c per lb; per sack, 200 lbs., \$12.00

SULPHATE OF POTASH

This is the chief source of potash, a very necessary fertilizing element. There is very little available at this time, and the price is extremely high; however, we are fortunate in securing a limited supply which we can furnish at the following prices as long as it lasts.....

Less than sack lots, 15c per lb; per sack, 100 lbs., \$12.50

WIZARD FERTILIZER

A highly concentrated mixed fertilizer.....

2 lbs., 40c; 25 lbs., \$2.50; per sack, 125 lbs., \$11.50

ROOT MAGGOTS HAVE HAD THEIR DAY MAG-O-TITE

MAKES IT POSSIBLE TO GROW RADISHES : TURNIPS : CABBAGES KALE AND ONIONS

Root Maggots have been the worst pest that the Northwest has ever known. Many have given up growing some crops on account of them; others have persisted in trying, but have met with partial or complete failure year after year. Thousands have written to the Agricultural Colleges for a remedy, and have been answered that after many years of experimenting they were not yet able to suggest any practical cure.

Mag-o-tite is a positive cure for this serious evil. It acts as a preventive by repelling the fly which lays the eggs from which the maggots are hatched; and it will also destroy maggots which are already in the soil. It is not a new experiment. It has been thoroughly tested during the past several years, and has proved conclusively that it will do the work.

It is intended primarily as a remedy for Root Maggots, but has proved very effective on many other insects, among which are Strawberry Crown Borer, Cabbage Worms, Asparagus Miner, Flea Beetles, Cut Worms, and all kinds of Slugs.

It is very inexpensive and easy to apply. Simply scatter a generous quantity of it on the ground before sowing the seed, mixing it into the soil in the rows. One or two applications should be given later, after the plants are up, by scattering it on the ground around the plants, and working it into the soil by cultivation. It will not injure the plants. Try it. If you are not entirely satisfied with the results, tell us and we will refund your money.

Price, 2 lbs., 25c; 4 lbs., 50c; 8 lbs., \$1.00; 25 lbs., \$2.50; 100 lbs., \$8.50, F. O. B. Seattle.

Prices do not include postage, freight or express charges.

NORTHERN SAVINGS AND LOAN ASSOCIATION,

320 Globe Building,

Randall-McLoughlin,
Seattle.

Seattle, Wash., Aug. 13, 1919.

Gentlemen:—

I cannot resist the temptation to write regarding your powder "Magotite." I had planted 15 dozen Aster plants, and was intending to buy a new sprayer and "dope" to give them when I asked you if you had anything that would kill the bugs, and on your recommendation took home a package. The plants were already krinkling up with the bugs, and with little hopes that the powder would prove efficient, I drew a little ring around each plant and sprinkled in the powder. The result is simply marvelous.

Every plant came out in perfect shape, and no signs that there was ever a bug on them. We had almost decided to give up raising Asters, and when I think of the number of times I sprayed last year, the expense and back-breaking work, and then see the beautiful bed this year, with a few minutes' work and trifling expense, I feel that I owe it to other flower lovers to commend it.

I used the powder on cucumbers and cabbage with the same result. Not a bug on any of them.

Yours very truly,

S. C. Calderhead.
Seattle, Wash., July 16, 1919.

Randall-McLoughlin,
Seattle.

3000 Railroad Ave.,
Seattle, Wash., July 16, 1919.

Gentlemen:—

I promised you recently that I would give you a report on Magotite, and am now able to say that it is all that you claim for it. I have used it on cabbages, radishes, onions and strawberries.

There is no doubt whatever that it is a sure remedy for root maggots, and it has entirely eliminated the strawberry crown borer wherever I have used it. Several of my customers have also reported to similar results from the use of Magotite. My business as a gardener has given me an excellent opportunity to check up in making these tests, and I can with all confidence assure you that Magotite is all right and quite what you claim for it.

Yours truly,

A. M. Fry.

Randall-McLoughlin,
Seattle.

Seattle, Wash., June 5, 1919.

Gentlemen:—

It is hardly possible to pen the good results of Magotite. We had tried for eight years to raise cabbages, but failed on account of maggots. On the first trial of Magotite we have had great success, also with cauliflower, and our radishes were certainly wonderful, fine, big, red ones with not a maggot to be found.

Yours sincerely,

Wm. H. Shorey.

INOCULATE YOUR ALFALFA, CLOVERS, PEAS, VETCHES AND ALL OTHER LEGUME CROPS WITH

Mulford Cultures

Small Cost—Large Returns—Easy to Use—No Labor Expense

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of legumes, or soil. Enormous numbers of these very valuable and desirable bacteria are thus available to you in every package of Mulford Culture, and may readily be applied to your seed.

Increase Your Crops. Improve Your Soil.

Legumes offer the best known means of maintaining soil fertility and rejuvenating overcropped and wornout fields. They add both humus and nitrogen to your soil, and thus increase the yield of any future crop.

The United States Department of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitro-fixing bacteria to induce a prompt catch and increase yield.

Mulford Cultures are scientifically prepared and tested by experts in the biological laboratories of H. K. Mulford Co., Philadelphia, with the same degree of care as Mulford Antitoxins, Serums, Vaccines, etc., which are standard all over the world.

Be sure to specify in your order what crop you wish to inoculate. There is a different strain of bacteria for each of the following legumes:

ALFALFA, RED CLOVER, WHITE CLOVER, SWEET CLOVER, ALSIKE CLOVER, VETCH, FIELD BEANS, GARDEN PEAS, SWEET PEAS, GARDEN BEANS, AND LIMA BEANS.

It is of no use on crops other than legumes.

PRICES

Mulford Cultures for the varieties of legumes listed above are supplied at the following prices:

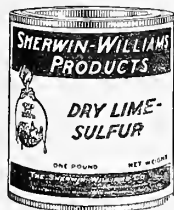

Five Acre Size	\$5.00
One Acre Size	1.50
One-Quarter Acre Size50

SMALL SIZE, For Garden Peas, Garden Beans, Lima Beans and Sweet Peas, only, 25c
Postage additional.

Alfalfa plant on the left not inoculated. Plant on the right inoculated with Mulford Culture for Alfalfa. All other conditions identical. This contrast speaks for itself.

SPRAYS

DRY LIME—SULFUR

The use and success of Lime-Sulfur Solution is known to practically every fruit grower in the country, and every grower is also familiar with the inconvenience and unpleasantness in handling liquid Lime-Sulfur. The barrels are very heavy to handle—there is over 50% water, which means

heavy freight charges. It freezes in cold weather and leaks in summer.

Sherwin-Williams Dry Lime-Sulfur is standard Lime-Sulfur Solution in dry powdered form—the first and only one of its kind on the market. It has all the advantages of the liquid material, but eliminates the disadvantages.

Price, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.50; 25 lbs., \$4.50; 50 lbs., \$8.00; 100 lbs., \$12.00.

REX LIME AND SULPHUR SOLUTION

For those who still prefer the Lime and Sulphur Solution, we supply this, the best of the old style sulphur sprays.

1 gallon, 75c; 5 gals., \$2.50; barrel, \$13.00

BLACK LEAF 40

A concentrated solution of nicotine sulphate guaranteed to contain 40% nicotine. Highly recommended for the destruction of Aphids and other soft bodied insects.

1 ounce (about 6 gallons of spray).....\$0.25
1/2 lb. (40 to 150 gallons of spray)..... 1.00
2 lbs. (160 to 600 gallons)..... 3.25
10 lbs. (800 to 3,000 gallons).....13.75

NICO-FUME LIQUID

For fumigating greenhouses and spraying for Aphids and other plant lice.

Price, 1/4-lb. can, 75c; 1-lb. can, \$2.00; 4-lb. can, \$7.50; 8-lb. can, \$14.50.

DRY ARSENATE OF LEAD

Stays thoroughly in suspension, giving uniform strength. It has maximum of killing power, speedy action and unquestionable effectiveness in controlling leaf eating and chewing insects. It has unusual adhesiveness, clinging to the foliage the longest possible time.

Price, 1/2 lb., 40c; 1 lb., 70c; 5 lbs., \$3.00

INVICTA SPRAY

A nicotine and soap compound spray for Roses, Fruit Trees, Bushes, Shrubs, Gardens and House Plants for the control of Aphids, Thrips, Leaf Hopper and other forms of plant lice. One quart of the compound will make ten gallons of spray. Price, 1 quart, 50c; 1 gallon, \$1.50

FUNGI-BORDO

Dry Powdered Fungi-Bordo is a true Bordeaux Mixture in dry powdered form, requiring only to be mixed with cold water to give a standard Bordeaux Mixture Spray.

Price, 1 lb., 60c; 5 lbs., \$2.50.

PARIS GREEN

A standard poison for killing all leaf eating insects. Cannot be shipped by parcel post.

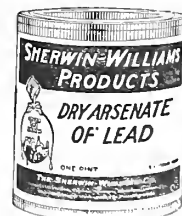

Price, 1/4 lb., 35c; 1 lb., 60c; 1 lb., \$1.00

NICO-FUME PAPER

Strongly saturated with nicotine, to be burned in greenhouse.

Air-tight can, 24 sheets, \$1.25

Air-tight can, 144 sheets, \$5.00

SPRAY APPLIANCES

AUTO-SPRAY NO. 1-D, COMPRESSED AIR SPRAYER.

The strongest and simplest compressed air sprayer. Two pumpings of about fifteen strokes of the plunger will discharge the contents under high and constant pressure. It is used for spraying trees, shrubs, vines, field crops, greenhouses, poultry houses, etc.; for applying Paris green, arsenate of lead, bordeaux, lime and sulphur, disinfectants, fly liquids, lice liquids, etc.

The tank is made of galvanized steel, and holds $3\frac{1}{2}$ gallons. The air pump cylinder is made of seamless brass tubing. Price, \$6.75

AUTO-SPRAY NO. 6, BUCKET PUMP

The most powerful bucket pump manufactured. Can easily generate a pressure of 200 lbs. It is double acting, and sprays perfectly on both the up and down strokes, making the spray continuous. The pump and valves, complete, are made entirely of brass. Shipping weight, 6 lbs. Price, \$4.75

AUTO SPRAY NO. 3-B

A general purpose orchard, field and whitewash sprayer, especially valuable for whitewashing. The heavy galvanized steel

reservoir has a capacity of eight gallons, the pump is on the principle of a force pump, and will generate a pressure of 100 lbs. Price, \$15.00

AUTO-SPRAY NO. 5

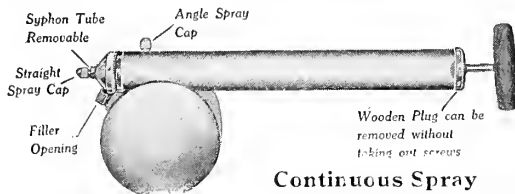

The ideal all-purpose hand sprayer, used for spraying trees, vines, garden truck, potatoes, or any field crop; also for handling whitewash, disinfectants, etc. The pump is made entirely of brass, and works on the same principle as the Auto-Spray No. 6. It may be used in connection with any bucket or tank, or may be used with the Knapsack as shown in cut.

Auto-Spray No. 5. Pump, Hose, Nozzle and Strainer; without Knapsack. Shipping weight 4 lbs. Price, \$5.00

Knapsack for Auto-Spray No. 5. A galvanized iron reservoir to be carried on the back. Shipping weight $7\frac{1}{2}$ lbs. Price, \$3.50

Extension for Auto-Spray No. 5. A curved brass extension. Shipping weight 1 lb. Price, 75c

WHEN APHIS APPEAR
ON YOUR ROSES
USE INVICTA SPRAY

Continuous Spray

AUTO-SPRAY NO. 25, CONTINUOUS ATOMIZER

A small hand atomizer, with a capacity of one quart, operating continuously on both the up and down stroke. It will handle all solutions, insecticides and disinfectants. Equipped with two spray caps, one for straight and one for angle spraying.

No. 25-B. One quart. Tin pump, galvanized tank\$1.00
No. 25-C. One quart. Tin pump, brass tank\$1.25

GARDEN HOSE

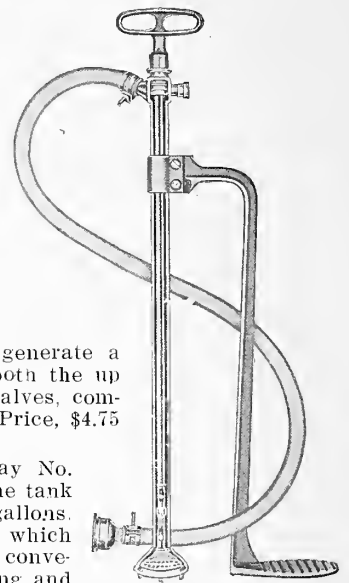

DEFIANCE Double Hexagon Hose. Extra strong and durable. Spirally woven cord in two thicknesses with rubber between. Best quality rubber. Seamless. Not liable to kink. Price per foot: $\frac{3}{4}$ inch, 25c; $\frac{5}{8}$ inch, 23½c; $\frac{1}{2}$ inch, 22c

LYON Smooth Cover Hose. Built like the Double Hexagon except that it is round and smooth. Spirally woven cord in two thicknesses. Seamless. Splendid quality rubber. Price per foot: $\frac{3}{4}$ inch, 24c; $\frac{5}{8}$ inch, 22½c; $\frac{1}{2}$ inch, 20½c

ZULU. Like Lyon, but a cheaper grade of rubber. Price per foot: $\frac{3}{4}$ inch, 21c; $\frac{5}{8}$ inch, 19½c; $\frac{1}{2}$ inch, 18c

COTTON Green Line Garden Hose. Good quality cotton hose. Price per foot: $\frac{3}{4}$ inch, 14c; $\frac{5}{8}$ inch, 13½c; $\frac{1}{2}$ in, 12½c

All prices are F. O. B. Seattle. Hose is furnished in any length up to 500 feet. Couplings 50c per set additional.

Auto-Spray, No. 6

AUTO-SPRAY NO. 3-D

The same as the Auto-Spray No. 3-B, except that it is larger, the tank having a capacity of twelve gallons, and is mounted on a truck, which makes it the best and most convenient outfit for general spraying and white-washing. Price, \$22.00

NON-CLOG JUNIOR SPRAY NOZZLES

The nozzle is a very important part of the spray outfit. This nozzle can be used for almost any kind of work; for spraying orchards as well as field crops. It is made with standard $\frac{1}{4}$ -inch pipe thread, and may be used on sprayers of other manufacture. It is furnished with four spray discs with different holes, so that the quantity of solution may be regulated.

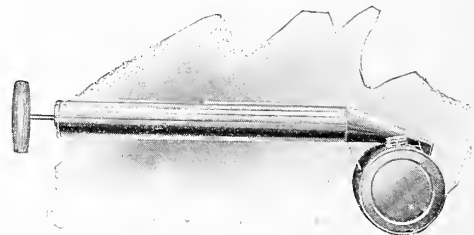

Non-Clog Junior. Brass. Straight.....Price, 75c
Non-Clog Junior. Brass. Angle.....Price, 75c

TWO FOOT BRASS EXTENSION

For tree work, two or more of these extensions may be screwed together. Price, 60c

BRASS ELBOW

For reaching the under side of leaves. Will fit either the shut-off or extension. Price, 40c

IDEAL SPRAYER NO. 125

A small, tin, hand sprayer, handling all kinds of sprays, disinfectants, fly liquids, lice liquids, etc. Capacity of tank, one quart. Price, 65c

MIDGET IDEAL SPRAYER NO. 122

Similar to the Ideal No. 125, except that it is smaller, and the tank holds only one pint of liquid. Price, 40c

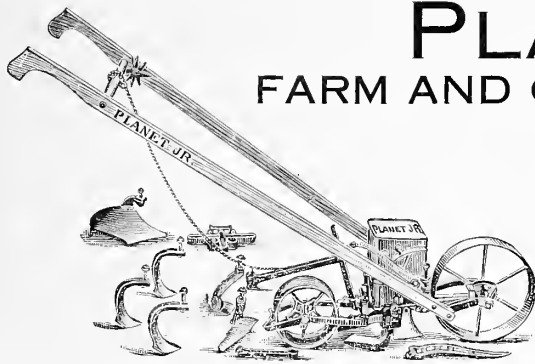

CONTINUOUS SPRAYER NO. 115

An excellent hand sprayer used for the same purpose as the Ideal, but provided with an air chamber, giving a continuous spray. Capacity one quart. Heavy tin. Price, \$1.00

PLANET JR.

FARM AND GARDEN IMPLEMENTS

DO YOUR WORK
EASIER
BETTER
AND
CHEAPER

No. 4

No. 4 PLANET JR. Combined Hill and Drill Seeder, Single Wheel Hoe, Cultivator and Plow

Sows all garden seeds from the smallest up to peas and beans in hills 4, 6, 8, 12, or 24 inches apart, or in drills at the proper thickness and depth, rolling down and marking the next row. By removing the seeder parts and substituting the tool frame, you have a first class single wheel hoe, cultivator and plow. Weight 50 lbs. Price, F. O. B. Seattle, \$20.25

No. 4-D PLANET JR. Hill and Drill Seeder The same as No. 4 without hoes, cultivator and plow attachments. These attachments may be added later if desired. Weight 40 lbs. Price, \$16.25

No. 3 PLANET JR. Hill and Drill Seeder

A favorite among onion growers, market gardeners and seedsmen. Cannot be used with cultivator attachments. Recommended for those who have work enough to warrant having separate implements. Weight 43 lbs. Price, \$19.25

No. 25 PLANET JR. Combined Hill and Drill Seeder, Double and Single Wheel Hoe, Cultivator and Plow.

As a seeder this is practically the same as the No. 4, and as a wheel hoe has the same steel frames and cultivating attachments as the No. 12 Double Wheel Hoe. Shipping weight 61 lbs. Price, F. O. B. Seattle, \$23.75

No. 11 PLANET JR. Combined Double and Single Wheel Hoe, Cultivator, Plow and Rake.

A double and single wheel hoe in one. 14 inch steel wheels. Straddles the crop until twenty inches high, then can be worked between the rows with either one or two wheels. Shipping weight 39 lbs. Price, F. O. B. Seattle, \$16.75

No. 12 PLANET JR. Double and Single Wheel Hoe, Cultivator and Plow. This is the same as No. 11 except that it has only one pair of hoes, one pair plows, four cultivator teeth and a pair of leaf lifters. Price, \$13.25

No. 13 PLANET JR. Double and Single Wheel Hoe. This is the No. 11 or No. 12 with 6 inch hoes only, as these are the tools that are most used. Any of the attachments shown with No. 11 may be added at any time. Weight 28 lbs. Price, \$10.00

No. 14 PLANET JR. Double and Single Wheel Disc Hoe, Cultivator and Plow. This is the same frame as the No. 11, but is equipped with three adjustable discs on each side, one pair prong cultivator teeth, and one pair plows. Shipping weight 38 lbs. Price, \$15.00

No. 16 PLANET JR. Single Wheel Hoe, Cultivator, Rake and Plow.

Single wheel hoes are lighter than the double and do almost the same work. They are used mostly between the rows, but by mounting the wheel on the other side of the arm they may be used on both sides of the row while the plants are small. Shipping weight 26 lbs. Price, F.O.B. Seattle, \$11.25

No. 17 PLANET JR. Single Wheel Hoe. Same as No. 16 without rakes. \$9.75

No. 17½ PLANET JR. Single Wheel Hoe. Same as No. 16 with hoes and cultivator teeth only. \$8.50

No. 18 PLANET JR. Single Wheel Hoe. Same as No. 16 with hoes only. Weight 19 lbs. \$7.25

No. 31 PLANET JR. Combined Drill Seeder and Wheel Hoe.

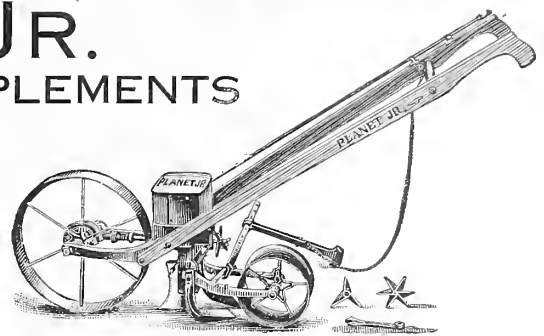

This will sow even a small packet of garden seed with great precision in a narrow row from one-quarter to two inches deep. Quickly changed to a wheel hoe. Weight 32 lbs. Price, \$13.75

No. 31-D PLANET JR. Drill Seeder. The same as No. 31 without cultivating attachments. \$11.25

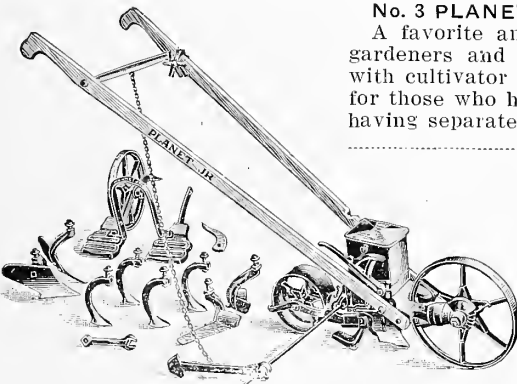

ATTACHMENTS FOR PLANET JR. IMPLEMENTS.

No. 16

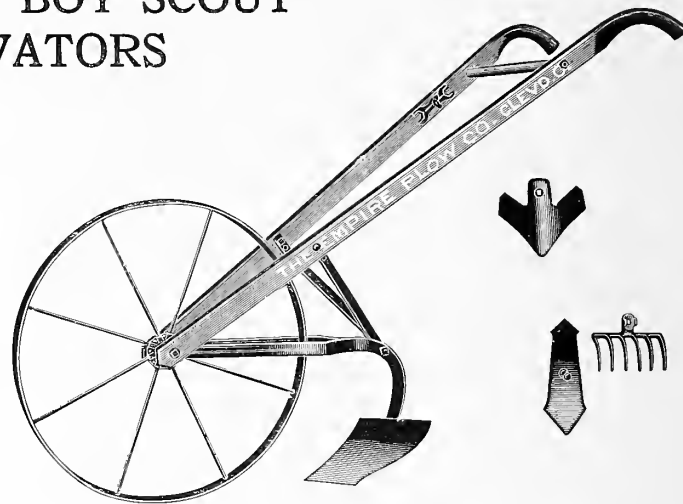

No. 31

RURAL AND BOY SCOUT CULTIVATORS

BOY SCOUT GARDEN PLOW AND CULTIVATOR

All steel except the handles. The swing frame and extended curved handles insure easy running and a steady draft. Equipped with Plow, Rake, Weeder and Double Diamond Point Markers. Has twenty-four inch steel wheel. Tools are sharpened and polished and will scour in use. Shipping weight 24 lbs. Price, F. O. B. Seattle, \$5.50

RURAL GARDEN PLOW AND CULTIVATOR

A light, strong and serviceable Garden Plow, Cultivator, Hoe and Rake. Made of steel throughout except the handles. Equipment includes Plow, Sweep, Reversible Shovel, Rake and Wrench. Shipping weight 20 lbs.

Price, F. O. B. Seattle, \$5.00

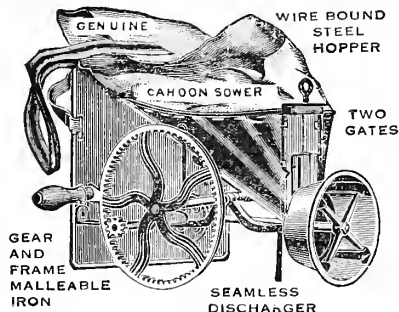

THE CAHOON BROADCAST SEEDER

The Cahoon Seed Sower is recognized the world over as the standard broadcast seed sower. This machine has been on the market well over half a century, and during all these years it has stood at the head of its class.

It is made of steel, iron and brass, and so constructed that with ordinary use it will last a lifetime. When used according to directions it is guaranteed to perform its work with perfect satisfaction.

It sows wheat, barley, oats, rye, buckwheat and other grains and grasses five times faster than by hand, and by its even distribution will effect a saving of one-third in the seed.

At a common walking gate it will sow from four to eight acres per hour, according to the seed used. Shipping weight 8½ lbs. Price, F. O. B. Seattle, \$5.00

HOCKING VALLEY CIDER MILLS

The Hocking Valley Cider Mills are adapted to the principle of the large hydraulic presses to a hand mill. The grinding device consists of a hardwood cylinder, with serrated steel knives running lengthwise which break down the juice cells and make a pomace that yields under the press every particle of juice in the fruit. A quart of water will clean it after using. An important feature of these mills is the absence of metal of any kind to rust and impair the quality of the cider.

HOCKING VALLEY BANTAM MILL. This is the mill illustrated on the right. The tub is 10 inches in diameter by 10½ inches high. An ideal mill for family use. Can be used to press grapes and other small fruit. Weight 120 lbs. Price, F. O. B. Seattle, \$.....

Hocking Valley Louble Tub Cider Mills

The two-tub Hocking Valley Cider Mills are made in the following sizes, all having greater capacity than corresponding sizes of other mills. The Hocking Valley Junior, in capacity, almost equals the medium of other mills.

Frames are substantially built to stand all strains to which they may be subjected. Tinned rivets used to prevent any rust reaching the cider. Pulleys for operating the Medium and Senior mills by power can be furnished with these mills as an extra.

No. 1. Spread of jaw, 4 inches. Weight, 1 lb.
PriceEach, 75c

RELIABLE STANDARD BLUE FLAME, OIL HEATED COLONY HOVER

It is sometimes difficult to procure hard coal. This hover burns coal oil, which is always easy to get. With this hover you can get any amount of heat that is needed, at all times, and when the needle valve is once set it will regulate the drop of oil automatically.

It will do better work than the coal burning brooder, with less trouble, less risk of fire going out, with equal success and with less cost. There is no dirt, no ashes.

It saves time, money and trouble, and chickens grow faster, get heavier and thrive better, because this hover takes the very best of care of them and keeps them comfortable, happy and healthy.

These hovers are made of galvanized steel and have steel

legs. Capacity of the 18-inch hover is 100 chicks or less; of the 30-inch hover, 350 chicks or less; of the 42-inch hover is 500 chicks or less, and of the 52-inch hover is 1,000 chicks or less.

You can fill the hover to full capacity or you can brood as few as you like with equal success.

There is nothing to wear out or break in this hover. There are no corners, no crowding, no piling up of chicks.

WINFORD ELECTRIC BROODER

The Winford Electric Brooder has been in use for several years, under severe tests, and has proved to be the best of the electric brooders. The main trouble experienced with electric brooders, namely, the burning out of the element, has been overcome. The Winford has been run for more than three years without defects developing.

The Winford is a simple but efficient hover which will give a satisfaction never before known with the brooding of chicks.

If you have electricity available, you will find the Winford a great saver of money, time and worry, and it will be a real pleasure to watch the progress of the baby chicks and not have to worry as to whether your fire is holding out or your lamp is properly filled.

The Winford Electric has no legs or corners for the chicks to crowd against, and they will not crowd as the heat is evenly distributed. It is just as warm in one place as another.

It is easy to clean. Nothing could be more simple than to pull the hover up out of the way to sweep or clean underneath.

There are many things in favor of an electric brooder, and only one against it, that is your ability to make use of electricity. A healthier chick is assured because of an even heat throughout the brooding season. The first cost is less.

The cost to operate is less. The time and work of operating is less. If larger capacity is required, it has been found more economical and better to use several of the 500 chick size than to use a larger hover.

PRICES, WINFORD ELECTRIC BROODERS

No. 1.	Capacity 75 chicks.	Shipping weight 10 lbs.	Price, F. O. B. Seattle,	\$ 6.50

For success in poultry raising the following are essentials: Fertile Eggs from Healthy Stock of a good Laying Strain; a Good Incubator; a Good Brooder; Absolute Cleanliness and Pure Air; Clean, Fresh Water; Green Food; Invieta Chick Food and Invieta Chick Mash. We can provide all except the cleanliness, air, water and green food.

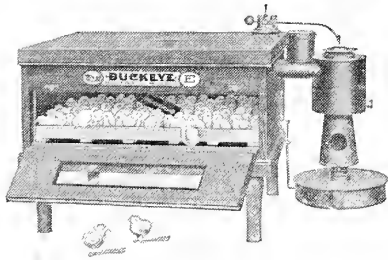

If you do not care to hatch the Chicks, we can furnish them. If you want Breeding Stock, consult us.

Come in and see us hatch chicks in the Mammoth Buckeye Incubator in our show window. Chicks hatching every day during the season.

BUCKEYE INCUBATORS

The Perfect Hatchers

Are Guaranteed to Hatch MORE Chicks and BETTER Chicks Than Any Other Incubator

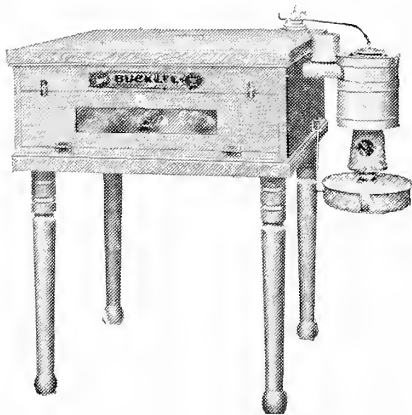

No. 14
Style E

Weight, crated for shipment, 55 lbs.
Capacity, 60 eggs. Price.....\$17.50

No. 14 is especially adapted for use by the small raiser. It has all the important features of the larger machines, such as visible thermometer, and the Buckeye heating and ventilating system. The temperature is easily regulated and the consumption of oil is low.

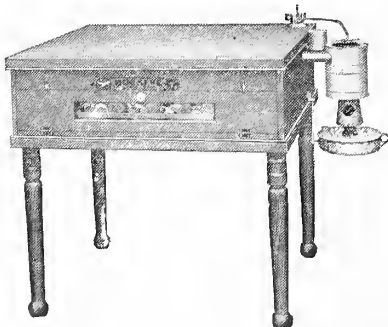

No. 16, Style E. Capacity 110 eggs; weight, crated for shipment, 85 pounds. Price, \$27.50. This machine is the same as No. 14, except that it has a greater egg capacity and long legs instead of short ones.

No. 17, Style E. Capacity 200 eggs; weight, crated for shipment, 125 pounds. Price, \$37.50. Same as No. 16, except that it has greater egg capacity.

No. 16
Style E
120 Eggs
Price \$27.50

All Style E incubators have single walls and are equipped with galvanized rust-resisting heaters.

No. 17
200 Eggs
Price \$37.50

We are exclusive agents in Seattle for the famous Buckeye Incubators and Brooders. Years of experience in the poultry supply business has convinced us that these are the most efficient hatchers on the market. The Buckeye Incubators are sold under an iron-clad GUARANTEE to hatch a chick from every hatchable egg. This is the guarantee the makers give with every machine sold.

WHY THE BUCKEYE SUCCEEDS

The unprecedented success which has followed the Buckeye for twenty-five years is primarily due to the invention of the Buckeye hot-water system. Without this wonderful system of hot-water heating, that perfect balance between the temperature, moisture and ventilation which is so necessary to successful incubation would be a physical impossibility. The ability to heat the egg chamber without cooking all the moisture out of the air is not only responsible for the abundant supply of natural moisture, but at the same time the soft radiated heat from the hot-water tank provides an absolutely uniform temperature, and permits the perfect ventilation of the egg chamber at the same time.

Without this system of hot-water heating it would be necessary to heat the egg chamber with currents of hot air, and it is now an established fact that the temperature and ventilation of incubator cannot be successfully balanced where hot-air currents are used.

Too much emphasis cannot be attached to the importance of keeping impure gases and fumes out of an incubator. Instead of passing the hot-air fumes through the incubator, with a likelihood of leakage in the conductor at any time, we heat the hot water on the outside—send it circulating around the egg chamber—and keep all the fumes from the lamp on the outside. It takes but a very small portion of lamp fumes to kill the developing chicks, and by circulating hot water through the egg chamber instead of hot air we entirely eliminate all possibility of damage to the eggs.

BUCKEYE GUARANTEE

This Buckeye Incubator is guaranteed to hatch every hatchable egg, and we further guarantee the perfect working of all its mechanical parts.

HATCH MORE AND STRONGER CHICKS

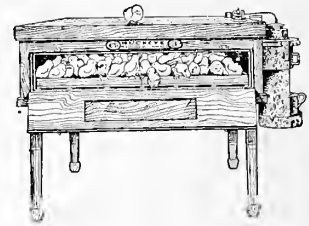

The Buckeye will hatch more chicks and stronger chicks than any other make of incubator. It requires no artificial moisture; will operate satisfactorily in any climate, and requires no attention to the regulator from the time a hatch is started until it is finished. Any Buckeye incubator, regardless of size or style, can be heated to 103 degrees inside of an hour. The average incubator requires from 12 to 24 hours to reach this degree of heat.

NO PREVIOUS EXPERIENCE NECESSARY

It is not necessary to have any previous experience to operate a Buckeye. The entire Buckeye system is so simple that a boy or girl can operate it as satisfactorily as an experienced operator.

BUCKEYE STANDARD INCUBATORS

The Buckeye Standard is an improved Buckeye. It is fire-proof and fool-proof. It is equipped with every desirable device that could possibly add to the efficiency of an incubator. Only the best material is used throughout, and a Standard should last a lifetime. In addition to being the most satisfactory hatcher on the market, the Standard Buckeye is fire-proof, and, therefore, insurable. Each machine is inspected by the National Board of Insurance Writers before it is put on the market.

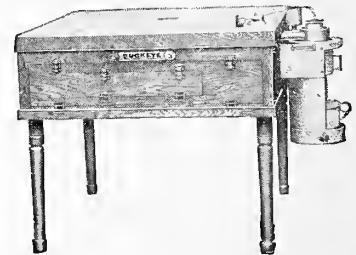

No. 1
Standard
120 Eggs
Price \$39.50

No. 1 Standard has a capacity of 120 hen eggs, or 85 duck eggs. It is complete in every detail, and is ready for immediate use. The weight, crated for shipment, is 100 pounds. This incubator is insurable, and bears the Underwriters' label. An improved feature of all Standard Incubators is the enclosed lamp. Equipped with oil or gas heater.

No. 2 Standard has a capacity of 175 hen eggs or 140 duck eggs, is equipped with oil or gas heater, and is complete and ready for use. Weight, crated for shipment, 135 pounds. This machine is insurable, and bears the Underwriters' label. Price, \$45.00.

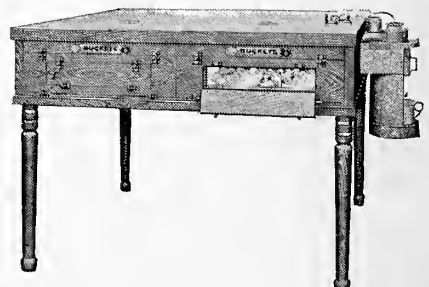

No. 3 Standard has a capacity of 250 hen eggs or 200 duck eggs, is equipped with oil or gas heater, and is complete and ready for use. Weight, crated for shipment, 200 pounds. This machine is insurable, and bears the Underwriters' label. Price, \$57.50.

No. 3
Standard
250 Eggs
Price \$57.50

No. 4 Standard has a capacity of 350 hen eggs or 280 duck eggs. Equipped with oil or gas heater, and is ready for use. Weight, crated for shipment, 230 pounds. Insurable, and bears Underwriters' label. This machine is very convenient for the commercial raiser. Price, \$67.50.

No. 5 Standard (Mammoth Standard). Capacity, 600 hen eggs or 480 duck eggs. Outside dimensions, 54 inches square, 36 inches high. Equipped with four egg trays, holding 150 eggs each. Double doors on front and back; oil or gas heater. Complete and ready for use. Bears Underwriters' label. Weight, crated for shipment, 325 pounds. Price, \$110.00.

Standard No. 5
600 Eggs
Price \$110.00

THE STANDARD COLONY BROODER

Patented July 4, 1916; April 24, 1917; May 8, 1917)

Makes Three Chickens Grow Where One Grew Before.
Cuts the Cost of Equipment to Less Than Half.
Cuts the Cost of Operation to Less Than Half.
Reduces the Time and Labor to Less Than a Fourth.

Guaranteed to Raise More Chicks and Better Chicks.
Nothing to Break. Nothing to Wear Out.
The Simplest, Safest and Most Economical Brooder Ever Invented.

Coal Burning

The Most Remarkable Brooder Ever Invented

Self-Feeding

Self-Regulating

Everlasting

Cuts the Cost of Equipment and Operation to Less Than Half—Reduces the Time and Labor to Less Than a Fourth. Nothing to Break. Nothing to Wear Out. The Simplest, Safest and Most Economical Brooder Ever Invented.

BUCKEYE BROODER STOVES will do anything any other brooder will do—regardless of price—and do it better. It matters not whether you have ten or ten hundred chicks under a Standard Colony Brooder, the results are the same. You can remove part of the chicks or increase the number at any time.

Air Always Pure and Fresh—No dampers or valves of any kind between the smoke pipe and the fire, the draft being controlled automatically, an exclusive feature of the Standard Colony Brooder and the only coal-burning Brooder that is absolutely free from gases under the Hover.

Operated Anywhere—No room is too large or too small for a Standard Colony Brooder. Whether it is operated in the largest barn or the smallest colony house, the results will be the same.

Burns Any Fuel—Hard or soft coal, charcoal, coke, briquettes or gas. Hard coal is best simply because it is cleaner. All fuel should be nut size.

Regulator—Two double disc thermostats—tandem hitched—supported on substantial casting that is bolted solidly to stove. Lower arm movable and attached to check valve by substantial iron rod. Chick-proof, accurate and positive.

Standard Colony Brooder is fire-proof, simple and requires little attention; has but one adjusting nut, which you need never touch more than once in a season. Requires absolutely no more attention than filling with coal once a day, shaking down the ashes into the pan twice.

The first cost is the only cost. Nothing to Wear Out. Nothing to break, being made of cast iron just like a kitchen range, and the Hover is of galvanized steel built to last a lifetime.

Buckeye Standard Brooder Stoves

MADE IN TWO SIZES

NUMBER 18

Height of stove 20 $\frac{3}{4}$ inches; diameter of stove 10 $\frac{3}{4}$ inches; diameter of base 11 $\frac{1}{2}$ inches. Fire-proof base 7 inches high with corrugated asbestos pad attached to lower plate and 1 inch air space between asbestos pad and floor.

Grates. Rocker furnace type made of solid casting, outside clearance, free burning, self-cleaning and anti-clog. Diameter 7 $\frac{1}{2}$ inches.

Hover. Galvanized steel 42 inches in diameter, removable, mounted on a substantial ring casting that rests on the top of the stove, moulded to fit and cannot be displaced. Furnished complete with rope and pulley for quick attachment.

Capacity any number of newly hatched chicks up to 500.
Shipping weight, 75 lbs. Price, \$22.50.

NUMBER 19

Height of stove 22 $\frac{1}{2}$ inches; diameter 12 inches; diameter of base 11 $\frac{1}{2}$ inches. Fire-proof base 7 inches high with corrugated asbestos pad attached to lower plate and 1 inch air space between asbestos pad and floor.

Grates. Rocker furnace type made of solid casting, outside clearance, free burning, self-cleaning and anti-clog. Diameter 9 inches.

Hover. Galvanized steel 52 inches in diameter, removable, mounted on a substantial ring casting that rests on the top of the stove, moulded to fit and cannot be displaced. Furnished complete with rope and pulleys for quick attachment.

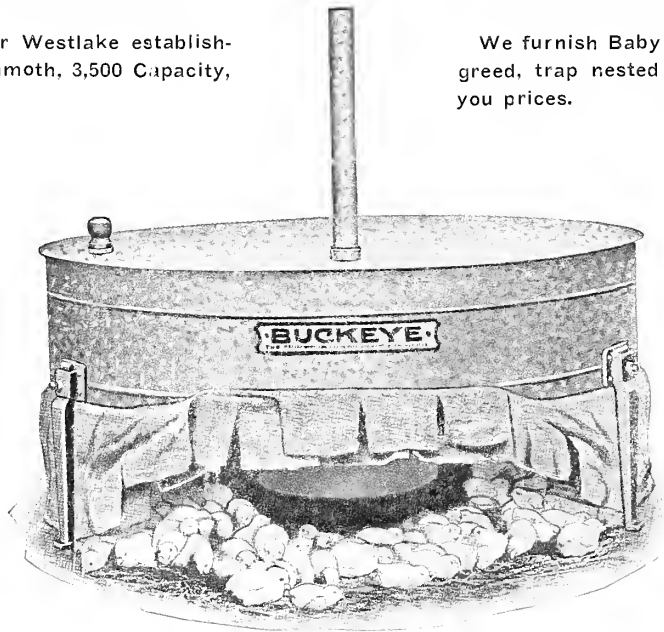

Capacity any number of newly hatched chicks up to 1000.
Shipping weight, 94 lbs. Price, \$27.50.

BUCKEYE PORTABLE BROODERS

When in town, drop in at our Westlake establishment and see our Buckeye Mammoth, 3,500 Capacity, Incubator hatching daily.

We furnish Baby Chicks from high producing, pedigreed, trap nested stock. Will be pleased to quote you prices.

The Oil-Burner that Broods Like a Coal-Burner

It Is a Truly Wonderful Brooder—And It's Durable

Nothing about it is but metal—excepting the curtain—and that's interchangeable.

THERE IS NO WASTE OF HEAT. The dead air space keeps all the heat in and all the cold out. This construction insures the highest degree of efficiency, and we guarantee the satisfactory heating of every brooder in any inside temperature down to freezing.

THE "BUCKEYE" LAMP IS NOT ENCLOSED. This feature of the "Buckeye" Brooder is in itself one of the most valuable improvements ever made to an oil-burning brooder. It is, in fact, the improvement that makes the oil-burner just as safe as a coal-burning stove.

FRESH AIR. The constant current of fresh air over the lamp bowl prevents all possibility of overheating the oil, and absolute safety is the result. This improvement is just as good as an insurance policy. **IT'S THE FRESH AIR THAT MAKES THE CHICKS GROW.**

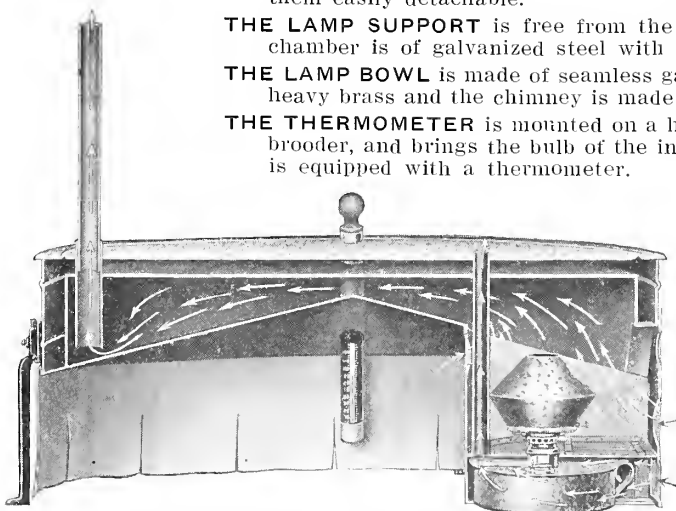

THE OUTSIDE SHELL is made of 28-gauge galvanized steel—the inside shell is 28-gauge black iron—with a one-inch dead air space between.

THE BROODER BODY is supported by three cast-iron legs that are rigidly secured to the sides by a set nut, which makes them easily detachable.

THE LAMP SUPPORT is free from the floor and is welded to the plate above. The door to the lamp chamber is of galvanized steel with a large peep hole for the ready observation of the lamp.

THE LAMP BOWL is made of seamless galvanized steel—the burner is a "Miller"—all the fittings are of heavy brass and the chimney is made of sturdy black iron.

THE THERMOMETER is mounted on a hardwood turning which is dropped through the top of the brooder, and brings the bulb of the instrument right down to the level of the chicks. Each brooder is equipped with a thermometer.

Showing a Sectional View of the "Buckeye" Brooder

Note that every particle of air under the hover is drawn from the outside—then up into the upper chamber, where it is discharged through the exhaust tubes. Every particle of impurity is drawn up and out—nothing can come back.

Drop Bottom

WATER AND FEED CUP

Holds about one pint, and hangs straight when applied to the coop. Can be attached to any exhibition coop. One size only.

No. 61. Weight ¾ lb.....\$0.20

No. 1. Top Fill Fountain. 1 gallon. Weight 4 lbs.....\$2.00
No. 2. Top Fill Fountain. 2 gallons. Weight 5 lbs..... 2.90
No. 4. Top Fill Fountain. 4 gallons. Weight 8 lbs..... 3.75

MOE'S DRY MASH HOPPER

The curved bottom of the hopper keeps the feed within easy reach of the birds. The gradual enlargement from top to base prevents clogging. The wire grid and the wires running from the flange through the wire grid prevent any chance of the fowls throwing out or wasting the feed. The sloping cover prevents the birds from roosting on the hopper. When both covers are closed it is rat and mouse proof.

No. 35. Width 8½ in. Wt. 4 lbs.....\$1.50
No. 36. Width 12 in. Wt. 5 lbs..... 2.10
No. 37. Width 24 in. Wt. 11 lbs..... 2.75

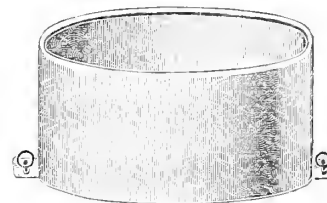

SANITARY FEEDING TROUGHS

Can be used for feed, wet mash or water. Barred top prevents wasting of food. Made of best grade of galvanized iron in three sizes.

No. 21. 12 inches long. Wt. 1 lb.....\$0.65
No. 22. 18 inches long. Wt. 1¾ lb..... .90
No. 23. 24 inches long. Wt. 2¼ lb..... 1.20

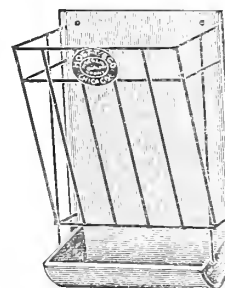

Star Fountain and Feeder

FEED AND WATER DISH

For feed or water for rabbits. Made of galvanized iron. Held to floor of hutch by a simple locking device, easy to remove for cleaning.

No. 46. Weight ½ lb.....25c

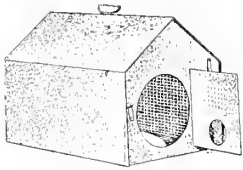

Feed Rack

MOE'S TOP FILL FOUNTAINS

The double wall keeps water cool in summer and retards freezing in winter. Thoroughly sanitary and as easily cleaned as a pail. Can be hung up out of litter and square pan prevents spilling.

No. 1. Top Fill Fountain. 1 gallon. Weight 4 lbs.....\$2.00
No. 2. Top Fill Fountain. 2 gallons. Weight 5 lbs..... 2.90
No. 4. Top Fill Fountain. 4 gallons. Weight 8 lbs..... 3.75

**METAL BROOD COOP**

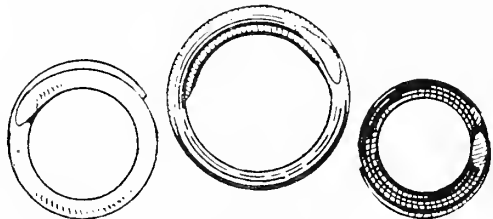

A complete home for the hen and her brood. Removable bottom for sanitation. Combination door for ventilation, to keep the hen inside and give the chicks their liberty, for absolute protection

against animals and weather, and to keep the chicks in. It is collapsible and can be stored in small space. Made of heavy galvanized iron. Made in one size only; 16 inches wide, 23 inches long and 16 inches high. No. 49. Weight 6 lbs. \$3.25

**MOE'S SCRAPER AND CLEANER**

Made of one piece of galvanized iron. Just the thing for cleaning brood coops, nests, dropping boards, rabbit hutches, etc. You can get into the corners with it.

No. 47. Length 10 inches. Weight 3/4 lb. \$0.30

American Asiatic Mediterranean

MOE'S KEY RING LEG BANDS

Made of celluloid in six sizes. The three larger sizes are exact size of above etchings. The largest size is for very large birds, including Asiatic Fowls and Turkeys. The next size is for American Fowls, including Rhode Island Reds and birds of similar size. The smaller cut represents the size for Leghorns and other Mediterraneans. The three smaller sizes are for Bantams, Pigeons and Baby Chicks. When ordering, name breed wanted for and we will send correct size.

They are made in ten colors, as follows: Black, White, Dark Blue, Pink, Light Blue, Red, Garnet, Green, Yellow and Purple.

REVOLVING ROD PREVENTS THE CHICKS FROM PERCHING UPON IT, MAKING THE FEEDER ABSOLUTELY SANITARY

MOE'S TRAP NEST FRONT

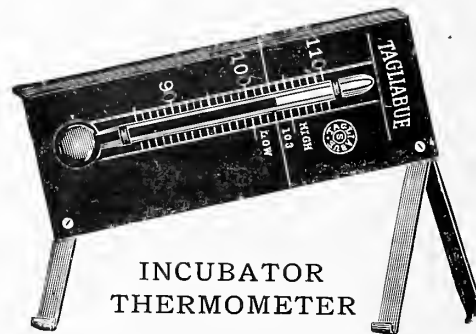

This new and inexpensive device meets a popular demand. With it an old box may be converted into a trap nest at small expense. Simple in operation, with no small parts to get out of order. The front works on hinges, making it easy to remove the birds or clean the nest. Made of galvanized iron; 11 inches wide, 12 inches high.

No. 63. Weight 1 1/4 lbs. \$0.50

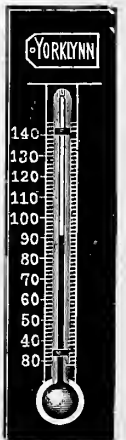

**CAPONIZING SET**

Caponizing is becoming more generally practiced each season, and is a simple and very profitable operation. We consider the George Beuoy Caponizing Set the best and most practical. It consists of Automatic Remover, Humane Spreader, Capon Bow, Knife, Hook Probe, and Capon Book.

Price, postpaid \$5.50

**INCUBATOR THERMOMETER**

One of the very best incubator Thermometers made; thoroughly tested and seasoned. Fits all standard makes of incubators. Stands on egg tray or may be hung up. Postpaid 85c

**BROODER THERMOMETER**

Thoroughly tested, seasoned and perfectly reliable. May be used in any brooder, brooder house or hover.

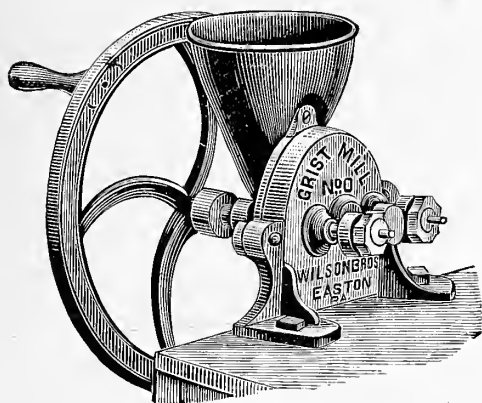

Price, postpaid 65c

EGG TESTER

Made to use on lamp. Fits No. 2 Burner. Made of metal. Price, postpaid 40c

WIRE HEN'S NEST

Strongly made of wire, to hang on the wall. No place for mites to harbor. Weight 10 ozs. Each, 25c; doz., \$2.50

No. 0 Grist Mill

also be adjusted for cracking the grain if desired. It is not to be compared with those made on the old style coffee mill principle. The grinding surfaces are of very hard material, especially made for this purpose, and are ground off perfectly true and will last for years. No. 0 Wilson's Family Grist Mill. Weight 30 lbs. Price, F. O. B. Seattle, \$6.75

MANN'S PATTERN BONE CUTTER

No. 7 Mann's Pattern Bone Cutter. Has heavy fly wheel, improved automatic feed, hinged cylinder 7 1/4 inches in diameter and 5 1/4 inches deep, and six perfectly tempered knives. Shelf provided on stand for receptacle to hold cut bone. With stand. Weight 110 lbs. Price, F. O. B. Seattle, \$25.00

No. 5-B Mann's Pattern Bone Cutter. Is similar to No. 7 but is smaller, has no legs, and is intended to bolt on a bench. Has large, heavy balance wheel, improved automatic feed and four perfectly tempered knives. Cylinder is 6 inches in diameter and 4 inches deep. Weight 85 lbs. Price, F. O. B. Seattle, \$17.25

WILSON'S GRIST MILL

This mill is especially made for grinding graham flour or corn meal for table use. It can be adjusted for cracking the grain if desired. It is not to be compared with those made on the old style coffee mill principle. The grinding surfaces are of very hard material, especially made for this purpose, and are ground off perfectly true and will last for years. No. 0 Wilson's Family Grist Mill. Weight 30 lbs. Price, F. O. B. Seattle, \$6.75

BANNER ROOT CUTTERS

No. 7 Banner Root Cutter. Furnishes green food for poultry during the winter. Will cut potatoes, turnips, beets, carrots, apples, etc., in long shaving-like strings, readily eaten by chickens. Weight 40 lbs. Price, F. O. B. Seattle, \$7.50

CLOVER CUTTER

A strong, durable, well finished hand machine for cutting clover, hay, straw, corn fodder, etc., for poultry and stock. It has an eleven-inch knife, and an automatic feed that can be changed in a moment to three different lengths of cut. Kokosing Feed Cutter. Weight 190 lbs. Price, F. O. B. Seattle, \$18.00

SEFTON LIVE CHICK BOXES

This box makes it possible to ship live chicks long distances by express with perfect safety. It is made from the best grade of corrugated paper, and is very strong. When not in use it is folded flat, and takes up very little room. Easily set up and made ready for use. Made in three sizes:

25 Chick Size. Each, 30c; dozen, \$2.70
50 Chick Size. Each, 35c; dozen, 3.40
100 Chick Size. Each, 55c; dozen, 5.30
Weights, 10, 16 and 28 lbs. per dozen.

EYRIE SHIPPING COOPS

A strong, light coop for shipping fancy fowls by express. Made in three parts. The top and bottom are made of wood and the body of one piece of corrugated paper. This strong construction enables the coop to resist hard knocks, making it practical in every way.

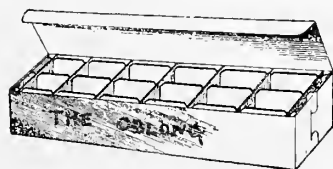

No. A. 16x12x18 in. Weight, doz., 54 lbs.
Price, Each, 90c; dozen, \$8.75
No. E. 24x20x22 in. Weight, doz., 125 lbs.
Price, Each, \$1.75; dozen, \$16.75

ANDERSON EGG BOXES

Made of corrugated paper and has double faced corrugated paper partitions to protect each individual egg. They fold flat and take up but little room when not in use. By sealing the box with

gummed strips which we furnish, pilfering or substitution of common eggs for fancy eggs while in transit is eliminated. May be shipped by either parcel post or express.

1 Setting Size. Weight 10 lbs. per doz. Price, F. O. B. Seattle, each, 25c; doz., \$2.25
2 Setting Size. Weight 17 lbs. per doz. Price, F. O. B. Seattle, each, 35c; doz., 3.25
50 Egg Size. Weight 28 lbs. per dozen. Price, F. O. B. Seattle, each, 50c; doz., 4.65
100 Egg Size. Weight 48 lbs. per dozen. Price, F. O. B. Seattle, each, 80c; doz., 7.75

GILT EDGE EGG SCALE

By separating the under-sized eggs you get fancy prices. This is the standard scale for grading eggs. Price, \$2.00

MARKET EGG CARTON

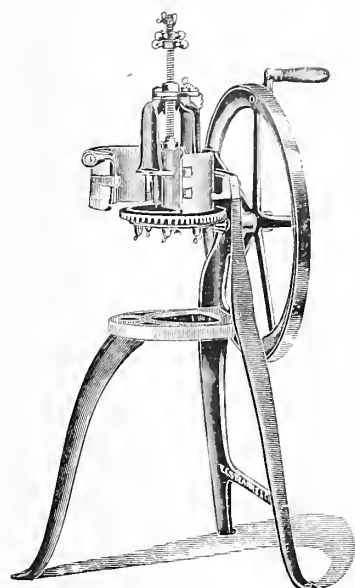

Saves handling and muss, and delivers eggs to market or customers in a neat, attractive manner. Packs in ordinary egg case, or may be handled individually. More convenient than the wide carton.

1 Dozen Size. Weight 3 lbs. per dozen. Price, F. O. B. Seattle, doz., 25c; 100, \$1.55

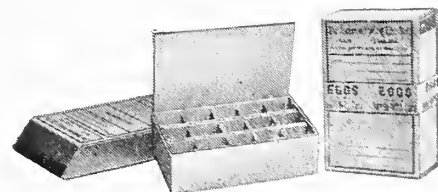

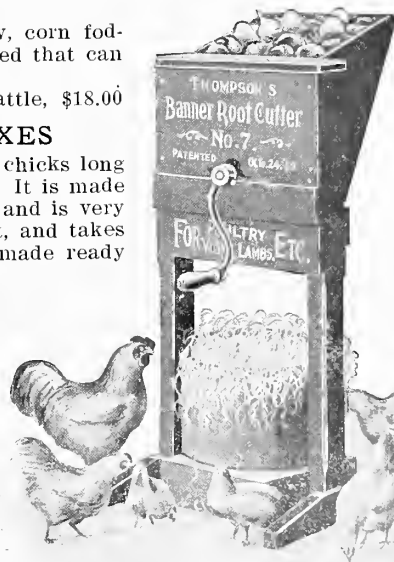

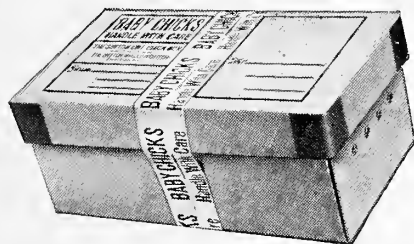

PARCEL POST EGG BOXES

A strong box made of corrugated board, with corrugated board partitions, for shipping eggs by parcel post.

1 Dozen Size. Weight 5 lbs. per doz. Each, 15c; doz., \$1.20
2 Dozen Size. Weight 9 1/2 lbs. per doz. Each, 20c; doz., 2.00

No. 7 Bone Cutter

POULTRY AND STOCK FOODS

BREED-ENVIRONMENT-NOURISHMENT

Three Essentials for Success
The Most Important of These Is

PROPER FOOD

RECENT YEARS have seen many of the old time traditions and uses in poultry culture swept aside and abandoned as useless and wasteful. Methods of housing that we thought ideal a few years ago have been superseded by more practical methods, making it easier to keep large flocks, at less expense and larger profits.

The feeding of poultry has also made wonderful advances, and today we are nearer the real solution of the ideal poultry ration than we thought possible even a year ago. This knowledge has not come to us through the efforts of any one individual, but from a steady and systematic grind of poultry and allied interests the country over. This, of course, had to be so. No industry could endure in the condition we were in up to recent years, for the prevailing prices of food stuffs would not allow for the huge waste that prevailed prior to what might be termed modern methods.

The one great outstanding fact that comes out of all this experimenting and research is that we do today know what is good and what is not good for poultry, and although some of us may close our eyes and refuse to see the facts, it is nevertheless a truth that we do so wilfully and without regard to the evidence available to all.

One of the greatest lessons that has been learned is that there is nothing as entirely misleading as the so-called "balanced ration"; that is to say, balanced on paper. Availability, digestibility, the source from which the nutrients are derived, fibre content and the method of application are absolutely a part of the necessary consideration in the balancing of the ration, and the man or men who make the statement that because a ration can be theoretically balanced without regard to these factors are misleading both themselves and the people they are advising. A theoretically balanced ration could be made of sawdust and fish scrap.

In offering you our feeds, we are doing so after a number of years of experience that has given us unusual opportunities to study poultry food and poultry feeding. We are trying the very best we know how to give you good, clean, digestible foods that will make your flocks profitable. We use nothing but high grade merchantable products. We do not buy or use any screenings, hulls, refuse, low-grade fibrous products or offal of any kind, and rather than do so we would stop making foods. At the present time there is very little profit in poultry foods made that way, but we believe that when times and conditions are again normal we shall reap the reward of our efforts.

INVICTA CHICK FOOD

A Scratch Food for Baby Chicks

A chick that is started right has a wonderful lead over one that gets a poor start. The chick should, of course, be bred and hatched right, after which proper brooding and feeding are necessary.

In preparing Invicta Chick Food only the best of everything in wheat, corn, rice, oat groats, soy bean, etc., are used. Nothing that could not be eaten by a human being goes to make Invicta Chick Food. It cannot be made any better. Its nutritive ratio, coming as it does from cereal sources alone, cannot be a complete food, but used in conjunction with Invicta Milk Mash for Chicks, we guarantee its being a perfect ration. You make no mistake in feeding Invicta Chick Food. It is good and always will remain so.

Price, 4 lb. carton, 35c; 9 lb. carton, 65c; 25 lb. sack, \$1.50; 100 lb. sack, \$5.50.

Invicta Foods May Be Depended Upon.
Always the Same. Always Good.

INVICTA MILK MASH

For Young Chicks

To get quick and necessary growth to young stock it is imperative that an abundance of protein and carbonaceous matter be fed in a manner that makes it easy for the chick to use it up rapidly and without a too great tax upon the digestive organs.

This is most easily done by the use of a properly constituted mash food in connection with the regular grain chick food.

It will be easily seen that milk meal, meat meal, oil meal, bone meal and a number of other elements cannot be fed in the grain food, but are easily adaptable to a mash food. Invicta Milk Mash was a great favorite among poultrymen last season, and at one time we could not supply the demand. We are better equipped this season, and are prepared to take care of all orders.

Your chick raising troubles are greatly lessened when you use Invicta Milk Mash. It is the last word in an easily digested body, muscle and bone producing food.

Price, 8 lb. carton, 75c; 25 lb. sack, \$1.65; 100 lb. sack, \$5.75.

INVICTA GROWING FOOD

A Scratch Food for Growing Stock

A great many people fail to appreciate the enormous demands made upon the food of the growing bird. When we consider the rapidity in which they mature, a rate that probably transcends any other living organism compared with the amount of food consumed, it will readily be seen that muscle, blood, bone and feather building materials must be available in large quantities. All food for growing chickens should have plenty of these elements, and in order to get the perfect growing ration a concentrated mash food must be fed in conjunction with the grain diet. This combination will produce wonders.

Price, 9 lb. carton, 60c; 25 lb. sack, \$1.40; 100 lb. sack, \$5.25.

INVICTA GROWING MASH

Makes Bone, Blood and Muscle

This is a companion food with Invicta Growing Food. It contains an abundance of bone, meat, oil meal, milk meal, bone charcoal, in fact everything necessary for the growing chick.

It will help your young stock to feather out quickly and uniformly. It lays the foundation for a vigorous maturity. It will get the pullets into a laying stage without any danger of forcing. You may use Invicta Growing Mash with confidence, knowing that it will give results.

Price, 8 lb. carton, 50c; 25 lb. sack, \$1.25; 100 lb. sack, \$4.50.

Prices do not include delivery charges, and are subject to change. Write for periodical price lists.

INVICTA SCRATCH FOOD

Scratch Food must be considered as the base upon which the other foods used are computed, that is to say, it will depend upon the grade of scratch food which you are using as to how much protein must be contained in the mash and side dishes, so to speak. If it contains light oats, barley, etc., you cannot afford to buy it, even at a low price.

We have a reputation for our Scratch Food. You try it. Price, 9 lb. carton, 50c; 25 lb. sack, \$1.15; 100 lb. sack, \$4.25.

INVICTA EGG MASH

In conjunction with Scratch Food, this is the source of your egg supply. A good egg mash is comparatively easy to make, because it is easy to combine the various animal foods and oil-bearing meals. We use high grade meat meals, soy bean meal, oil meal, milk meal, oat meal, and other high grade food products that will produce an abundance of eggs naturally. We use no condiments or forcing food of any kind. Every article that goes into this food is a first class merchantable product.

Price, 25 lb. sack, \$1.00; 100 lb. sack, \$3.80.

INVICTA FATTENING FOOD

Especially prepared for finishing off poultry. By using Fattening Food the surplus cockerels can be placed on the market in a condition that will warrant their bringing the best prices.

25 lbs., \$1.00; 100 lbs., \$3.80

INVICTA PIGEON FOOD

This food is carefully made from such good, sound, seeds and grains as pigeons thrive upon, in correct proportions. It contains everything required by pigeons except grit, shell, charcoal, salt, green food and water, which should be provided separately.

25 lbs., \$1.35; 100 lbs., \$5.25

INVICTA BIRD SEED

The highest grade mixed bird seed on the market. Contains Canary, Rape, Millet, Flax, and Hemp in proper proportions.

Price, 1 lb. package, 25c

BIRD GRAVEL

Specially prepared for cage birds. All cage birds should be provided with good, sharp grit. Price, 1 lb. carton, 15c

POULTRY OATS

A special grade of short, plump, heavy oats without beards and of high germination, suitable for sprouting or feeding.

Price, 25 lbs., \$1.10; 100 lbs. \$4.00

GRANULATED BONE

Bone is high in nitrogen, and is a great aid to egg production and valuable as a muscle, tissue and bone builder, especially in young stock. Made in three sizes, hen size, chick size, and meal for mixing in mashes.

Prices, 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.25; 100 lbs., \$4.25

MEAT SCRAP

High grade meat scrap manufactured by The Union Meat Co. Very high in protein. A superior meat scrap in every way.

Prices, 5 lbs., 45c; 10 lbs., 85c; 25 lbs., \$1.90; 100 lbs., \$7.00

FISH MEAT MEAL

Prepared from the highest grade of fish by-products. Practically free from oil, and in a very edible condition. High in protein. A valuable egg producer. Practically odorless.

Prices, 5 lbs., 45c; 10 lbs., 75c; 25 lbs., \$1.75; 100 lbs., \$6.50

ALFALFA MEAL

A splendid food for both poultry and stock. It is best scalded with boiling water, and then to a certain extent takes the place of green food. May be fed alone or mixed with the mash. Price, 25 lbs., 90c; 100 lbs., \$2.50

INVICTA CALF MEAL

The stomach of a baby calf is a delicate organism, and any food used as a substitute for its natural milk food must be properly prepared and of a high quality.

Invicta Calf Meal is made from the choicest products, thoroughly cooked and ground. It has a sweet, toasted flavor greatly relished by calves. We take special pride in our Calf Meal, having gone to great pains to install a special cooker for its preparation. Your calves will thrive on Invicta Calf Meal—it is the best made.

Price, 8 lb. carton, 75c; 25 lb. sack, \$1.65

INVICTA PIG MEAL

A pound of Invicta Pig Meal makes more than one gallon of rich slop for little pigs, equal to sow's milk. When Invicta Pig Meal is provided before and during the weaning period, that period is passed unnoticed by the pigs.

Weaning time is oftentimes a dangerous period in the life of the little pig. Invicta Pig Meal is intended to bridge over that crisis. It avoids the check that is often noticeable, caused by a radical change in diet.

It is not expensive. A twenty-five pound sack goes a long way. Give your piglets a treat—let them have Invicta.

Price, 8 lb. carton, 75c; 25 lb. sack, \$1.65

INVICTA LAMB MEAL

A great help to young lambs, particularly orphans. Greatly relished by lambs until fully grown. By using Invicta Lamb Meal, many of the young stock that would otherwise be lost can be profitably raised.

Price, 8 lb. carton, 75c; 25 lb. sack, \$1.65

INVICTA DOG MEAL

Especially prepared from a formula furnished by one of the leading dog men in this section. Contains an abundance of protein from animal food sources. Inexpensive and highly satisfactory.

Price, 8 lb. carton, 60c; 25 lbs., \$1.50

INVICTA RABBIT FOOD

It is difficult to prepare a rabbit food to fulfill all requirements. This is intended as a general purpose food, to be used in conjunction with roughage.

Price, 8 lb. carton, 50c; 25 lb. sack, \$1.00; 100 lb. sack, \$3.75.

O K COW FEED

We sell large quantities of O K Cow Feed, and it repeats wherever sold. We consider O K the ideal concentrate for milk production, and the many dairymen who have used it steady for years prefer it to any other food that they have been able to procure. It will give your cows a fair chance to produce. It is composed of Millrun, Rice Bran, Cottonseed Meal, Salt, Oats, Barley and Corn.

Price, 80 lb. sack, \$2.85

O K HOG FEED

Specially prepared to produce a maximum of fat at small cost. It is uniform in quality, and many of the large hog men in this locality feed it regularly. Where swill is a part of the diet, O K Hog Feed will be found more advantageous than using straight mill feed. The quality is right and the price is right.

Price, 80 lb. sack, \$2.85

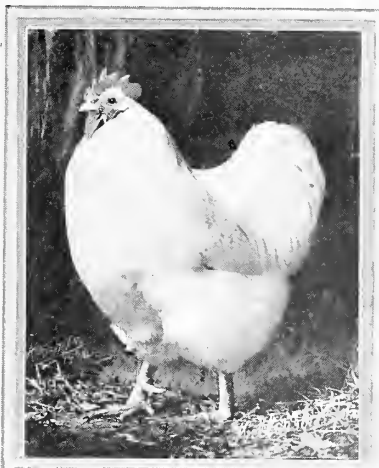

OIL CAKE MEAL

A highly concentrated food, valuable for feeding in small quantities to cattle, horses and hogs. Price, 100 lbs., \$5.00

GROUND FLAX SEED

An excellent conditioner for horses and cattle. Makes the coat sleek and glossy. Also good for poultry.

Price, per lb., 20c

GRANULATED CHARCOAL

A great aid to digestion. Absorbs the gases of the stomach. Valuable for poultry and hogs. Made in two sizes, hen size and chick size.....Price, 4-lb. carton, 35c; 50 lbs., \$2.50

EASTERN OYSTER SHELL

Very high in carbonate of lime. A nice, white, clean looking shell, palatable and of high quality.....Price, 8-lb. carton, 35c; 100 lbs., \$2.00

WESTERN OYSTER SHELL

This is Toke Point oyster shell, thoroughly seasoned and well graded. Far superior to clam shell.....Price, 100 lbs., \$1.75

LIMESTONE GRIT

A valuable masticator and lime source. Two sizes; for mature stock and for chicks.....10 lbs., 20c; 100 lbs., \$1.25

ALFALFA LEAVES AND BLOSSOMS

The supply is uncertain. None available at time of going to press. Write in regard to stock and prices.

SOY BEAN MEAL

One of the most valuable of the oil meals. Easy of digestion. Rich in protein. One of the few oil meals that can be used for any kind of stock.....10 lbs., 60c; 25 lbs., \$1.50; 100 lbs., \$5.50

DIGESTER TANKAGE

All hog men know the value of digester tankage, both for breeding sows and for finishing off market stock. It helps the little pigs over the danger stage, too.....100 lbs., \$6.50

MEDICATED SALT

For rabbits, hogs and other stock. Has medicinal qualities, and is a valuable expellant of worms.....Per brick, about 3 lbs., 35c

All prices are subject to change without notice, and do not include delivery charges unless so specified.

POULTRY AND STOCK REMEDIES AND TONICS**INVICTA POULTRY CONDITIONER**

A valuable aid to egg production. Can be fed to laying hens and will increase the egg yield without any evil effects. It is more of a food than a stimulant, and will build up bone, muscle and feathers in growing stock. It is particularly valuable during the moulting season and in cold, damp weather. It will ward off sickness by strengthening and toning up the system.....Price, 1½-lb. carton, 30c; 4 lbs., 60c; 10 lbs., \$1.25; 25-lb. sack, \$2.75, F. O. B. Seattle.

POULTRY PEPPER

A great appetizer. A small amount of pepper in the morning mash, especially during cold weather, will greatly aid the birds in warding off chills. It should not be used too freely.....Price, 1-lb. carton, 30c; 2-lb. carton, 50c

INVICTA LICE POWDER

The most successful lice powder yet offered. It contains sodium fluoride and naphthol especially compounded for use on poultry. Sodium fluoride has proven to be the greatest destroyer of lice on poultry yet discovered, and is endorsed by the U. S. Department of Agriculture. Directions for use on packages.....Price, 1-lb. package, 30c

INVICTA LICE LIQUID

For use on roosts, dropping boards, nest boxes, or wherever parasites may congregate. Invicta Lice Liquid is high in phenols, specially distilled for this purpose. Not to be confused with the cheap, low-grade lice sprays being offered. Directions for use on each can.....Price, Quart, 50c; Half-gallon, 85c; Gallon, \$1.50

INVICTA FLY LIQUID

Of great benefit to cattle and hogs during fly season. Can be used freely on cows without danger of gumming the coat or tainting the milk. Cows that are irritated by flies cannot give the best results. Full directions on each can.....Price, Quart, 50c; Half-gallon, 85c; gallon, \$1.50

CREOSOTE

Used as a preservative, germ destroyer, and for general insecticidal and germicidal purposes around the farm.....Gallon, \$1.00

CARBOLINEUM

Preserves wood, kills germs and destroys insects. A valuable disinfectant.....Quart, 60c; Gallon, \$1.85; 5 Gal., \$8.75

Lactein is a condensed milk product, made from butter-milk, skim milk and whey, blended together, pasteurized, and the lactic acid bacteria bred or developed to their very highest degree before the product is condensed by special process which retains all the health giving food and tonic values without the useless bulk of water.

It is a great egg producer, a splendid adjunct to the poultry ration, and is equally valuable for hogs, calves, dogs, rabbits, turkeys, ducks, and geese.....Price, 5-gal. keg, \$4.00; 10-gal. keg, \$7.50; 50-gal. keg, \$32.50

"CANE MOLA" STOCK FEEDING MOLASSES

A superior grade of sugar cane molasses, and an economical source of carbohydrates in the ration. One barrel of "Cane Mola" contains 330 lbs. of sugar in addition to other nutritive elements. In addition to its food value, it is a splendid conditioner for cattle, horses and hogs. Shipping weight 700 lbs.....Price, per barrel, F. O. B. Seattle, \$22.50

LESLIE'S SALT LICK

Especially prepared for cattle and hogs. In the form of bricks, compressed very hard. Does not disintegrate.....Per brick, about 5 lbs., 20c

KOW KURE

The greatest specific yet discovered for barrenness, scours, milk fever, caked udder, bloating, red water, and swollen bag in cows. Unquestionably the most valuable cow medicine ever offered.....Price, 1¼-lb. can, 60c; 3½-lb. can, \$1.20

LICENE

An excellent antidote for body lice on fowls. In paste form, in collapsible tubes. Easy to apply and very effective.....Price, per tube, 60c

ZENOLEUM

The standard disinfectant for use around barns, stables, out houses, cess pools, sinks, drains, in fact anywhere that germs may prevail. Cleansing, purifying, healing. Emulsifies in water easily. Valuable for wounds, cuts, sores, burns, etc., on animals or humans.....Price, 8-oz. bottle, 30c; quart, 60c; half-gal., \$1.10; gal., \$1.85

CONKEY'S ROUP REMEDY

Roup is the most common contagious disease of the poultry yard. When cold, damp weather starts, colds will appear, and these are likely to develop into roup, with fatal results. This remedy should be used as a preventive.....Price, small package, 30c; medium, 60c; large, \$1.10

CONKEY'S WHITE DIARRHOEA REMEDY

Will help save your chicks from this fatal, contagious chick disease. Price, small pkg, 30c; medium, 60c; large, \$1.10

WATERGLASS

The universal egg preserver. Inexpensive, simple and effectual.....Price, Quart, 35c; half-gallon, 60c; gallon, \$1.00

PRE-EGG-SERVER WATERGLASS

A dry, granulated form of Waterglass. One package is sufficient to preserve fifteen dozen eggs in a five-gallon crock.....Price, per package, 20c

FORMALDEHYDE

Toulouse Goose Eggs	Each, 50c
Bronze Turkey Eggs	Each, 60c
Wild Mallard Duck Eggs	Per setting of 15, \$5.00

PRINCESS FLOUR

HARD WHEAT FLOUR

Our Princess Flour is of a very high quality, strong in gluten, and wonderful in absorption, which means more loaves and less work.

It is milled by a miller of forty years' experience in the famous Idaho wheat belt. The wheat is carefully selected, blended, then washed and dried to remove all foreign substances.

It is manufactured by the most scientific methods and sanitary machinery. Of very high patent, all low grade flour removed, nothing but the finest particles of the wheat berry used in its manufacture.

Most brands of flour have their special recipe. Princess has the common sense method of the good judgment of the housewife. She knows what she wants, and can get it with Princess. Note the texture when using this flour. Work in all the moisture possible, and in proofing the sponge, keep the dough in a warm place, avoid draughts and cover with a cloth. Temperature should be between eighty and one hundred degrees.

All we ask is that you try one sack. If your grocer does not have it, order direct from us. Write for prices on Princess Flour, Graham, Whole Wheat, Pancake, Farina, Corn Meal and Sanitary Bran.

PERA CREAM SEPARATORS

In offering you the Pera Cream Separator, we do so with the absolute assurance that we are selling you the finest machine that we have ever handled. Some machines have their special features which are made much of by the manufacturers, and upon which the machines are sold. We claim that Pera is the simplest, strongest, most uniform operating, inexpensive, close skimming, most easily cleaned and satisfactory machine on the market.

The construction of the Pera is so simple that a person with no experience can take it to pieces and reassemble it without any difficulty. The oiling parts are easily accessible and can be taken care of with little trouble.

The skimming device is what is termed one piece construction, thereby eliminating a great deal of trouble both in cleaning and in lost parts.

It is exceedingly light running, and when once set in motion, is so perfectly balanced that the lightest turn on the crank handle will keep it going.

Pera comes in two sizes. No. 1, capacity 225 lbs. per hour, price \$85.00; and No. 2, 550 lbs. per hour, price \$120.00, F. O. B. Seattle.

Local Rate applies on parcels to be delivered from the office at which mailed or by Carrier or Rural Delivery from that office.

On parcels weighing eight ounces or less, containing Books, Seeds, Cuttings, Bulbs, Roots, Scions and Plants, the rate is one cent for each two ounces or fraction thereof, regardless of distance.

On parcels weighing four ounces or less, containing goods other than Books, Seeds, Cuttings, Bulbs, Roots, Scions and Plants, the rate is one cent for each ounce or fraction thereof, any distance.

Weight limit to offices within the first, second and third zones is seventy pounds for each package.

Weight limit to offices in other zones is fifty pounds for each package.

Limit of size of any package that will be accepted by parcel post is eighty-four inches in length and girth combined.

Eighth Zone rates apply to all offices in Alaska, Hawaii, Philippine Islands and Shanghai, China, with weight limit twenty pounds.

Eighth Zone rates apply to Canada, Mexico, Cuba and Panama, with weight limit four pounds six ounces. Twenty pounds can be sent to Mexico and Panama as Foreign Parcel Post.

Poisons and explosives cannot be shipped by parcel post. Liquids may be shipped by parcel post when specially packed to comply with requirements.

MAIL ORDERS

Observance of the following suggestions will assist us greatly in filling orders promptly and satisfactorily.

Order early. During the spring planting time we are crowded to full capacity, and occasional delays and errors are bound to occur; also, late in the season, we are liable to be sold out of some stocks. It is to your advantage, as well as ours, to order before the spring rush.

Use this order sheet. By using this regular form for orders, delay and chance for errors will be avoided. Additional order blanks will be mailed on request.

Write name, address and shipping instruction in proper spaces very distinctly. We receive many orders with name or address omitted or illegible, and are unable to fill such orders until the purchasers inquire about them.

Please do not write anything on the order sheet except the order and shipping instructions. If it is necessary to write a letter it should be written on another sheet of paper. Correspondence is handled through another source, and letters written on the order sheet are liable to be overlooked.

Remittance in full is required with all orders, thus avoiding unnecessary expense, labor and confusion. Please do not ask us to ship goods C. O. D. If you expect to do a regular and extensive business with us, and wish to open an account with us, please make application to our treasurer, giving references and other information required by all business houses. Remittances should be made by Post Office Money Order, Bank Draft or Registered Letter. We will accept stamps in small amounts, but cannot be responsible for stamps, currency or coin lost in the mail.

DO NOT FORGET TO ORDER MAG-O-TITE.

It is almost impossible to grow Radishes, Cabbages, Onions, Turnips and Kale without it.
